Chapter 1 IT in the 21st Century: The Expanding Internet and Mobile Telecommunications Frontiers

Issues in the 21st Century	4	6 Info-communications Policy Directions for the 21st Century	28
1 Info-communications in the 21st Century ...	6	1. The Government's Role in Creating a 21st Century Based on Advanced Info-communications	28
1. The IT Revolution	6	2. R&D of Info-communications Technology in the 21st Century	28
2. Expectations for New Info-communications Services	6	3. Vision for the Next-Generation Local Information Community	28
3. Info-communications Trends	7	4. The Millennium Project	28
4. The Internet	8	7 Issues in Info-communications	30
5. Mobile Telecommunications	8	1. Developing the Global Info-communications Infrastructure	30
2 Global Trends	10	2. Building Next-Generation Network Infrastructure ..	30
1. The Internet	10	3. Laying the Groundwork for Info-communications Usage	32
2. Internet Hosts	11	4. The Digital Divide	33
3. Mobile Telecommunications	11	5. Internet Fees	36
4. The Internet in the US	11	6. Electronic Government	36
5. Mobile Telecommunications in Scandinavia	11		
3 User Trends	13		
1. Overall Trends	13		
2. The Internet	13		
3. Mobile Telecommunications	14		
4. Mobile Internet Access	17		
4 Business in the 21st Century	18		
1. Internet Businesses	18		
2. New Business Formats	21		
3. In Pursuit of Efficiency	22		
4. Telework and SOHO	23		
5 Life in the 21st Century	24		
1. Overview	24		
2. Housing	24		
3. Hobbies and Entertainment	25		
4. Social Services	25		
5. The Environment	26		
6. Disaster Prevention	26		

Chapter 2 Info-communications in Japan

1 The Info-communications Industry	38	1. Broadcasting Category in Japan	48
1. Gross Domestic Output	38	2. Multiplex Broadcasting	48
2. Gross Value Added	38	3. Satellite Broadcasting	48
3. Productivity	38	4. Cable TV	48
4. Employment	39	5. NHK	48
5. Investment in Info-communications		6. University of the Air	49
Equipment	39	7. International Broadcasting from Japan	49
6. Info-communications Ventures	40	8. TV Watching and Radio Listening	49
		9. Broadcast Programming	50
2 The Telecommunications and Broadcasting Industries	41	6 Postal Services	51
1. The Telecommunications Industry	41	1. Mail Volume	51
2. The Broadcasting Industry	41	2. Services	51
3. Capital Investment	41	7 Telecommunications Tariffs and Fees	52
4. Sector Reorganization	41	1. Domestic Tariffs	52
5. Postal Services	42	2. Differential between Tariffs in Japan and Other	
		Countries	52
3 Info-communications Networks	43	3. Broadcasting Fees	53
1. Backbone Networks	43	4. Postage Rates	53
2. Subscriber Networks	43	8 Technology	54
3. Mobile Telecommunications	44	1. R&D Investment	54
4. Satellite	44	2. International Comparison of Info-communications	
5. Radio Stations	44	R&D	54
6. Terrestrial Broadcasting	44	3. Industry-University Tie-ups	54
7. Cable TV	44	9 Advancing Info-communications Technology	55
8. The Postal Network	44	1. IT in Business	55
		2. IT in the Home	55
4 Telecommunications Services	45	3. IT in the Public Sector	55
1. Overall Trends	45	10 Information Flow	57
2. Telecommunications Media Usage	45	1. Nationwide Information Flow	57
3. Fixed-Line Telephones	45	2. Regional Information Flow	57
4. ISDN	46	11 Trends Abroad	59
5. Pay Phones	46	1. Info-communications Overseas	59
6. International Telephone Calls	46	2. Global Alliances	59
7. Cell Phones and PHS	47	3. Development of R&D Network Testbeds	59
8. Pagers	47	4. Terrestrial Digital Broadcasting Overseas	60
9. Satellite Mobile Telecommunications	47		
10. Domestic Leased Circuits	47		
11. International Leased Circuits	47		
5 Broadcasting Services	48		

Chapter 3 Trends in Info-communications Policy

1 Major Policies for an Advanced Info-communications Society	62
1. Activities of the Advanced Information and Telecommunications Society Promotion Headquarters	62
2. Bolstering the Economy and Employment	63
3. Ideal Socioeconomy and Policies for Economic Rebirth	63
4. Policy Measures for Economic Rebirth	63
5. Virtual Agency	63
2 Promoting Info-communications Reform	64
1. Reform of the Telecommunications Market	64
2. Promotion of Deregulation in Broadcasting	66
3. Promotion of New Info-communications Businesses	66
3 The Info-communications Network Infrastructure	67
1. Development of Network Infrastructure	67
2. Correcting Information Differentials	67
3. Enhancing the Safety and Reliability of Info-communications Networks	69
4. Upgrading Broadcasting Technology and Services	69
4 Promoting Research and Development	72
1. Creative Info-communications Systems	72
2. Multimedia Platform Technology	72
3. Japan Gigabit Network	72
4. Multimedia Mobile Access Communications (MMAC)	72
5. Basic Petabit-Level Network Technology	73
6. Stratospheric Platforms	73
7. Global Multimedia Satellite-mediated Mobile Communications	74
8. Gigabit Satellite Network	74
9. Engineering Test Satellite VIII (ETS-VIII)	74
10. Orbital Maintenance System	74
11. Quasi-zenith Satellite System	75
12. Technology for Measuring the Global Environment	75
5 Laying the Groundwork for Advanced Info-communications	76
1. Assisting the Elderly and Disabled	76
2. Encouraging Telework and SOHO	76
3. Improving the Telecommunications Usage Environment	76
4. Improving the Radio Wave Usage Environment	77
5. Ensuring the Sound Development of Broadcasting	77
6 Advances in Public Sector Info-communications	78
1. Joint Development of Public Sector Telecommunications Systems	78
2. Developing a Geographic Information System	78
3. Advances in Regional Info-communications	78
4. Encouraging Development in Okinawa	78
7 Measures for Globalization	79
1. International Policies	79
2. International Financial Assistance	79
3. Work with International Standards Organizations	79
8 New Postal Services and Uses for the Postal Network	80
1. One-Stop Administrative Services at the Post Office	80
2. Internet Use in Post Office Services	80
3. Postal Savings Network Services	80

In this publication, "fiscal (year)" indicates the Japanese fiscal year, starting April 1 and ending next March 31, and otherwise indicates calendar year.
