"Accounts reported" reflects the total number of unique accounts that users reported for potentially violating the Twitter Rules.

"Accounts actioned" reflects the number of unique accounts that were suspended or had some content removed for violating the Twitter Rules.

"Accounts suspended" reflects the number of unique accounts that were suspended for violating the Twitter Rules.

"Content removed" reflects the number of unique pieces of content (such as Tweets or an account's profile image, banner, or bio) that Twitter required account owners to remove for violating the Twitter Rules.

Note:

1. Countries are assigned by inferring an account's country based on the following data from a user; sign-up location, user selected location and IP addresses. While every effort is made to present accurate data, we cannot guarantee that the assigned country reflects the true location of a user at a specific instance when an enforcement action occurred.
2. For definitions of Twitter Rules, see <https://transparency.twitter.com/en/reports/rules-enforcement.html#2021-jan-jun>
3. There might be scenarios where the same account can be reported or can be actioned for more than one policy. In that case, the account will be counted against all policies that it was reported or actioned for.
4. Data is as of January 2022.
