STATISTICS

Status of Numbers of Subscribers to Telecommunications Services (As of end of June 2007)

As mandated by the Rules for Reporting on Telecommunications Business (MPT Ordinance No. 46 of 1988), MIC has compiled the numbers of contracts for fixed-line telecommunications and mobile telecommunications that were reported by telecommunications carriers as of the end of June 2007.

An overview of the result is provided in the following.

1. Subscription telephones and ISDN

The total number of subscription contracts as of the end of June 2007 for subscription telephones and ISDN was 54.217 million, a 5.6% year-on-year decrease, and this declining trend continues.

2. Number of IP phone users

The number of IP phone users as of the end of June 2007 is 15.276 million. This is a 26.3% increase

from the same period of last year, and this increasing trend continues. The increase in the users of IP phones with the 0AB-J number structure (10 digits, starting with a zero) is especially remarkable, a 145.0% year-on-year increase.

3. Mobile phones and PHS

The number of contracts for mobile phones and PHS as of the end of June 2007 totaled 103.078 million. This number represents a 5.6% year-on-year increase, and this steady increasing trend continues.

(Breakdown)	Dry copper ISDN	—	—	23 (-)	149 (547.8%)	351 (135.6%)	395 (117.0%)
	Total	61,325 (-1.0%)	60,772 (-0.9%)	60,219 (-0.9%)	59,607 (-1.0%)	58,053 (-2.6%)	55,165 (-5.0%)

* The figures for the end of fiscal year 2006 have been corrected as a result of the figures being checked.

Note 1: Dry copper telephones: NTT East and West telephone service using metal circuits

Note 2: The subscription figures shown here do not include the number of subscribers to My Line.

Note 3: Parentheses indicate rate of growth or decline year-on-year.

Number of IP phone users

The number of IP phone users as of the end of June 2007 is 15.276 million, an increase of 5.5% over the figure at the end of March 2007. The increase over the same period last year was of 26.3%, and this upward trend continues.

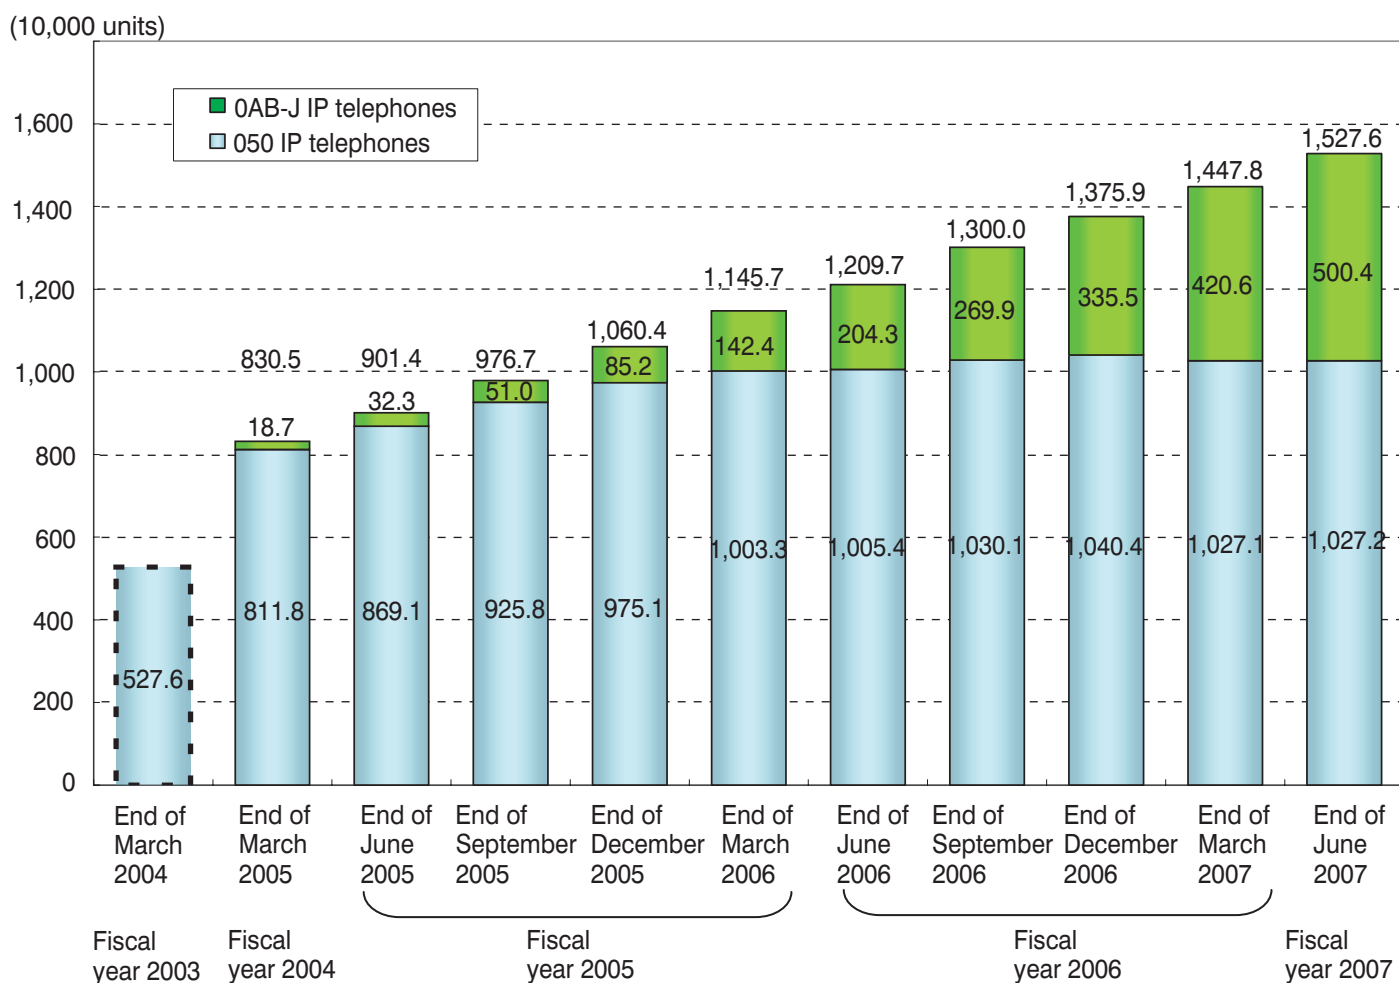

Specially notable in this set of figures was the rate of increase in

the number of OAB-J IP users, which was up 19.0% over the end of March 2007, and 145% over the same period last year.

Note1: This reflects the total number of 050 and OAB-J telephone numbers utilized by final users, and is not a rigorously accurate number of subscriptions.

Note 2: Also, with regard to the portion for fiscal year 2003, a survey was conducted based on the Detailed Items for Implementation of Competition Review in the Telecommunications Business Field FY2004.

Note 3: The figures for the end of fiscal year 2006 have been corrected as a result of the figures being checked.

Mobile phones and PHS

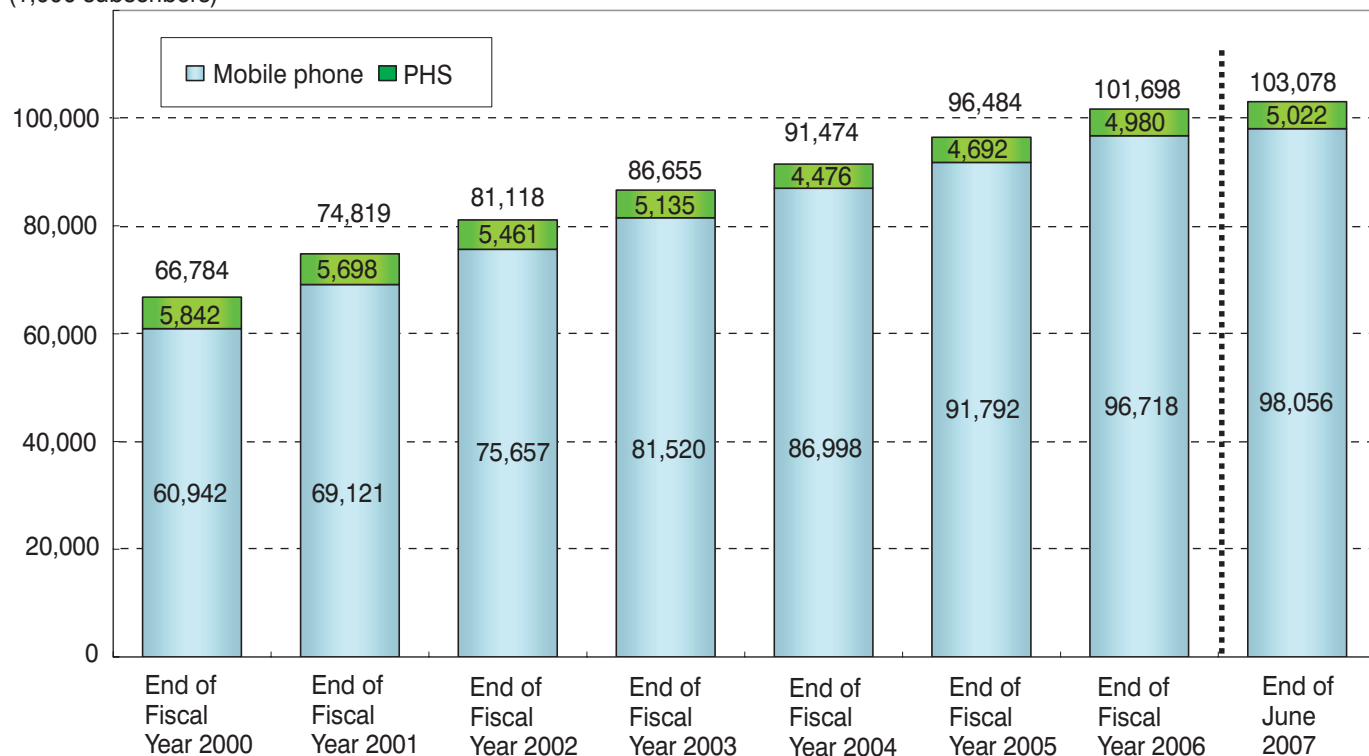

The number of contracts for mobile phones and PHS as of the end of June 2007 totaled 103.078 million. This number represents a 5.6% increase year on year, and a

penetration rate of 80.7%* of the population.

The subscription contract numbers per category were 98.056 million for mobile phones and 5.022 million for PHS.

In addition, of the subscription contracts for mobile phones, the proportion of contracts for 3rd generation mobile phones stood at 74.691 million, accounting for 76.2% of the total.
