  1. Overview of the Act on Assurance of Sound Financial Status of Local Governments .......................................................... 33
  2. Status of the Ratios for Measuring Financial Soundness and Financial Shortfall Ratio .......................................................... 34

1 “Net totals of the revenues and expenditures” are the ordinary net account totals of 3,071 organizations (47 prefectures, 1,718 municipalities, 23 special wards, 1,217 partial administrative associations and 113 wide-area local public bodies).
2 Figures for each item that are less than the given unit are rounded off. Therefore, they do not necessarily add up exactly to the total.
3 In FY2011, the revenues and expenditures of ordinary accounts were divided into the regular portion (Overall settlement figures less the Great East Japan Earthquake portion) and the Great East Japan Earthquake portion (Covering the revenues and expenditures related to recovery and reconstruction work and nationwide disaster prevention work).
Prefectures and municipalities (cities, towns, and villages) are the central actors in various areas of public services, including school education, public welfare and health, police and fire services, and public works such as roads and sewage systems, thereby fulfilling a major role in the lives of the citizens of the nation. This brochure describes the status of local public finance (which comprises collectively the finances of individual local governments), the state of settlements for FY2015, and the initiatives of local governments towards sound public finances (mainly the status of the ratios for measuring their financial soundness), with particular attention given to ordinary accounts (Public enterprises, such as water supply, transportation, and hospitals are described in the section on Local Public Enterprises).

Classification of the Accounts of Local Governments Applied in the Settlement Account Statistics

The accounts of local governments are divided into the general accounts and the special accounts, but classification of these accounts varies between local governments. Therefore, the accounts are classified in a standardized manner into ordinary accounts, which cover the general administrative sector, and other accounts (public business accounts). This makes it possible to clarify the financial condition of local governments as a whole and to make a statistical comparison between local governments.

Local Government Accounts

How large is local public finance?

The ratio of expenditure by local governments in gross domestic product (nominal) is 11.0%, about 2.7 times that of the central government.
How large is local government expenditure in total public expenditure?

Looking at the breakdown of public expenditure classified by final expenditure entity, local government expenditure accounts for 42.8% of Government final consumption expenditure, and 49.4% of Public gross capital formation. As a final expenditure entity, local governments above the central government and play a major role for the national economy.
In which areas is the share of local expenditures high?

The below graph shows central and local governments’ expenditures by purpose as a share of net total expenditure, classified by final expenditure entity. The share of local governments’ expenditures is higher in areas that are deeply related to daily life, such as public welfare, sanitation, and school education.

1 **Revenues**

**¥101,917.5 billion** (down ¥166.0 billion, 0.2% year on year)

Regular portion: **¥97,511.0 billion** (up ¥20.6 billion, 0.0% year on year)

Great East Japan Earthquake portion: **¥4,406.5 billion** (down ¥186.6 billion, 4.1% year on year)

The increase of revenues in the regular portion resulted from an increase in local taxes. The decrease in revenues in the Great East Japan Earthquake portion resulted from a decrease in National treasury disbursements, etc.

2 **Expenditures**

**¥98,405.2 billion** (down ¥117.6 billion, 0.1% year on year)

Regular portion: **¥94,570.8 billion** (up ¥59.6 billion, 0.1% year on year)

Great East Japan Earthquake portion: **¥3,833.4 billion** (down ¥177.2 billion, 4.4% year on year)

The increase of expenditures in the regular portion resulted from an increase in Social assistance expenses, and subsidies, etc. The decrease in expenditures in the Great East Japan Earthquake portion resulted from a decrease in reserves, etc.

3 **Revenue and Expenditure Settlement**

The real balance showed a surplus of ¥1,962.4 billion.

</tr>
<tr>
<td>Real single year balance</td>
<td>¥501.8 billion</td>
<td>¥231.9 billion</td>
</tr>
</tbody>
</table>

**Notes:**
- Real balance refers to the amount calculated by subtracting the revenue resources that should be carried over to the next fiscal year from the income expenditure balance.
- Single year balance refers to the amount calculated by subtracting the real balance of the previous fiscal year from the real balance of the relevant fiscal year.
- Real single year balance refers to the amount calculated by adding reserves and advanced redemption of local loans for the public finance adjustment fund to the single year balance and subtracting public finance adjustment fund reversals.
**4 Trend in Scale of Account Settlement**

Both revenues and expenditures of the regular portion have increased for three consecutive years.

**5 Major Financial Indices**

Ordinary balance ratio declined 0.4 percentage points year on year, to 91.7%.

Real debt service ratio declined 0.5 percentage points, to 9.9%.

<table>

</tr>
</tbody>
</table>

Note: Outstanding public enterprise bonds (borne by ordinary accounts) are the Public enterprise bonds to be redeemed by public corporations from funds in the Ordinary accounts (amount based on surveys on local public finance).
What are the revenue sources for local governments’ activities?

### Revenue Breakdown

The revenue of local governments consists mainly of Local taxes, Local allocation tax, National treasury disbursements, and Local bonds, in order of share size. Among them, revenue resources which can be spent for any purpose, such as Local taxes and Local allocation tax, are called General revenue resources. It is important for local governments to ensure sufficient General revenue resources in order to handle various administrative needs properly. In FY2015, General revenue resources accounted for 58.2%.

#### Composition of Revenues (FY2015 settlement)

- **General revenue resources**
  - Local taxes: ¥39,098.6 billion (38.4%)
  - Local transfer tax: ¥2,679.2 billion (2.6%)
  - Special local grants: ¥118.9 billion (0.1%)
  - Local allocation tax: ¥17,390.6 billion (17.1%)

- **Other revenue resources**
  - National treasury disbursements: ¥9,574.4 billion (16.3%)
  - Local bonds: ¥5,187.1 billion (8.8%)

- **Prefectures total**
  - Local taxes: ¥3,945.2 billion (6.7%)
  - Local bonds: ¥4,433.7 billion (4.4%)
  - Local taxes: ¥20,142.6 billion (38.7%)
  - Local transfer tax: ¥2,257.8 billion (4.3%)

- **Municipalities total**
  - Local bonds: ¥5,528.1 billion (10.6%)
  - National treasury disbursements: ¥8,927.3 billion (17.2%)

- **Net total**
  - General revenue resources: ¥101,917.5 billion
  - Other revenue resources: ¥15,282.2 billion (15.0%)

---

Local transfer tax: Collected as a national tax and transferred to local governments. Includes Local gasoline transfer tax, etc.

Special local grants: Special local grants in FY2015 include special grants for covering decreases in local tax revenues issued to cover decreases in revenues of local governments in association with the implementation of special tax deductions for housing loans in the individual inhabitant tax.

Local allocation tax: An intrinsic revenue source of local governments in order to adjust imbalances in tax revenue among local governments and to guarantee revenue sources so that all the local governments across the country can provide a consistent level of public services. (See page.13, “6. Local Allocation Tax.”)

National treasury disbursements: A collective term for the national obligatory share, commissioning expenses, incentives for specific policies, or financial assistance, disbursed from the central government to local governments.

Local bonds: The debts of local governments to be repaid over a period of time in excess of one fiscal year for which redemption continues for more than one fiscal year. Bonds for the extraordinary financial measures: Local bonds issued as an exception to Article 5 of the Local Finance Law to address shortages of General revenue resources of local governments. Proceeds from these bonds can be used for expenses other than investment expenses.

Note: “National treasury disbursements” includes “special grants to measures for traffic safety” and “grants to cities, towns and villages where national institutions are located.”
### Revenues in Regular Portion and Great East Japan Earthquake Portion

#### Regular Portion

- **General revenue resources** ¥97,511.0 billion (60.0%)
- **Other revenue resources** ¥14,668.7 billion (15.1%)
  - **Local bonds** ¥10,401.0 billion (10.7%)

#### Great East Japan Earthquake Portion

- **General revenue resources** ¥4,406.5 billion (16.7%)
  - **Other revenue resources** ¥1,991.3 billion (45.2%)
    - **General revenue resources** ¥735.5 billion (16.7%)
      - Of this amount, earthquake disaster reconstruction allocation tax was ¥588.9 billion (13.4%)
    - **Local bonds** ¥287.0 billion (6.5%)

### Prefectures

- **General revenue resources** ¥30,888.8 billion (62.4%)
  - **Local bonds** ¥5,470.4 billion (11.1%)
  - **National treasury disbursements** ¥5,419.0 billion (10.9%)
    - Of this amount, ordinary construction expenses were ¥1,355.8 billion (14.9%)
    - Of this amount, recovery and reconstruction expenses were ¥39.4 billion (0.1%)
    - Of this amount, grants to measures for earthquake disaster reconstruction were ¥305.5 billion (6.9%)

### Municipalities

- **General revenue resources** ¥56,439.1 billion (54.4%)
  - **Local bonds** ¥4,957.1 billion (8.8%)
  - **Prefectural disbursements** ¥3,550.4 billion (6.3%)
  - **National treasury disbursements** ¥8,470.5 billion (15.0%)
    - Of this amount, ordinary construction expenses were ¥440.0 billion (6.8%)
    - Of this amount, recovery and reconstruction expenses were ¥40.7 billion (0.1%)

### National Treasury Disbursements

- **Regular portion** ¥13,889.5 billion (14.2%)
  - Of this amount, ordinary construction expenses were ¥1,384.2 billion (1.4%)
  - Of this amount, recovery and reconstruction expenses were ¥139.4 billion (0.1%)
  - Of this amount, grants to measures for earthquake disaster reconstruction were ¥38.1 billion (1.5%)

#### Great East Japan Earthquake Portion

- **National treasury disbursements** ¥880.7 billion (34.1%)
  - Of this amount, ordinary construction expenses were ¥51.8 billion (2.0%)
  - Of this amount, recovery and reconstruction expenses were ¥272.9 billion (10.6%)
  - Of this amount, grants to measures for earthquake disaster reconstruction were ¥38.1 billion (1.5%)
Revenues

3 Revenue Trends

The ratio of general revenue resources turned downward in FY2011, but have been rising since FY2014.

Note: “National treasury disbursements” includes “special grants to measures for traffic safety” and “grants to cities, towns and villages where national institutions are located.”
4 Ratio of National Taxes and Local Taxes

The total of taxes collected as national and local taxes amounted to ¥99,068.0 billion. Of this amount, national and local taxes accounted for 60.5% and 39.5% respectively.

5 Local Taxes

Local taxes consist of prefectural taxes and municipal taxes.

Composition of Revenue from Prefectural Taxes (FY2015 settlement)

- Automobile acquisition tax: ¥137.3 billion (0.8%)
- Prefectural tobacco tax: ¥153.0 billion (0.8%)
- Real estate acquisition tax: ¥376.8 billion (2.1%)
- Light oil delivery tax: ¥924.5 billion (5.1%)
- Automobile tax: ¥1,542.8 billion (8.6%)
- Local consumption tax: ¥4,974.2 billion (27.6%)

Composition of Revenue from Municipal Taxes (FY2015 settlement)

- Other taxes: ¥592.8 billion (2.8%)
- Municipal tobacco tax: ¥936.1 billion (4.4%)
- City planning tax: ¥1,244.4 billion (5.9%)
- Fixed asset tax: ¥8,755.0 billion (41.5%)

Note: Municipal taxes collected by the Tokyo Metropolitan Government are included in municipal tax revenue figures, but not included in prefectural tax revenue figures.
Prefectural tax revenues had been on a downward trend since FY2008, but have increased for four consecutive years since they turned upward in FY2012.

</table>
In order for local governments to provide public services in response to local needs on their own responsibility and at their own discretion, it is necessary to build a less imbalanced and stable local tax system. Comparing local tax revenue amounts, with the national average set at 100, Tokyo, the highest, was approximately 2.5 times the amount for Okinawa Prefecture, which was the lowest.

Notes:
1. "Max/Min" indicates the value obtained by dividing the maximum value of per-capita tax revenue for each prefecture by the minimum value.
2. Local tax revenue amounts exclude overassessment and discretionary taxes, etc.
3. Individual inhabitant tax revenue is the total of the prefectural individual inhabitant tax (on a per-capita basis and on an income basis) and the municipal individual inhabitant tax (on a per-capita basis and on an income basis), and excludes overassessment.
4. Revenue from the two corporate taxes is the total of the corporate prefectural inhabitant tax, the corporate municipal inhabitant tax, and the corporate business tax (excluding local corporation special transfer tax) and excludes overassessment, etc.
5. Fixed asset tax revenues include prefectural amounts, and exclude overassessment.
6. Calculations were made in accordance with the basic resident register population as of January 1, 2016.
Local Allocation Tax

From the perspective of local autonomy, it would be the ideal for each local government to ensure the revenue sources necessary for their activities through Local tax revenue collected from their residents. However, there are regional imbalances in tax sources, and many local governments are unable to acquire the necessary tax revenue. Accordingly, the central government collects revenue resources that would essentially be attributable to Local tax revenue and reallocates them as Local allocation tax to local governments that have weaker financial capabilities.

1. Determining the total amount of Local allocation tax

The total amount of the Local allocation tax is determined in accordance with estimates of standard revenue and expenditures in local public finance as a whole, based on a fixed percentage for national taxes (in FY2015 33.1% for Income tax and Corporate tax, 50% for Liquor tax, 22.3% for Consumption tax, and the total amount of Local corporate tax).

The total amount of the Local allocation tax in FY2015 was ¥17,390.6 billion, down 0.2% year on year.

2. How regular Local allocation taxes are calculated for each local government

The Regular local allocation tax for each local government is calculated through the following mechanism.

$$\text{Standard financial requirements} - \text{Standard financial revenues} \times \frac{75}{100} + \text{Local transfer tax, etc.}$$

Note: 1. Standard financial requirements are figured out based on the rational and appropriate service standards for each local government. For this reason, the local share of the services, such as compulsory education, benefits for livelihood protection, and public works which are subject to national obligatory share, is mandatorily included. Beginning in FY2001, part of the Standard financial requirements is being transferred to special local bonds (bond for temporary substitution for local allocation tax) as an exception to Article 5 of the Local Finance Law.

2. Normal local tax revenue does not include Non-act-based tax or over-taxation that sets tax rates above the standard tax rate stipulated in the Local Tax Act.

3. Function of the Local allocation tax

The function of the Local allocation tax is to adjust imbalances in revenue resources between local governments and to ensure their financial capacity to provide standard public services and basic infrastructure to residents across the country.

The adjustment of revenue resources through Local allocation tax makes the ratios of General revenue resources to the total revenues between local governments practically flat regardless of the size of population.
What are expenses spent on?

Expenses Classified by Purpose

Classifying the expenses by purpose demonstrates that much of public money is appropriated for Public welfare expenses, Education expenses, and Debt service. In prefectures, Education expenses, Public welfare expenses, and Debt service have the highest shares in that order. In municipalities, Public welfare expenses, General administrative expenses, and Civil engineering work expenses account for the largest amounts in that order.

### Composition of Expenditure Classified by Purpose (FY2015 settlement)

- **Public welfare expenses**: ¥25,254.8 billion (25.7%)
- **Educational expenses**: ¥16,795.5 billion (17.1%)
- **Debt service**: ¥12,929.6 billion (13.1%)
- **Other expenses**: ¥7,073.2 billion (7.1%)
- **Agriculture, forestry and fishery expenses**: ¥3,218.2 billion (3.3%)
- **Commerce and industry expenses**: ¥5,161.1 billion (5.6%)
- **Sanitation expenses**: ¥6,301.8 billion (6.4%)
- **General administrative expenses**: ¥9,608.8 billion (9.8%)
- **Civil engineering work expenses**: ¥11,707.2 billion (11.9%)

### Prefectures total ¥50,731.2 billion

- **Other expenses**: ¥8,375.2 billion (16.6%)
- **Agriculture, forestry and fishery expenses**: ¥2,277.0 billion (4.5%)
- **Commerce and industry expenses**: ¥3,648.4 billion (7.2%)
- **Sanitation expenses**: ¥1,772.2 billion (3.5%)
- **General administrative expenses**: ¥3,117.7 billion (6.1%)

### Municipalities total ¥56,535.1 billion

- **Other expenses**: ¥2,888.9 billion (5.1%)
- **Agriculture, forestry and fishery expenses**: ¥1,407.9 billion (2.5%)
- **Commerce and industry expenses**: ¥5,516.1 billion (9.8%)
- **Sanitation expenses**: ¥4,692.3 billion (8.3%)
- **General administrative expenses**: ¥9,608.8 billion (17.5%)

### General administrative expenses: Expenses for general administration, financial management, accounting administration, etc.
- Educational expenses: Expenses for the construction and operation of welfare facilities for children, the elderly, the mentally and physically disabled, etc., and for the implementation of public assistance, etc.
- Civil engineering work expenses: Expenses for school education, social education, etc.
- Debt service: Expenses for the payment of principal, interest, etc., on debts.
Expenditures in Regular Portion and Great East Japan Earthquake Portion (Expenses Classified by Purpose)

### Net total

- **Other expenses** ¥6,214.9 billion (6.6%)
- **Disaster recovery expenses** ¥262.3 billion (0.3%)
- **Agriculture, forestry and fishery expenses** ¥1,077.4 billion (3.1%)
- **Sanitation expenses** ¥6,169.6 billion (6.5%)
- **Commerce and industry expenses** ¥1,188.7 billion (5.5%)
- **General administrative expenses** ¥9,031.0 billion (9.5%)

#### Regular portion

- **Public welfare expenses** ¥24,641.1 billion (26.1%)
  - Of this amount, disaster relief expenses were ¥20.3 billion (0.0%)
- **Educational expenses** ¥16,437.4 billion (17.4%)
- **Debt service** ¥12,908.7 billion (13.8%)
- **Civil engineering work expenses** ¥10,759.7 billion (11.4%)

#### Great East Japan Earthquake portion

- **Other expenses** ¥128.6 billion (3.5%)
  - Of this amount, disaster relief expenses were ¥590.3 billion (15.4%)
- **Agriculture, forestry and fishery expenses** ¥249.8 billion (6.3%)
- **Sanitation expenses** ¥12.2 billion (3.3%)
- **Commerce and industry expenses** ¥347.4 billion (9.1%)
- **General administrative expenses** ¥577.8 billion (15.1%)

### Prefectures

- **Other expenses** ¥7,809.8 billion (16.2%)
- **Disaster recovery expenses** ¥169.4 billion (0.3%)
- **Agriculture, forestry and fishery expenses** ¥1,130.2 billion (4.4%)
- **Sanitation expenses** ¥1,668.2 billion (6.5%)
- **Commerce and industry expenses** ¥3,198.6 billion (9.6%)
- **General administrative expenses** ¥2,914.1 billion (6.0%)

#### Regular portion

- **Public welfare expenses** ¥10,973.9 billion (22.9%)
  - Of this amount, disaster relief expenses were ¥7.6 billion (0.0%)
- **Educational expenses** ¥328.5 billion (14.6%)
- **Debt service** ¥203.7 billion (9.1%)
- **Civil engineering work expenses** ¥4,855.3 billion (10.0%)

#### Great East Japan Earthquake portion

- **Other expenses** ¥847.7 billion (3.8%)
  - Of this amount, disaster relief expenses were ¥128.6 billion (36.6%)
- **Agriculture, forestry and fishery expenses** ¥146.8 billion (6.5%)
- **Sanitation expenses** ¥20.9 billion (4.6%)
- **Commerce and industry expenses** ¥321.2 billion (14.3%)
- **General administrative expenses** ¥577.8 billion (15.1%)

### Municipalities

- **Other expenses** ¥2,549.0 billion (4.8%)
- **Disaster recovery expenses** ¥129.8 billion (0.2%)
- **Agriculture, forestry and fishery expenses** ¥1,286.2 billion (2.4%)
- **Sanitation expenses** ¥4,643.0 billion (8.5%)
- **Commerce and industry expenses** ¥1,307.0 billion (3.5%)
- **General administrative expenses** ¥6,671.1 billion (12.2%)

#### Regular portion

- **Public welfare expenses** ¥19,938.0 billion (36.6%)
  - Of this amount, disaster relief expenses were ¥121.7 billion (0.8%)
- **Educational expenses** ¥5,552.9 billion (10.2%)
- **Debt service** ¥5,744.0 billion (10.5%)
- **Civil engineering work expenses** ¥6,074.4 billion (11.1%)

#### Great East Japan Earthquake portion

- **Other expenses** ¥22.5 billion (0.1%)
  - Of this amount, disaster relief expenses were ¥383.6 billion (18.8%)
- **Agriculture, forestry and fishery expenses** ¥121.7 billion (6.0%)
- **Sanitation expenses** ¥49.4 billion (2.4%)
- **Commerce and industry expenses** ¥22.5 billion (1.1%)
- **General administrative expenses** ¥588.6 billion (28.9%)

Of this amount, disaster relief expenses were ¥128.6 billion (36.6%).
### Breakdown of Expenses Classified by Purpose

While Civil engineering work expenses and Agriculture, forestry and fishery expenses were on a downward trend, Public welfare expenses significantly rose.

White Paper on Local Public Finance, 2017
Ordinary construction work expenses decreased year on year due mainly to a decrease in Subsidized public works. In addition, Civil Engineering Work Expenses account for the largest ratio in the breakdown of Ordinary construction work expenses by purpose.
Flexibility of the Financial Structure

How financially capable are local governments to respond to local demands?

It is necessary that local governments have financial resources for not only the Mandatory expenses but also for the expenses for projects to properly address challenges caused by changes in the social economy and administrative needs so that they can adequately meet the needs of their residents. The extent to which the resources for such purposes are secured is called the “flexibility of the financial structure.”

1 Ordinary Balance Ratio

The FY2015 Ordinary balance ratio declined 0.4 percentage points year-on-year to 91.7%, staying above 90% for the twelfth consecutive year.

Trends in the Ordinary Balance Ratio

Breakdown of the Ordinary Balance Ratio (Total)
Real Debt Service Ratio and Debt Service Payment Ratio

Close attention should be paid to the trend of the Debt service, which is the expense required to repay the principal and interest of the debts of local governments and has an especially negative impact on financial flexibility. The Real debt service ratio and the Debt service payment ratio are indices that measure the extent of the burden of the Debt service.

**Trends in the Real Debt Service Ratio**

*Real debt service ratio:* The real debt service ratio is an index of the size of the redemption amount of debts (local bonds) and similar expenditure, and represents the cash-flow level.

**Trends in the Debt Service Payment Ratio**

*Debt service payment ratio:* The Debt service payment ratio indicates the ratio of general revenue resources allocated for debt service (amount of repayment of the principal and interest on local bonds) in the total amount of General revenue resources. This index is used to measure the flexibility of the financial structure by assessing the degree to which Debt service restricts the freedom of use of General revenue resources.
What is the status of debt in local public finance?

1. Trends in Local Bonds and Debt Burden

Real future financial burden by Local bonds and Debt burden amounted to ¥137,602.2 billion at the end of FY2015, down 0.7% year on year.

2. Trends in Outstanding Borrowing Borne by the Ordinary Accounts

Outstanding local public finance borrowing, which includes borrowing in the special account for Local allocation tax and Transfer tax for addressing revenue resource shortages, as well as the redemption of Public enterprise bonds borne by the Ordinary accounts, remains at a high level, amounting to ¥199 trillion at the end of FY2015.
What is the status of local public enterprises?

1. Presence of Local Public Enterprises

Local public enterprises play a major role in improving the standard of living of residents.

- **Water-supply business (including small-scale water supply business)**
  - Current water-supply population: 124.46 million (99.5%)
  - Out of 125.04 million

- **Sewerage business**
  - Sewage disposal population: 103.60 million (90.3%)
  - Out of 114.74 million

- **Transportation business (railways)**
  - No. of passengers per year: 3,305 million (13.6%)
  - Out of 24,300 million

- **Transportation business (buses)**
  - No. of passengers per year: 939 million (20.6%)
  - Out of 4,600 million

- **Hospitals**
  - No. of hospital beds: 185,000 (11.8%)
  - Out of 1,566,000

Notes:
1. The graph shows the ratio of local public enterprises when the total number of business entities nationwide is set at 100.
2. Figures for the total number of enterprises nationwide have been compiled from statistical materials of related organizations. Figures for local public enterprises have been compiled from figures for the total number of enterprises and settlements for the same fiscal year.
2 Number of Businesses Operated by Local Public Enterprises

8,614 businesses are operated by local public enterprises. By type of business, sewerage accounts for the largest ratio, followed, in order, by water supply, hospitals, care services, and residential development.

---

3 Scale of Financial Settlement

The scale of total financial settlement is ¥17,088.2 billion. By type of business, sewerage accounts for the largest ratio, followed, in order, by hospitals, total water supply, transportation, and residential development.
Local public enterprises had a surplus of ¥731.6 billion. By type of business, water supply, electricity, gas and sewages showed a surplus.
1. Settlement of Disaster-Struck Organizations

1. Specified Disaster-Struck Prefectures

In FY2015, the total revenues of the nine specified disaster-struck prefectures amounted to ¥10,848.3 billion, decreasing by ¥267.1 billion year on year, or 2.4% (0.7% national increase). Total expenditures of the entities amounted to ¥10,348.0 billion, decreasing by ¥229.2 billion year on year, or 2.2% (1.0% national increase).

Specified disaster-struck prefectures: Prefectures stipulated in Article 2, Paragraph 2 of the Act on Special Public Finance Support and Assistance to Deal with the Great East Japan Earthquake (Act No. 40 of 2011). These prefectures are Aomori, Iwate, Miyagi, Fukushima, Ibaraki, Tochigi, Chiba, Niigata, and Nagano prefectures.

### Financial Status of Businesses of Local Public Enterprises of Disaster-Struck Organizations

Total revenues and expenditures of local enterprises of disaster-struck organizations amounted to a surplus of ¥103.1 billion, an increase of ¥162.3 billion year on year, or 274.3%. There were 847 businesses with surpluses, or 91.2% of all businesses, while 82 businesses had deficits, or 8.8%.

*Local enterprises of disaster-struck organizations: Nine prefectures stipulated in Article 2, Paragraph 2 of the Act on Special Public Finance Support and Assistance to Deal with the Great East Japan Earthquake, and 178 municipalities stipulated in Appendix Table 1 of the Japanese government ordinance concerning Article 2, Paragraphs 2 and 3 of the Act on Special Public Finance Support and Assistance to Deal with the Great East Japan Earthquake (including some labor unions joined by the above bodies).*

Overview of the Act on Assurance of Sound Financial Status of Local Governments

A number of drawbacks were pointed out with the conventional system of financial reconstruction of local governments, including the lack of a legal obligation to disclose comprehensible financial information and of rules for early warning. In response, the Act on Assurance of Sound Financial Status of Local Governments was enacted and has been in force since April 2009. The act establishes new indexes and requires local governments to disclose them thoroughly, aiming to quickly achieve financial soundness or rebuild.

Outline of the Act on Assurance of Sound Financial Status of Local Governments

**Sound stage**
- Establishment of indexes and thorough disclosure
  - Flow indexes: Real deficit ratio, Consolidated real deficit ratio, Real debt service ratio
  - Stock indexes: Future burden ratio = indexes by real liabilities, including public enterprises, third-sector enterprises, etc.
  - Subject to auditor inspection, reported to the council and publicly announced

**Early financial soundness restoring stage**
- Restoring financial soundness through their own efforts
  - Formulation of financial soundness plan (approval by the council), mandatory requests for external auditing
  - Report on progress of implementation to the council and public announcement every fiscal year
  - If the early achievement of financial soundness is deemed to be significantly difficult, the Minister for Internal Affairs and Communications or the prefectural governor makes necessary recommendations

**Financial rebuilding stage**
- Solid rebuilding through involvement of the central government, etc.
  - Formulation of financial rebuilding plan (approval by the council), mandatory requests for external auditing
  - Agreement on the financial rebuilding plan can be sought through consultation with the Minister for Internal Affairs and Communications
  - If financial management is deemed not to conform with the plan, the Minister for Internal Affairs and Communications makes necessary recommendations, such as budget changes

Financial soundness of public enterprise

**Real deficit ratio**
- Prefectures: 3.75%
- Municipalities: 11.25% ~ 15%

**Consolidated real deficit ratio**
- Prefectures: 8.75%
- Municipalities: 16.25% ~ 20%

**Real debt service ratio**
- 25%

**Future burden ratio**
- Prefectures, Government-ordinance-designated city: 400%
- Municipalities: 350%

**Finance shortfall ratio**
- 20%

Management soundness standard

Public announcement of indexes began with FY2007 settlement of accounts. Obligatory formulation of financial soundness plan was applied as of FY2008 settlement of accounts.
 Targets of the Ratio for Measuring Financial Soundness

Real Deficit Ratio

The following graph shows the trend in the number of local governments with a real deficit. Based on FY2015 account settlements, there were no local governments with a real deficit (i.e., a Real deficit ratio that exceeds 0%), and none had a Real deficit ratio that equals or exceeds the Early financial soundness restoring standards.

(No. of local governments)

\[ \text{Real deficit ratio} = \frac{\text{Real deficit amount of real account, etc.}}{\text{Standard financial scale}} \]

The Real deficit ratio is an index of the deficit level of the general account, etc., of local governments offering welfare, education, community-building, and other services, and represents the extent to which financial administration has worsened.

2 Status of the Ratios for Measuring Financial Soundness and Financial Shortfall Ratio
Promotion of the Soundness of Local Public Finance

**Consolidated Real Deficit Ratio**

The following graph shows the trend in the number of local governments with a consolidated real deficit.

Based on FY2015 account settlements, there were no local municipal governments with a consolidated real deficit (i.e., with a Consolidated Real deficit ratio that exceeds 0%), and no local municipal governments had a Consolidated real deficit ratio that equals or exceeds the Early financial soundness restoring standard.

The consolidated real deficit ratio is an index of the deficit level for a local government as a whole by taking the sum of the deficits and surpluses of all accounts, and represents the extent to which financial administration has worsened for a local government as a whole.

**Real Debt Service Ratio**

The following graph shows the trend in the number of local governments with a Real debt service ratio equal to or exceeding 18%.

Based on FY2015 account settlements, there was one local municipal government with a Real debt service ratio equal to or exceeding the financial rebuilding standard.

The real debt service ratio is an index of the size of the redemption amount of debts (local bonds) and similar expenditure, and represents the cash-flow level.

* Local governments with a Real debt service ratio equal to or exceeding 18% require the approval of the Minister of Internal Affairs and Communications, etc., to issue local government bonds.
**Future Burden Ratio**

The following graph shows the trend in the number of local governments with a Future burden ratio equal to or exceeding the Early financial soundness restoring standard. Based on FY2015 account settlements, there was one local municipal government with a Future burden ratio equal to or exceeding the Early financial soundness restoring standard.

\[
\text{Future burden ratio} = \frac{\text{Future burden amount} - (\text{amount of appropriable funds} + \text{estimated amount of special revenue source} + \text{amount expected to be included in standard financial requirements pertaining to outstanding local government bonds, etc.})}{\text{Standard financial scale} - (\text{amount included in standard financial requirements pertaining to redemption of principal and interest and quasi-redemption of principal and interest})}
\]

The Future burden ratio is an index of the current outstanding balance of burden, including that of debts (local bonds) of the general account, etc. as well as other likely future payments, and represents the extent to which finances may be squeezed in the future. No Financial rebuilding standard is established for the Future burden ratio.

**Financial Shortfall Ratio**

The following graph shows the trend in the number of local public enterprises with a financial shortfall. Based on FY2015 account settlements, there were 47 local public enterprises with a financial shortfall (i.e., with a Financial shortfall ratio that exceeds 0%). Of these, 10 local public enterprises had a Financial shortfall ratio that equals or exceeds the Management soundness standard.

\[
\text{Financial shortfall ratio} = \frac{\text{Deficit of funds}}{\text{Size of business}}
\]

The Financial shortfall ratio is an index of the deficit of funds of public enterprises compared to the size of their income, which shows the size of business of local public enterprises, and represents the extent to which financial health has worsened.
FY2015 Settlement

White Paper on Local Public Finance, 2017
