MIC Apr. No. 27084	
Apr. valid until March 31, 2008	

Submission deadline: January 25, 2008

Confidentia

Questionnaire on Use of Telecommunications << for Households>>

- Telecommunications Usage Trend Survey, Ministry of Internal Affairs and Communications (MIC) (2007) -
- This survey is approved under the Statistical Reports Coordination Act.
 The information obtained through this questionnaire will not be used for purposes other than creating a statistical report. Accurate and complete information would be appreciated.

(Space for affixing address label)

It may become necessary to contact you for clarification at a later date. If you would permit such, could you please provide your telephone number in the blank below?

_

(In filling out this questionnaire, please note the following.)

- 1 This questionnaire contains questions about how and in what situations you (the person whose name appears on the envelope) and the members of your household use ICT equipment and services in your daily life.
- 2 For the definitions for the terms marked with an asterisk (*) followed by a number, please refer to the glossary found on the last page of this questionnaire.
- 3 Please indicate the facts as of December 31, 2007, except otherwise noted.
- 4 Please return this questionnaire, and direct any questions, to the following office:
- 5 The above organization is entrusted by MIC to conduct this survey.

<<For your entire household>>

_

The questions below are for your entire household and are directed to the head (or equivalent) of the household.

- Q1. About the ICT equipment you have or use:
- (1) Do you have any of the following equipment (1 12) with telecommunications capability?

 Please circle all the numbers that apply. For "5. PC", please indicate the number of PCs you have.

Note: Do not circle any equipment that you have not used at all during the past 12 months, even if you have it, nor any which has been procured by the company you work for

1. Fixed-line telephone 6. FAX 11. Mobile player capable of automatically recording content from a PC 2. Mobile (cell) phone, PHS 7. Car navigation system² 3. Mobile (cell) phone capable of receiving 8. Car-mounted ETC*3 12. Other intelligent appliances one-segment broadcast capable of connecting to the Internet 4. Personal digital assistant (PDA)*1 9. TV set capable of connecting to the Internet 5. Personal computer (PC): How many? _ 10. Home-use game console capable of How many are equipped connecting to the Internet with a TV tuner?

For households having two or more PCs:

Are they <u>interconnected</u>, <u>either wirelessly or with cables</u> (forming a home LAN)? Please <u>circle all the numbers that apply</u>.

- 1. Interconnected with cables
- 2. Interconnected wirelessly
- 3. Not interconnected
- (3) Do you use IP telephony 4? Please circle only one number that applies.
 - 1. Yes, we do.

- 3. Currently no, and we have no plans to do so.
- 2. Currently no, but we plan to introduce it in the future.

- Q2. About the use of the Internet:
- (1) Has any member of your household (except children below 6 years of age) accessed the Internet (sending/receiving email, visiting a Website, etc.) during the past 12 months? Please circle only one number that applies.
 - * Here, access using any kind of equipment is assumed, including a PC, a mobile (cell) phone, a PHS, a PDA, or a game console.
 - * Access for <u>any purpose</u> is assumed, including private use and work-related use. Also, access from <u>any place</u> is assumed, inside as well as outside the home.
 - * Access from any equipment, regardless of ownership, is assumed, including that at libraries and Internet cafés.
 - 1. At least one person has accessed the Internet.
- 2. Nobody has accessed the Internet.
- (2) For those households responding to (1) with "1. At least one person has accessed the Internet": What equipment was used to access the Internet? Please circle all the numbers that apply.
 - _1. PC at home
- 2. PC outside the home
- 3. Mobile phone/PHS/PDA
- 4. Other

▶ (3) For those responding to (2) with "1. PC at home":

How did you connect to the Internet by using a PC from home? Please circle all the numbers that apply.

- Narrow-band connection
 - 1. Telephone line (dialup)
- 3. ISDN (always-on connection)2*5
- 5. PHS line¹

- 2. ISDN (on-demand connection)2*5
- 4. Mobile (cell) phone line (except 10 below)1
- Broadband connection
 - 6. Cable TV (CATV) line
- 8. Fixed wireless line (FWA)*7
- 10. 3rd-generation

- 7. Optical fiber (FTTH line)*6
- 9. DSL*8

mobile (cell) phone line1*9

- Other
 - 11. Other
- 1) Here, "4. Mobile (cell) phone line (except 10 below)," "5. PHS line," and "10. 3rd-generation mobile (cell) phone line" apply to the cases in which they are connected to a PC when used, but not to the cases in which they are used by themselves (standalone).
- 2) The ISDN based on optical fiber should be categorized as "7. Optical fiber (FTTH line)."
- (4) Another question for those responding to (2) with "1. PC at home":

[1] Do you plan to switch to a different line or lines? Please circle only one number that applies

-1. Yes, we do.

3. No, we don't have any plans to do so.

2. Under study.

4. Don't know.

→ [2] If you have circled "1. Yes, we do." in [1] above, what kinds of connection do you have in mind? Please circle all the numbers that apply.

- Narrow-band connection
 - 1. Telephone line (dialup)
- 3. ISDN (always-on connection)²
- 5. PHS line¹

- 2. ISDN (on-demand connection)²
- 4. Mobile (cell) phone line (except 10 below)¹
- Broadband connection
 - 6. Cable TV (CATV) line
- 8. Fixed wireless line (FWA)
- 10. 3rd-generation mobile (cell) phone line¹

- 7. Optical fiber (FTTH line)
- 9. DSL
- 1) Here, "4. Mobile (cell) phone line (except 10 below)," "5. PHS line," and "10. 3rd-generation mobile (cell) phone line" apply to the cases in which they are connected to a PC when used, but not to the cases in which they are used by themselves (standalone).
- 2) The ISDN based on optical fiber should be categorized as "7. Optical fiber (FTTH line)."

- (5) A further question for those responding to (2) with "1. PC at home": Are you using any file exchange program, such as Winny or Share?
 - 1. Yes. 2. No. 3. I don't know.
- Q3. About problems encountered in using the Internet:

For those households responding to Q2 (1) with "1. At least one person has accessed the Internet": Have you encountered any of the following problems while using the Internet during the past 12 months?

(Under each of the "PC (home)" and "Mobile phone (including PHS/PDA)" columns, please circle all the

	PC (home)	Mobile phone (including PHS/PDA)
Have detected a computer virus but have not been infected.	1	1
Have detected a computer virus and have been infected at least once.	2	2
Have received a spam mail (except phony invoice mails).	3	3
Have received a phony invoice mail.	4	4
Unauthorized access ¹	5	5
Leak of personal information through spyware, etc ² .	6	6
Personal slander on the web (electronic bulletin board, etc.).	7	7
Phishing ³	8	8
Other (infringement on copyright, etc.).	9	9
Have had no problems.	10	10

- 1) Refers to any incident in which somebody or some program breaks into a computer system without permission to cause some anomaly or abuse its resources.
- 2) Refers to any program that secretly collects personal information such as access history in a PC and transmits it outside.
- 3) Refers to a pseudo-fraud act of pretending to be a legitimate mail from, or a website of, an existing company and prompting the PC user to give out a password or a PIN.
- For people who chose "Have detected a computer virus and have been infected at least once":

Sub-question 1: How many times have you been infected with a PC virus during the past 12 months?

(Under each of the "PC (home)" and "Mobile phone (including PHS/PDA)" columns, please <u>circle</u>

<u>all the numbers that apply.</u>)

	PC (home)	Mobile phone (including PHS/PDA)
Once	1	1
Twice	2	2
Three times	3	3
Four times	4	4
Five times or more	5	5

For people who chose "Have received a spam mail (except phony invoice mails)" or "Have received a phony invoice mail":

Sub-question 2: How frequently have you received such mails?

(Under each of the "PC (home)" and "Mobile phone (including PHS/PDA)" columns, please circle all the numbers that apply.)

	PC (home)	Mobile phone (including PHS/PDA)
10 or more a day	1	1
5 – 9 a day	2	2
2 – 4 a day	3	3
About 1 a day	4	4
About 1 every 3 days	5	5
About 1 a week	6	6
Less than 1 a week	7	7

- Q4. About security measures taken in using the Internet:
- (1) For those households responding to Q2 (1) with "1. At least one person has accessed the Internet": Which of the following security measures have you taken against viruses, unauthorized accesses, etc. during the past 12 months? (Please circle all the numbers that apply.)
 - 1. Installed an anti-virus program.

8. Installed a firewalf.

2. Subscribed to an anti-virus service offered by the provider, etc.

9. Used a firewall service offered by the provider, etc.

Installed an anti-spyware program.

10. Used different passwords for different accounts.

4. Updated the OS or the browser.

11. Changed passwords at certain intervals

5. Made backups of files, etc.

12. Other.

6. Updated the mail software; Switched to different mail software.

7. Did not open mails, attachments,

13. Did nothing.

or HTML files from people I don't know.

- 1) If the anti-virus program, etc. you have includes a anti-spyware feature, please also circle "3. Installed an anti-spyware program."
- 2) Refers to a system which protects a computer from unauthorized attacks from outside. If the OS or the anti-virus program, etc. you have includes the firewall
- Another question for those households responding to Q2 (1) with "1. At least one person has accessed the Internet": Which of the following measures have you taken against spam mails during the past 12 months? (Under each of the "PC (home)" and "Mobile phone (including PHS/PDA)" columns, please circle all the numbers that apply.)

	PC (home)	Mobile phone (including PHS/PDA)
Chose a complex mail address.	1	1
Used the function of rejecting designated mails.	2	2
Used the function of accepting only designated mails.	3	3
Used the function of rejecting "unauthorized ad*" mails.	4	4
Changed the email address at certain intervals.	5	5
Other.	6	6
Did nothing.	7	7

A further question for those households responding to Q2 (1) with "1. At least one person has accessed the Internet": Which of the following measures have you taken to protect personal information during the past 12 months? (Please circle all the numbers that apply.)

- 1. Refrained from putting personal information on the web such as a bulletin board.
- 5. Refrained from carelessly downloading from a website.
- 2. Refrained from using a website with a prize competition.
- 6. Other.
- 3. Refrained from entering credit card numbers.
- 7. Did nothing.

- Installed an anti-spyware program.
- Q5. About filtering software:
- (1) Are there children aged below 18 in your household?

1. Yes.

2. No.

For those households responding to (1) with "1. Yes":

Do the children that are below 18 in your household access the Internet by using a PC at home or a mobile phone (including PHS/PDA)? Please circle all the numbers that apply.

- 1. Our children access the Internet by using our PC at home. 2. Our children access the Internet by using a mobile phone (including PHS/PDA).
- 3. Our children do not access the Internet by using our PC at home or a mobile phone (including PHS/PDA).

- (3) Do you know of any filtering software that blocks access to harmful Websites or any filtering services offered by mobile phone (including PHS/PDA) companies? Furthermore, are you using any such software or service?

 1. I am quite familiar with it.
 2. I have heard of it.
 3. I don't know.

 2. Are you using any filtering software on the PC that is used by the children?

 1. Yes.
 2. No.

 3. About filtering services available on mobile phones (including PHS/PDA):

 1. I am quite familiar with them.
 2. I have heard of them.
 3. I don't know.

1. Yes. 2. No.

Q6. About concerns about using the Internet:

For those households responding to Q2 (1) with "1. At least one person has accessed the Internet":

Do you have fear or concerns about using the Internet?

(Please circle only one number that applies.)

- 1. Not particularly.
- 2. Aware of security threats, but not concerned very much because we take countermeasures.
- -3. Taking countermeasures against security threats, but they are insufficient and we are a little concerned.
- 4. Concerned
- → For households who responded to the above question with 3 or 4 What kinds of concerns do you have? (Please <u>circle all the numbers that apply</u>)
 - Protection of personal information
 Could be described by the filter of the fi
- Q7. About the reasons for not using the Internet:

For all households:

In what way are you dissatisfied with the Internet, or what are the reasons for not using the Internet? (Please <u>circle all the numbers that apply</u>.)

Not dissatisfied.
 Information retrieval takes a lot of work.
 Connection is slow.
 Equipment (PC, etc.) is too expensive.
 Equipment (PC, etc.) is hard to operate.
 There is no information (on the Internet) I need.
 There is no need.
 Don't know much about the Internet.
 Other.

Q8. About cable TV, satellite broadcast, and terrestrial digital broadcast:

[1] Do you <u>watch</u> any of the following broadcast ([1] through [3])? If so, <u>what reception methods do you use</u>? For each section, please <u>circle only one number that applies.</u>

Type of broadcast		Watching?	Method of reception*					
(CATA)								
(CATV)	2. Not watching							
[2] Satollito	1. Watching	If "watching," what reception methods do you use?	∫1. Cable TV					
(CATV) 2. Not watching 1. Watching If "watching," what reception methods do you use? 2. Not watching 1. Watching If "watching," what reception methods do you use? 1. Watching If "watching," what reception methods do you use?	7	2. Parabolic antenna

This is the end of the questionnaire.

Please place the completed questionnaire into the enclosed envelope and send it back to us (there is no need to affix a postage stamp). Thank you very much.

We would like to send you a token of our appreciation in exchange of the completed questionnaire. Please check only one of the three items below you would like to receive.

Finally, please confirm again that you have properly filled out the gender and age entries on Page 7.

Book card (¥500)	
Quo card (¥500)	
Stationery coupon (¥500)	

If you did not check any of the items above or checked more than one item, you will receive a book card. Please note that, if the gender and age entries on Page 7 are not properly filled out, the entire questionnaire may become invalid, and as a result, we may not be able to send you any token of appreciation.

<Glossary>

Term	Meaning
*1 personal digital assistant (PDA)	A computer of the size of an appointment organizer or smaller that serves as an electronic secretary managing personal information such as schedules, address lists, and memos and that is capable of remotely accessing email, the Internet, and an intranet via a mobile (cell) phone or a PHS. Does not include notebook computers.
*2 car navigation system	A system which detects the location of an automobile by means of signals sent from a satellite and displays it, together with its direction, on a map on a screen.
*3 car-mounted ETC	A car-mounted terminal capable of communicating with the toll gate of a highway, allowing the driver to go through it without stopping the car (electronic toll collection: ETC).
*4 IP telephony	A voice-telephone service that uses the Internet Protocol (IP) over a part or the whole of a telecommunications network.
*5 ISDN line	Acronym for Integrated Services Digital Network. A generic term for a digital telecommunications network that integrates telephony, facsimile (FAX), telex, data communications, etc.
*6 optical fiber (FTTH line)	A data communications service, based on optical fiber, which has a potential for high-speed transmission. Optical fiber is a cable made of glass that is used as a transmission path in optical telecommunications.
*7 fixed wireless line (FWA)	A wireless communication system in which each subscriber installs an antenna on his/her building through which wireless communication is established with base stations of telecommunications companies.
*8 DSL	A technology that uses existing telephone lines to realize high-speed transmission, thereby enabling high-speed Internet connection. Includes ADSL, VDSL, HDSL, and SDSL.
(for reference) ADSL	Acronym for Asymmetric Digital Subscriber Line. A high-speed telecommunications scheme which realizes transmission speeds of several Mbps to tens of Mbps using existing telephone subscriber lines that connect individual homes to telephone exchange stations. With ADSL, the transmission speeds (upward from, and downward to, the subscriber) are not equal (i.e., asymmetric).
*9 3rd-generation mobile (cell) phone	Includes NTTDoCoMo's FOMA, au's CDMA 1X WIN, and Vodafone's 700 Series or above.
*10 community FM	A small-scale FM radio broadcast covering a part of a municipality that can be received by a car radio as well as an ordinary standalone radio.
*11 blog (web log)	A website composed of day-by-day entries of a diary and others' comments on them, which is continually updated.
*12 electronic bulletin board service (BBS)	A service providing an electronic bulletin board. Once a member writes onto a bulletin board, all the members can view it and addresponses to it.
*13 chat	A service that allows people to participate in conversation simultaneously in text form. All the other members can view whatever one member writes.
*14 social networking service (SNS)	A community site in which members can introduce their friends to each other, thereby expanding their social network. In many cases, one needs to be introduced by an existing member to join the community.
*15 P2P	A setup allowing any individual to share computer files with anyone else via the Internet.
*16 Internet auction	A setup for auction opened over the Internet.
*17 3D virtual space	A space realized by displaying, through projection on a computer screen, the existence of three-dimensional objects and spaces.
*18 net banking	A setup allowing a variety of bank processing and transactions to take place over the Internet.
*19 net trading	Securities trading conducted over the Internet.
*20 mobile banking	A setup allowing a variety of bank processing and transactions to take place by means of various Internet services utilized through a mobile (cell) phone.

MIC Apr. No. 27085	
Apr. valid till March 31, 2008	

Submission deadline: January 25, 2008

Confidential Questionnaire on Use of Telecommunications << for Businesses>>

- Telecommunications Usage Trend Survey, Ministry of Internal Affairs and Communications (MIC) (2007) -
- This survey is approved under the Statistical Reports Coordination Act.
 The information obtained through this questionnaire will not be used for purposes other than creating a statistical report. Accurate and complete information would be appreciated.

(Space for affixing address label)	Department/Section to which the respondent belongs:	
	Name of the respondent	
	Telephone number of the respondent	

(In filling out this questionnaire, please note the following)

- 1. Please indicate the facts as of December 31, 2007, except as otherwise noted.
- Please return this questionnaire to the following office:
 Economic Research Office, General Policy Division, Information and Communications Policy Bureau, Ministry of Public Management, Home Affairs, Posts and Telecommunications
 Central Common Building #2, 2-1-2 Kasumigaseki, Chiyoda-ku, Tokyo 100-8926
- 3. Please direct any questions to the following office:
- 4. The above organization is entrusted by MIC to conduct this survey.
- Q1. About the status of building and using a communication network and the Internet:
- (1) Do you have a computer-based communication network in place? For each question item, please circle only one number that applies.

Company communication network	Current status or future plans	
[1] Intranet*	We have a corporate-wide intranet in place.	
	2. We have a partial intranet in place (depending on offices).	
	3. We have none in place today, but plan to build one.	
	4. We have none in place, and have no plans to build one.	
[2] Inter-company network**	We have a corporate-wide inter-company network in place.	
	2. We have a partial inter-company network in place (depending on offices).	
	3. We have none in place today, but plan to build one.	
	4. We have none in place, and have no plans to build one.	

- * Means a network within the same premises or between one office and another office, other offices, or the headquarters of the same company.
- ** Means a network between one company and another company or other companies.
- (2) For companies giving a positive answer (1 or 2) to (1) above: Which of the following services do you mainly use?

 Wide-area Ethernet¹ IP-VPN² Internet VPN³ 	4. Leased line ⁴ 5. Frame relay ⁵ 6. Cell relay ⁶	7. Telephone line (dialup)8. Other9. Don't know
--	--	---

- 1) Wide-area network services based on a combination of switching hubs, which are used on Ethernet (LAN protocol).
- 2) High-security virtual private network (VPN) services based on a closed IP network provided by a telecommunications carrier.
- 3) Virtual private network (VPN) services based on the Internet, which is a public network.
- 4) Telecommunications services based on monopolized lines directly interconnecting specific places.
- 5) Telecommunications services in which data is transmitted in units of frames of variable lengths.
- 6) Telecommunications services in which data is transmitted in units of cells of a fixed length.

(3) Can you <u>connect to your intranets or an inter-company network from outside your company</u> by using a PC, a mobile (cell) phone, or a personal digital assistant (PDA)? <u>For each question item</u>, please <u>circle only one number that applies</u>.

Device (terminal)	Current status or future plans
[1] PC	1. Yes, we can.
	2. No, we cannot, but we plan to make it possible.
	3. No, we cannot, and we have no plans to make it possible.
[2] Mobile (cell) phone, PDA	1. Yes, we can.
	2. No, we cannot, but we plan to make it possible.
	3. No, we cannot, and we have no plans to make it possible.

(4) Do you <u>use any Internet services (emailing, viewing websites, etc.)</u>? Please <u>circle only one number that applies</u>.

4 Me was the assessment a wide	2. M/s also make uses the area to also be better to use above in the feature
 We use them corporate-wide. 	We do not use them today, but plan to use them in the future.
We use them partially (depending on offices).	4. We do not use them today, and have no plans to use them in the future.

(5) For companies responding to (4) above with 1 or 2:

How do you connect to the Internet?

Please circle all the numbers that apply.

1. Telephone line (dialup) 2. ISDN (on-demand connection)* 3. ISDN (always-on connection)*	4. Cable TV (CATV) line 5. Optical fiber (FTTH line) 6. Fixed wireless line (FWA)	7. DSL 8. Leased line 9. Other	
3. ISDN (always-on connection)*	Fixed wireless line (FWA)	9. Other	

^{*} ISDN based on optical fiber should be categorized as 5. Optical fiber (FTTH line).

(6) On average, about how many people, or what percentage of employees, are assigned to one terminal for connection to your intranet, an inter-company network, or the Internet? Please circle only one number that applies.

1. 1 or less (100% or more)	3. 3 (30 – 49%)	5. 5 or more (less than 25%)
2. 2 (50 – 99%)	4. 4 (25 – 29%)	6. no such terminals provided (0%)

(7) Do you <u>have a website, a business blog, or SNS in place</u>? For each sub-question, please <u>circle all the numbers</u> <u>that apply</u>.

Website:	Business blog:	SNS:
1. We have one in place.	1. We have one in place.	1. We have one in place.
2. We have none in place.	2. We have none in place.	2. We have none in place.

(8) For companies responding to either of the items in (7) above with 1 (yes): What are the purposes or uses? Please circle all the numbers that apply.

Announcement, advertisement, or display of products and events	4. Corporate profiling; recruiting	Electronic announcement and reporting (financial statements, etc.)
2. Periodical dissemination of information	Acceptance of applications or registration	8. Collection of consumers' voices and evaluation data
3. Advice or notification of invoices and usage data	6. Polls or surveys	9. Other

(9) Do you use (view, analyze) consumer-operated blogs or SNS for marketing?

Yes, often. Yes, sometimes.	3. Not very much.4. No.
, , , , , , , , , , , , , , , , , , ,	

- (10) Do you use any "Software as a Service" (SaaS) provided by an Application Service Provider (ASP)? If not, do you plan to use it in the future?
 - 1. Yes, we do, and we find it very useful.
 - 2. Yes, we do, and we find it very useful.
 - 3. Yes, we do, but we don't find it very useful.
 - 4. Yes, we do, but we see negative effects.
- 5. Yes, we do, but we can't tell the degree of effect.
- 6. No, we don't, but we plan to use it in the future.
- -7. No, we don't, and we have no plans to use it.
- 8. We don't know much about SaaS.
- For companies responding to (10) above with "7. No, we don't, and we have no plans to use it": What are the reasons you don't use SaaS? Please circle all the numbers that apply.
 - 1. It is costly to modify the existing system to introduce SaaS.
 - The introduction of SaaS would compromise our compliance system.
 - 3. Increased communication costs
 - 4. We can't customize the application to meet our needs.
- 5. Concern about stability of the network
- 6. Concern about security
- 7. Other
- (11) Do you use, or have you used, 3D virtual space on the Internet (e.g., "Second Life" and "splume") in your business/PR activities for such as opening a branch, promoting sales and hosting events?
 - 1. Yes, we do/have.

- 3. No, we haven't, and we have no plans to do so.
- 2. No, we haven't, but we plan to use it in the future.
- 4. No, we haven't; we are undecided about future use.
- (12) What do you consider problems in using a telecommunications network (intranet, inter-company network, the Internet)? For companies that do not use a telecommunications network today: What do you consider inhibiters? Please circle all the numbers that apply.
 - 1. Difficulty in establishing security measures
 - 2. Increased costs of operation, management, and maintenance
 - 3. Lack of staff for operation, management, and maintenan
 - 4. Difficulty in restoring operation in the event of a failure
 - 5. Concern about protection of intellectual property rights
- 6. Concern about virus infection
- Difficulty in reaping benefits
- 8. Difficulty in quantitatively evaluating benefits
- Concern about reliability of authentication technology
 Concern about reliability of electronic settlement
- 11. Low level of security awareness among employees
- 12. High cost of telecommunication
- 13. Low speed of telecommunication
- 14. Other
- 15. No particular problems
- (13) Do you use <u>any systems or services based on so-called ubiquitous-related tools such as electronic tags and contactless smart cards?</u> For each question item, please <u>circle only one number that applies</u>.

	Ubiquitous-related tool	Current status or future plans
[1]	Electronic tags (RFID tags)	We use them corporate-wide.
	for production management, inventory management, and physical distribution	2. We use them partially (depending on offices).
	management based on identification of parts or	3. We do not use them today, but plan to use them in the future.
	products	4. We do not use them today, and have no plans to use them in the future.
[2]	Contactless smart cards	We use them corporate-wide.
	room access control based on person identification and cashless settlement	2. We use them partially (depending on offices).
	and cashess settlement	3. We do not use them today, but plan to use them in the future.
		4. We do not use them today, and have no plans to use them in the future.
[3]	New-generation devices equipped with network	We use them corporate-wide.
	connection (network-connected cameras, network-connected sensors, etc.)	2. We use them partially (depending on offices).
	security system based on network-connected cameras or network-connected human sensors	3. We do not use them today, but plan to use them in the future.
	or network-connected numan sensors	4. We do not use them today, and have no plans to use them in the future.
[4]	Locating devices (mobile (cell) phones, etc.)	We use them corporate-wide.
	based on GPS	2. We use them partially (depending on offices).
e.g.,	vehicle operation management based on vehicle	3. We do not use them today, but plan to use them in the future.
	location sensing	4. We do not use them today, and have no plans to use them in the future.

- Q2. For all companies: About electronic commerce
- (1) Do you procure or sell anything (parts, materials, products, or services) via the Internet*? Please circle all the numbers that apply.
 - 1. We procure certain items from a company or companies via the Internet.
- 3. We sell certain items to consumers via the Internet.
- 2. We sell certain items to a company or companies via the Internet.
- 4. None of the above.
- In this section, the term "Internet" includes not only the Internet based on a public network but also any network based on the TCP/IP protocol (used by the Internet) (such as a
- (2) For companies responding with 2 or 3 to (1) above: About what percentage of the sales amount for the items put on the Internet actually came from the sales via the Internet (companies and consumers) in fiscal **2006**?

about

For companies responding with 2 or 3 to (1) above: Why do you sell items via the Internet? (3)Please circle all the numbers that apply.

- 1. It is efficient because there is no need to have a physical shop.
- 2. We can get new customers from a wide range.
- 3. We can reduce the amount of indirect work for handling transactions.
- 4. We can reduce the costs of physical distribution.
- 5. We can reduce inventory amounts.

- 6. We can accurately grasp the attributes of individual consumers.
- 7. We can place effective advertisements.
- 8. We can handle items that do not sell well.
- 9. Other.
- (4) For all companies: What do you consider problems in using electronic commerce? For companies that do not use electronic commerce today: What do you consider inhibiters? Please circle all the numbers that apply.
 - 1. Construction of such a system requires expert knowledge.
 - 2. Telecommunications protocols, etc. vary from industry to industry.
 - 3. Formats of forms and data vary from industry to industry.
 - 4 Security measures are not sufficiently robust
 - 5. Large investment is required for equipment.
 - 6. Running costs of such an information system are high.
 - 7. Legal and social mechanisms for regulation of electronic commerce are not in place yet.
 - 8. Suppliers/customers are not adequately computerized.

- 9. Electronic commerce is not compatible with traditional business practice.
- 10. Telecommunications speeds are low.
- 11. Telecommunications charges are high.
- 12. There are no appropriate settlement methods. 13. There is no need to introduce electronic commerce
- 14. Other.
- 15. We don't see any problems.
- 16. Don't know.
- (5) For all companies: Do you advertise on the Internet? Please circle all the numbers (types of advertisements) that apply.

If not, then please circle "10. We don't."

(Web ad)

- 1. Text ad1
- 4. Sponsorship ad (e.g., tie-up with editing)
- (Mail ad)
- 7. Mail magazine
- (Other)

- 2. Banner ad2
- 5. Linked to a search engine
- 3. Rich media ad3
- 6. Linked to content
- 8. Direct mailing (DM) (e.g., targeted mailing)
- 9. Other Internet ad 10. We don't.
- 1) Ad using text only. 2) Usually rectangular, with still photos/images 3) Ad using voice and images, e.g., with a display moved around by the movement of the mouse, or with a streaming-based motion picture
- (6) For companies that advertise on the Internet: Why do you advertise on the Internet? Please circle all the numbers that apply.
 - 1. It is easier to comprehend the effects of advertisements.
- 3. We can advertise by addressing individual consumers' needs.

2. It is cheaper.

4. We can address a larger audience.

Q3. For all companies: About teleworking:

Do you use a teleworking* scheme? Please circle only one number that applies.

	activity, etc.), and <u>eatomic one</u>		e on the premises. It may take a variety of forms, depending on ing work via a mobile information terminal while on the road on a an office other than your company's offices).
	npanies choosing 1 about what percentage of em		king mode? Please <u>circle only one number that applies</u>
1. Les	ss than 5%	3. 10% - 30%	5. 50% - 80%
2. 5%	5 - 10%	4. 30% - 50%	6. 80% or more
→ [2] What	are the purposes of intro	oducing teleworking?	Please <u>circle all the numbers that apply</u> .
	are the purposes of intro	-	Please circle all the numbers that apply. 6. To improve customer satisfaction
1. To im		outine work	
1. To im 2. To im	nprove efficiency (productivity) of ro	outine work res the creation of added value	6. To improve customer satisfaction 7. To secure employment of capable people 8. To provide better working environments to employees having underprivile working conditions (physically impaired persons, elderly persons, women
1. To im 2. To im 3. To pr	nprove efficiency (productivity) of ro	outine work res the creation of added value	6. To improve customer satisfaction 7. To secure employment of capable people 8. To provide better working environments to employees having underprivile
1. To im 2. To im 3. To pr 4. To re	nprove efficiency (productivity) of ron nprove creativity in work that require rovide employees with more elbow	outine work res the creation of added value	6. To improve customer satisfaction 7. To secure employment of capable people 8. To provide better working environments to employees having underprivil working conditions (physically impaired persons, elderly persons, womer

- Q4. For all companies: About what you do for employees' ICT* (IT) training:
 - $^{\star}\,$ ICT is an abbreviation for information and communications technology and is synonymous with IT.

Which of the following do you do?

Please circle all the numbers that apply.

- 1. Offer in-house ICT (IT) related training programs 5. Give privileges in working time to employees engaged in autonomous study in ICT (IT) 6. Give employees ICT (IT) related skills tests 2. Send employees to external ICT (IT) related training programs 3. Subsidize employees' autonomous study in ICT (IT) 7. Offer other kinds of training 4. Give awards to employees obtaining ICT (IT) related qualifications 8. Do nothing
- Q5. For companies using a telecommunications network (intranet, inter-company network, or the Internet): About security measures:
- (1) During the past 12 months, have you experienced any of the following security-threatening incidents, numbered 1 through 8, while using the telecommunications network? Please circle all the numbers that apply. If you have not experienced any of them, please circle 9.
 - 1. Have encountered a computer virus, but have not been infected 6. Unauthorized alteration of a website 2. Have encountered a computer virus, and have been infected at least once 7. Deliberate or inadvertent leakage of information 3. Unauthorized access* 8. Other problems 4. Used as a relay or a springboard for spam mail 9. None 5. DoS attack** Any incident in which somebody or some program breaks into the office's computer system without permission to cause some anomaly
 - or abuse its resources.
 - ** An attack that renders a system unable to provide its services by, for example, sending an enormous quantity of email to the mail server and thereby causing a system down.
- If you have circled "2. Have encountered a computer virus, and have been infected at least once" in (1) above, how many times have you been infected with a virus during the past 12 months? Please circle only one number that applies.
 - 1. Once 3. Three times 5. Five times or more 2. Twice 4. Four times

(3) What measures for ensuring data security or combating viruses on telecommunications networks are you taking?

Please circle all the numbers* that apply.

Establishing a security policy	11. Recording access logs
2. Conducting security audits	12. Introducing an authentication technology
3. Outsourcing security management	for checking the user's identification
4. Training employees	13. Using a cipher (cryptographic) system for data or the network
5. Installing an antivirus program on terminals such as PCs (OS, software, etc.)	14. Monitoring the network
6. Installing an antivirus program on the servers	15. Installing a firewall
7. Applying security patches to the OS	16. Using a proxy server
8. Building a virus wall when making an external connection	17. Installing an intrusion detection system (IDS)**
9. Creating a manual for combating viruses	18. Other security measure
10. Controlling access by ID and password	19. Don't know
	20 None

^{*} Regardless of whether "3. Outsourcing security management" applies or not, please circle all the numbers that apply, even partially, directly or indirectly by utilizing an external service or through outsourcing.

(4) Which of the following measures do you take regarding protection of personal information? Please circle all the numbers that apply.

Obtain privacy mark certification	6. Provide training
2. Establish a privacy policy	7. Narrow the supplier selection criteria (checking for privacy mark certification)
3. Appoint an officer for protection of personal information	8. Other measures
4. Narrow down personal information to be kept	9. No particular measures
5. Reconstruct the system or restructure the organization	10. Don't know

Q6. About the incorporation of ICT (IT) into business management and its effects:

- (1) ICT investment
 - [1] During the past three years, have you invested in your telecommunications network, ubiquitous-related tools, or Internet-based functions/services (such as blog and SNS)? Please <u>circle either number that applies</u>.

	—1. Yes	2. No
_		

For companies responding to [1] with "1. Yes": What are the estimated effects of the ICT investment made during the past three years? For each question item, please circle only one number that applies.

	Ef	ffect observe	ed			
	High	egree of effe Medium	Low	No effect	Negative effect	Don't know
Development of new products or services	1	2	3	4	5	6
Widening the range/scope of products or services	1	2	3	4	5	6
Expanding the market [share]	1	2	3	4	5	6
Improvement in quality of products or services	1	2	3	4	5	6
Increase in variety of production or sales methods	1	2	3	4	5	6
Expansion of production capacity	1	2	3	4	5	6
Reduction in labor cost per unit production	1	2	3	4	5	6
Reduction in procurement cost per unit production	1	2	3	4	5	6

(2) Are you using networks outside of your company* in development of products or services? Please <u>circle only one number that applies</u>.

1. Using them extensively	2. Using them to some extent	3. Not using them so much	4. Not using them at all

Includes not only networks with other companies outside your company group but also networks with other companies within your compar group and networks with individuals and research institutes.

^{**} Including an intrusion prevention system (IPS).

(3)	Do you have a Chief Information Officer (CIO)*? Pleas	e <u>circle only one number (</u>	that applies.				
	Yes, we have a full-time CIO. We have a part-time CIO devoting the majority of 3. We have a part-time CIO devoting part of time to 4. We don't have one today, but plan to have one. We don't have one today, and have no plans to h	ICT (IT) related work.
