  2. Status of the Ratios for Measuring Financial Soundness and Financial Shortfall Ratio ......................... 34

1 “Net totals of the revenues and expenditures” are the ordinary net account totals of 3,061 organizations (47 prefectures, 1,718 municipalities, 23 special wards, 1,207 partial administrative associations and 113 wide-area local public bodies).
2 Figures for each item that are less than the given unit are rounded off. Therefore, they do not necessarily add up exactly to the total.
3 In FY2011, the revenues and expenditures of ordinary accounts were divided into the regular portion (Overall settlement figures less the Great East Japan Earthquake portion) and the Great East Japan Earthquake portion (Covering the revenues and expenditures related to recovery and reconstruction work and nationwide disaster prevention work).
Prefectures and municipalities (cities, towns, and villages) are the central actors in various areas of public services, including school education, public welfare and health, police and fire services, and public works such as roads and sewage systems, thereby fulfilling a major role in the lives of the citizens of the nation. This brochure describes the status of local public finance (which comprises collectively the finances of individual local governments), the state of settlements for FY2016, and the initiatives of local governments towards sound public finances (mainly the status of the ratios for measuring their financial soundness), with particular attention given to ordinary accounts (Public enterprises, such as water supply, transportation, and hospitals are described in the section on Local Public Enterprises).

Classification of the Accounts of Local Governments Applied in the Settlement Account Statistics

The accounts of local governments are divided into the general accounts and the special accounts, but classification of these accounts varies between local governments. Therefore, the accounts are classified in a standardized manner into ordinary accounts, which cover the general administrative sector, and other accounts (public business accounts). This makes it possible to clarify the financial condition of local governments as a whole and to make a statistical comparison between local governments.

**Local Government Accounts**

How large is local public finance?

The ratio of expenditure by local governments in gross domestic product (nominal) is 10.9%, about 2.7 times that of the central government.
How large is local government expenditure in total public expenditure?

Looking at the breakdown of public expenditure classified by final expenditure entity, local government expenditure accounts for 42.6% of Government final consumption expenditure, and 49.5% of Public gross capital formation. As a final expenditure entity, local governments above the central government and play a major role for the national economy.
In which areas is the share of local expenditures high?

The below graph shows central and local governments’ expenditures by purpose as a share of net total expenditure, classified by final expenditure entity. The share of local governments’ expenditures is higher in areas that are deeply related to daily life, such as public welfare, sanitation, and school education.

1 **Revenues**

¥101,459.8 billion (down ¥457.6 billion, 0.4% year on year)

- Regular portion: ¥97,642.2 billion (up ¥131.1 billion, 0.1% year on year)
- Great East Japan Earthquake portion: ¥3,817.7 billion (down ¥588.8 billion, 13.4% year on year)

The increase of revenues in the regular portion resulted from an increase in National treasury disbursements, etc. The decrease in revenues in the Great East Japan Earthquake portion resulted from a decrease in transfers from other accounts, etc.

2 **Expenditures**

¥98,141.5 billion (down ¥263.8 billion, 0.3% year on year)

- Regular portion: ¥94,766.6 billion (up ¥195.8 billion, 0.2% year on year)
- Great East Japan Earthquake portion: ¥3,374.9 billion (down ¥459.5 billion, 12.0% year on year)

The increases of expenditure in the regular portion resulted from an increase in social assistance expenses, etc. The decrease in expenditures in the Great East Japan Earthquake portion resulted from a decrease in Ordinary construction work expenses, etc.

3 **Revenue and Expenditure Settlement**

The real balance showed a surplus of ¥1,960.5 billion.

<td>¥501.8 billion</td>
</tr>
</tbody>
</table>

Notes: Real balance refers to the amount calculated by subtracting the revenue resources that should be carried over to the next fiscal year from the income expenditure balance. Single year balance refers to the amount calculated by subtracting the real balance of the previous fiscal year from the real balance of the relevant fiscal year. Real single year balance refers to the amount calculated by adding reserves and advanced redemption of local loans for the public finance adjustment fund to the single year balance and subtracting public finance adjustment fund reversals.
4 Trend in Scale of Account Settlement

Both revenues and expenditures of the regular portion have increased for four consecutive years.

5 Major Financial Indices

Ordinary balance ratio rose 1.7 percentage points year on year, to 93.4%.
Real debt service ratio declined 0.6 percentage points, to 9.3%.

Note: Outstanding public enterprise bonds (borne by ordinary accounts) are estimates based on the settlement account statistics.
What are the revenue sources for local governments’ activities?

### 1 Revenue Breakdown

The revenue of local governments consists mainly of Local taxes, Local allocation tax, National treasury disbursements, and Local bonds, in order of share size. Among them, revenue resources which can be spent for any purpose, such as Local taxes and Local allocation tax, are called General revenue resources. It is important for local governments to ensure sufficient General revenue resources in order to handle various administrative needs properly. In FY2016, General revenue resources accounted for 58.2%.

#### Composition of Revenues (FY2016 settlement)

- **Net total**: ¥1,014,598 billion
- **General revenue resources**: ¥590,949 billion (58.2%)
  - Local taxes: ¥393,924 billion (38.8%)
  - Local transfer tax: ¥2,340 billion (2.3%)
  - Special local grants: ¥123.3 billion (0.1%)
  - Local allocation tax: ¥17,239 billion (17.0%)
- **Local bonds**: ¥10,387 billion (10.2%)
  - Bonds for the extraordinary financial measures: ¥3,739 billion (3.7%)
- **National treasury disbursements**: ¥9,201 billion (9.1%)
  - Local taxes: ¥19,141 billion (32.8%)
  - Local transfer tax: ¥415.4 billion (0.7%)
  - Special local grants: ¥74.0 billion (0.1%)
  - Local allocation tax: ¥8,189 billion (14.0%)
- **Other revenue resources**: ¥16,290 billion (16.1%)
  - Other general revenue resources: ¥2,668.5 billion (4.6%)

---

**Note**: "National treasury disbursements" includes "special grants to measures for traffic safety" and "grants to cities, towns and villages where national institutions are located."
Revenues in Regular Portion and Great East Japan Earthquake Portion

**Net Total**

- **Regular portion** ¥97,642.2 billion
  - General revenue resources ¥58,492.7 billion (59.9%)
  - Other revenue resources ¥14,580.3 billion (14.9%)
  - Local bonds ¥10,236.6 billion (10.5%)

- **Great East Japan Earthquake portion** ¥3,817.7 billion
  - General revenue resources ¥602.2 billion (15.8%)
  - Other revenue resources ¥1,768.3 billion (46.3%)
  - Local bonds ¥150.7 billion (3.9%)

**Prefectures**

- **Regular portion** ¥49,138.2 billion
  - General revenue resources ¥30,921.1 billion (62.9%)
  - Other revenue resources ¥7,264.4 billion (14.8%)
  - Local bonds ¥5,485.3 billion (11.2%)

- **Great East Japan Earthquake portion** ¥2,484.9 billion
  - General revenue resources ¥1,103.5 billion (44.5%)
  - Other revenue resources ¥355.6 billion (14.3%)
  - Local bonds ¥40.7 billion (1.6%)

**Municipalities**

- **Regular portion** ¥56,697.6 billion
  - General revenue resources ¥30,240.9 billion (53.3%)
  - Other revenue resources ¥9,194.1 billion (16.3%)
  - Local bonds ¥4,778.6 billion (8.4%)

- **Great East Japan Earthquake portion** ¥1,703.1 billion
  - General revenue resources ¥699.2 billion (41.8%)
  - Other revenue resources ¥246.7 billion (14.5%)
  - Local bonds ¥110.6 billion (6.5%)
### Revenue Trends

The ratio of general revenue resources turned downward in FY2011, but have been rising since FY2014.

4 Ratio of National Taxes and Local Taxes

The total of taxes collected as national and local taxes amounted to ¥98,348.7 billion. Of this amount, national and local taxes accounted for 59.9% and 40.1% respectively.

5 Local Taxes

Local taxes consist of prefectural taxes and municipal taxes.

Composition of Revenue from Prefectural Taxes (FY2016 settlement)

- Automobile acquisition tax ¥146.1 billion (0.8%)
- Prefectural tobacco tax ¥148.9 billion (0.8%)
- Real estate acquisition tax ¥396.7 billion (2.2%)
- Light oil delivery tax ¥933.1 billion (5.2%)
- Automobile tax ¥1,534.9 billion (8.5%)
- Local consumption tax ¥4,702.8 billion (26.0%)

Composition of Revenue from Municipal Taxes (FY2016 settlement)

- Other taxes ¥638.8 billion (3.0%)
- Municipal tobacco tax ¥910.9 billion (4.3%)
- City planning tax ¥1,261.6 billion (5.9%)
- Fixed asset tax ¥8,893.5 billion (41.8%)
- Municipal inhabitant tax ¥9,573.6 billion (45.0%)

Note: Municipal taxes collected by the Tokyo Metropolitan Government are included in municipal tax revenue figures, but not included in prefectural tax revenue figures.
Prefectural tax revenues have increased for five consecutive years since FY2012.

Prefectural tax revenues have increased for five consecutive years since FY2012.

Municipal tax revenues remained at almost the same level for the past five years.

Note: Municipal tax revenue figures include municipal taxes collected by the Tokyo Metropolitan Government.
In order for local governments to provide public services in response to local needs on their own responsibility and at their own discretion, it is necessary to build a less imbalanced and stable local tax system. Comparing local tax revenue amounts, with the national average set at 100, Tokyo, the highest, was approximately 2.4 times the amount for Okinawa Prefecture, which was the lowest.

Index of Per Capita Revenue in Local Tax Revenue (with national average as 100)

Notes:
1. “Max/Min” indicates the value obtained by dividing the maximum value of per-capita tax revenue for each prefecture by the minimum value.
2. Local tax revenue amounts exclude overassessment and discretionary taxes, etc.
3. Individual inhabitant tax revenue is the total of the prefectural individual inhabitant tax (on a per-capita basis and on an income basis) and the municipal individual inhabitant tax (on a per-capita basis and on an income basis), and excludes overassessment.
4. Revenue from the two corporate taxes is the total of the corporate prefectural inhabitant tax, the corporate municipal inhabitant tax, and the corporate business tax (excluding local corporation special transfer tax) and excludes overassessment, etc.
5. Fixed asset tax revenues include prefectural amounts, and exclude overassessment.
6. Calculations were made in accordance with the basic resident register population as of January 1, 2017.

Local Allocation Tax

From the perspective of local autonomy, it would be the ideal for each local government to ensure the revenue sources necessary for their activities through Local tax revenue collected from their residents. However, there are regional imbalances in tax sources, and many local governments are unable to acquire the necessary tax revenue. Accordingly, the central government collects revenue resources that would essentially be attributable to Local tax revenue and reallocates them as Local allocation tax to local governments that have weaker financial capabilities.

1. Determining the total amount of Local allocation tax

The total amount of the Local allocation tax is determined in accordance with estimates of standard revenue and expenditures in local public finance as a whole, based on a fixed percentage for national taxes (in FY2016 33.1% for Income tax and Corporate tax, 50% for Liquor tax, 22.3% for Consumption tax, and the total amount of Local corporate tax).

The total amount of the Local allocation tax in FY2016 was ¥17,239.0 billion, down 0.9% year on year.

2. How regular Local allocation taxes are calculated for each local government

The Regular local allocation tax for each local government is calculated through the following mechanism.

\[
\text{Standard financial requirements} - \text{Standard financial revenues} = \text{Regular allocation tax amount}
\]

- Unit cost \times Measurement unit (national census population, etc.)
- \times Correction coefficient (graded correction, etc.)

Notes: 1. Standard financial requirements are figured out based on the rational and appropriate service standards for each local government. For this reason, the local share of the services, such as compulsory education, benefits for livelihood protection, and public works which are subject to national obligatory share, is mandatorily included. Beginning in FY2001, part of the Standard financial requirements is being transferred to special local bonds (bond for temporary substitution for local allocation tax) as an exception to Article 5 of the Local Finance Law.

2. Normal local tax revenue does not include Non-act-based tax or over-taxation that sets tax rates above the standard tax rate stipulated in the Local Tax Act.

3. Function of the Local allocation tax

The function of the Local allocation tax is to adjust imbalances in revenue resources between local governments and to ensure their financial capacity to provide standard public services and basic infrastructure to residents across the country.

The adjustment of revenue resources through Local allocation tax makes the ratios of General revenue resources to the total revenues between local governments practically flat regardless of the size of population.

Note: A “Midsize city” refers to a city with a population of 100,000 or more excluding Government-ordinance-designated cities, Core cities, and Special cities at the time of the effective date, and a “Small city” refers to a city with a population of less than 100,000.
What are expenses spent on?

1 Expenses Classified by Purpose

Classifying the expenses by purpose demonstrates that much of public money is appropriated for Public welfare expenses, Education expenses, and Debt service. In prefectures, Education expenses, Public welfare expenses, and Debt service have the highest shares in that order. In municipalities, Public welfare expenses, General administrative expenses, and Civil engineering work expenses account for the largest amounts in that order.

General administrative expenses: Expenses for general administration, financial management, accounting administration, etc.
Public welfare expenses: Expenses for the construction and operation of welfare facilities for children, the elderly, the mentally and physically disabled, etc., and for the implementation of public assistance, etc.
Educational expenses: Expenses for school education, social education, etc.
Civil engineering work expenses: Expenses for the construction and maintenance of public facilities, such as roads, rivers, housing, and parks.
Debt service: Expenses for the payment of principal, interest, etc., on debts.
Expenditures in Regular Portion and Great East Japan Earthquake Portion (Expenses Classified by Purpose)

Net total

- Other expenses ¥6,055.6 billion (6.5%)
- Disaster recovery expenses ¥339.5 billion (0.4%)
- Agriculture, forestry, and fishery expenses ¥2,059.8 billion (3.1%)
- Sanitation expenses ¥6,164.9 billion (6.5%)
- Commerce and industry expenses ¥4,372.8 billion (5.1%)
- General administrative expenses ¥8,531.6 billion (9.0%)
- Civil engineering work expenses ¥12,537.7 billion (13.2%)
- Public welfare expenses ¥16,626.6 billion (17.5%)
- Educational expenses ¥321.3 billion (9.5%)
- Debt service ¥6,505.2 billion (11.9%)
- Other expenses ¥6,147.9 billion (11.2%)
- Disaster recovery expenses ¥478.9 billion (14.2%)
- Agriculture, forestry, and fishery expenses ¥211.4 billion (6.3%)
- Sanitation expenses ¥53.5 billion (2.8%)
- Commerce and industry expenses ¥321.3 billion (9.5%)
- General administrative expenses ¥370.0 billion (11.0%)

Prefectures

- Other expenses ¥7,409.8 billion (15.6%)
- Disaster recovery expenses ¥230.7 billion (0.4%)
- Agriculture, forestry, and fishery expenses ¥2,117.8 billion (4.4%)
- Sanitation expenses ¥1,645.0 billion (3.4%)
- Commerce and industry expenses ¥3,187.7 billion (6.6%)
- General administrative expenses ¥2,535.9 billion (5.3%)
- Civil engineering work expenses ¥6,907.9 billion (14.4%)
- Public welfare expenses ¥11,080.9 billion (23.1%)
- Educational expenses ¥758.1 billion (16.2%)
- Debt service ¥939.4 billion (20.0%)
- Other expenses ¥20,736.1 billion (37.7%)
- Disaster recovery expenses ¥146.2 billion (0.8%)
- Agriculture, forestry, and fishery expenses ¥334.0 billion (13.7%)
- Sanitation expenses ¥63.5 billion (2.7%)
- Commerce and industry expenses ¥99.2 billion (13.2%)
- General administrative expenses ¥446.1 billion (20.0%)

Municipalities

- Other expenses ¥2,393.2 billion (4.3%)
- Disaster recovery expenses ¥154.2 billion (0.3%)
- Agriculture, forestry, and fishery expenses ¥1,271.3 billion (2.3%)
- Sanitation expenses ¥4,675.1 billion (8.3%)
- Commerce and industry expenses ¥1,733.1 billion (3.2%)
- General administrative expenses ¥6,540.2 billion (11.9%)
- Civil engineering work expenses ¥6,147.9 billion (11.2%)
- Educational expenses ¥5,650.0 billion (10.3%)
- Debt service ¥5,665.7 billion (10.3%)
- Other expenses ¥20,736.1 billion (37.7%)
- Disaster recovery expenses ¥146.2 billion (0.8%)
- Agriculture, forestry, and fishery expenses ¥334.0 billion (13.7%)
- Sanitation expenses ¥63.5 billion (2.7%)
- Commerce and industry expenses ¥99.2 billion (13.2%)
- General administrative expenses ¥278.1 billion (18.2%)
- Civil engineering work expenses ¥505.2 billion (33.0%)

**White Paper on Local Public Finance, 2018**

17
What are expenses used for?

4 Expenses Classified by Type

Expenses are also classified, according to their economic nature, into “Mandatory expenses” (consisting of Personnel expenses, Social assistance expenses, and Debt service), the payment of which is mandatory and the amount of which is difficult to reduce at the discretion of individual local governments, “Investment expenses” including Ordinary construction work expenses, and “Other expenses,” (such as Goods expenses, Subsidizing expenses, Reserves, Transfers to other accounts).

Composition of Expenditures Classified by Type (FY2016 settlement)

Net total ¥98,141.5 billion

- Mandatory expenses ¥49,023.9 billion (50.0%)
  - Personnel expenses ¥22,468.6 billion (22.9%)
  - Social assistance expenses ¥14,009.8 billion (14.3%)
  - Debt service ¥12,545.5 billion (12.8%)
- Investment expenses ¥15,125.2 billion (15.4%)
  - Ordinary construction work expenses ¥14,306.9 billion (14.6%)
- Other expenses ¥5,888.2 billion (5.9%)
- Goods expenses ¥9,496.8 billion (9.7%)
- Subsidizing expenses ¥9,842.2 billion (10.0%)
- Transfers to other accounts ¥5,447.7 billion (5.6%)
  - National health insurance accounts ¥1,355.8 billion (1.4%)
  - Elderly nursing care insurance accounts ¥1,496.0 billion (1.5%)
  - Latter-stage elderly healthcare accounts ¥1,542.1 billion (1.6%)
- Reserves ¥3,317.5 billion (3.4%)
- Investment expenses ¥7,691.3 billion (15.3%)
  - Ordinary construction work expenses ¥7,150.4 billion (14.2%)
  - Non-subsidized public works expenses ¥2,526.6 billion (5.0%)
  - Subsidized public works expenses ¥3,909.5 billion (7.8%)
- Goods expenses ¥1,687.7 billion (3.4%)
  - Ordinary construction work expenses ¥1,082.3 billion (2.2%)
  - Social assistance expenses ¥1,022.3 billion (2.2%)
  - Debt service ¥6,895.3 billion (13.7%)
- Transfers to other accounts ¥141.4 billion (0.3%)
- Reserves ¥1,575.0 billion (3.1%)
- Subsidizing expenses ¥13,669.3 billion (27.2%)
- Subsidized public works expenses ¥7,124.1 billion (7.3%)
- Non-subsidized public works expenses ¥6,400.6 billion (6.5%)
- Other expenses ¥3,748.2 billion (7.5%)
- Mandatory expenses ¥7,622.5 billion (43.2%)
  - Personnel expenses ¥3,719.8 billion (27.3%)
- Investment expenses ¥8,094.1 billion (14.3%)
  - Ordinary construction work expenses ¥7,790.6 billion (13.8%)
- Other expenses ¥2,169.4 billion (3.9%)
- Mandatory expenses ¥8,789.1 billion (13.8%)
  - Personnel expenses ¥8,748.8 billion (15.5%)
- Investment expenses ¥9,041.4 billion (14.3%)
  - Ordinary construction work expenses ¥9,088.4 billion (10.1%)
  - Non-subsidized public works expenses ¥5,485.4 billion (6.2%)

Prefectures total ¥50,210.3 billion

Municipalities total ¥56,495.1 billion
## Expenditures in Regular Portion and Great East Japan Earthquake Portion (Expenses Classified by Type)

### Prefectures

- **Other** ¥3,646.1 billion (7.6%)
- **Reserves** ¥1,061.0 billion (2.2%)
- **Subsidizing expenses** ¥13,249.7 billion (27.6%)
- **Goods expenses** ¥6,631.6 billion (3.4%)

#### Regular portion
- **Mandatory expenses** ¥21,669.6 billion (45.2%)
- **Investment expenses** ¥8,735.6 billion (14.0%)

#### Great East Japan Earthquake portion
- **Mandatory expenses** ¥10,807.0 billion (22.1%)
- **Investment expenses** ¥8,956.0 billion (18.5%)

### Municipalities

- **Other** ¥7,439.1 billion (13.5%)
- **Reserves** ¥1,518.4 billion (2.8%)
- **Subsidizing expenses** ¥3,950.4 billion (7.2%)
- **Goods expenses** ¥7,523.8 billion (13.7%)

#### Regular portion
- **Mandatory expenses** ¥27,317.9 billion (49.7%)
- **Investment expenses** ¥7,217.2 billion (13.1%)

#### Great East Japan Earthquake portion
- **Mandatory expenses** ¥19,946.1 billion (36.2%)
- **Investment expenses** ¥6,040.6 billion (11.3%)

### Net total

- **Other** ¥11,056.2 billion (11.6%)
- **Reserves** ¥2,579.4 billion (2.7%)
- **Subsidizing expenses** ¥9,706.2 billion (10.2%)
- **Goods expenses** ¥279.6 billion (9.7%)

#### Regular portion
- **Mandatory expenses** ¥48,951.9 billion (51.7%)
- **Investment expenses** ¥13,317.5 billion (14.1%)

#### Great East Japan Earthquake portion
- **Mandatory expenses** ¥72.0 billion (2.1%)
- **Investment expenses** ¥1,807.7 billion (53.6%)

### Reserves

- **Regular portion** ¥738.2 billion (21.9%)
- **Great East Japan Earthquake portion** ¥1,061.0 billion (2.2%)

### Subsidizing expenses

- **Regular portion** ¥136.0 billion (4.0%)
- **Great East Japan Earthquake portion** ¥514.0 billion (23.2%)

### Goods expenses

- **Regular portion** ¥341.4 billion (10.1%)
- **Great East Japan Earthquake portion** ¥56.1 billion (2.5%)
6 Breakdown of Expenses Classified by Type

Social assistance expenses, Subsidizing expenses, Transfers to other accounts, and Goods expenses have been rising.

Trends in Expenditures Classified by Type

Trends in Breakdown of Social Assistance Expenses by Purpose
Personnel expenses for FY2016 decreased year on year due mainly to a decrease in Retirement allowances associated with the retirement of personnel.

White Paper on Local Public Finance, 2018
How financially capable are local governments to respond to local demands?

It is necessary that local governments have financial resources for not only the Mandatory expenses but also for the expenses for projects to properly address challenges caused by changes in the social economy and administrative needs so that they can adequately meet the needs of their residents. The extent to which the resources for such purposes are secured is called the “flexibility of the financial structure.”

1 Ordinary Balance Ratio

The FY2016 Ordinary balance ratio rose 1.7 percentage points year on year to 93.4%, staying above 90% for 13 consecutive years.

Trends in the Ordinary Balance Ratio

Breakdown of Ordinary Balance Ratio (Total)
2 Real Debt Service Ratio and Debt Service Payment Ratio

Close attention should be paid to the trend of the Debt service, which is the expense required to repay the principal and interest of the debts of local governments and has an especially negative impact on financial flexibility. The Real debt service ratio and the Debt service payment ratio are indices that measure the extent of the burden of the Debt service.

Trends in the Real Debt Service Ratio

*Real debt service ratio: The real debt service ratio is an index of the size of the redemption amount of debts (local bonds) and similar expenditure, and represents the cash-flow level.

Trends in the Debt Service Payment Ratio

*Debt service payment ratio: The Debt service payment ratio indicates the ratio of general revenue resources allocated for debt service (amount of repayment of the principal and interest on local bonds) in the total amount of General revenue resources. This index is used to measure the flexibility of the financial structure by assessing the degree to which Debt service restricts the freedom of use of General revenue resources.
What is the status of debt in local public finance?

1 Trends in Outstanding Local Government Bonds and Debt Burden

Real future financial burden resulting from Outstanding local government bonds and Debt burden amounted to ¥136,903.8 billion at the end of FY2016, down 0.5% year on year.

Notes:
1. Outstanding local government bonds excludes special fund public investment bonds.
2. Debt burden is the amount scheduled to be expended in the following fiscal years.

2 Trends in Outstanding Borrowing Borne by the Ordinary Accounts

Outstanding local public finance borrowing, which includes borrowing in the special account for Local allocation tax and Transfer tax for addressing revenue resource shortages, as well as the redemption of Public enterprise bonds borne by the Ordinary accounts, remains at a high level, amounting to ¥197 trillion at the end of FY2016.

Notes:
1. Outstanding local government bonds excludes special fund public investment bonds.
2. Outstanding public enterprise bonds (in ordinary accounts) are estimates based on the settlement account statistics.
3 Trends in Balance of Funds

Reserves on hand (excluding the Great East Japan Earthquake portion) at the end of FY2016 was ¥21.5 trillion, an increase of ¥7.9 trillion from the end of FY2006.

Why has the balance of funds increased?

The balance of funds increased over the 10 years mainly due to systemic factors such as the central government’s policies and municipal mergers, measures for the aging of public facilities as well as preparations for disaster and various other future events. The funds increased as many organizations set aside reserves while striving to carry out administrative reform and reduce expenses.

Note: In some cases, figures in the table do not add up exactly to the total as values less than the given unit are rounded off.

*1 Funds established based on the central government’s policies such as the Fund for comprehensively securing regional health and long-term care and the Fund for stabilizing medical care finance for the latter-stage elderly.

*2 Estimated based on survey results and the difference in balance of funds between merged organizations and non-merged organizations.

*3 Public finance adjustment fund has been estimated based on the order of reasons for setting aside reserves indicated by survey results, while the Special purpose fund has been estimated based on the classification of uses indicated by survey results.
What is the status of local public enterprises?

1 Presence of Local Public Enterprises

Local public enterprises play a major role in improving the standard of living of residents.

- **Current water-supply population**
  - Out of 124.96 million
  - 124.40 million (99.6%)

- **Sewage disposal population**
  - Out of 115.31 million
  - 104.07 million (90.2%)

- **No. of passengers per year**
  - Hospital
  - Out of 24,600 million
  - 3,376 million (13.7%)

- **No. of passengers per year**
  - Transportation business
  - Out of 4,600 million
  - 928 million (20.2%)

- **No. of hospital beds**
  - Out of 1,561,000
  - 179,000 (11.5%)

Notes:
1. The graph shows the ratio of local public enterprises when the total number of business entities nationwide is set at 100.
   2. Figures for the total number of enterprises nationwide have been compiled from statistical materials of related organizations.

2 Number of Businesses Operated by Local Public Enterprises

8,534 businesses are operated by local public enterprises. By type of business, sewerage accounts for the largest ratio, followed, in order, by water supply, hospitals, care services, and residential development.

3 Scale of Financial Settlement

The scale of total financial settlement is ¥16,933.9 billion. By type of business, sewerage accounts for the largest ratio, followed, in order, by hospitals, total water supply, transportation, and residential development.
4 Financial Status

Local public enterprises had a surplus of ¥723.5 billion. By type of business, water supply, electricity, gas and sewages showed a surplus.
1. Settlement of Disaster-Struck Organizations

In FY2016, the total revenues of the nine specified disaster-struck prefectures amounted to ¥10,689.3 billion, decreasing by ¥159.1 billion year on year, or 1.5% (0.8% national decrease). Total expenditures of the entities amounted to ¥10,227.8 billion, decreasing by ¥120.2 billion year on year, or 1.2% (1.0% national decrease).

*Specified disaster-struck prefectures: Prefectures stipulated in Article 2, Paragraph 2 of the Act on Special Public Finance Support and Assistance to Deal with the Great East Japan Earthquake (Act No. 40 of 2011). These prefectures are Aomori, Iwate, Miyagi, Fukushima, Ibaraki, Tochigi, Chiba, Niigata, and Nagano prefectures.*
2. Specified Disaster-Struck Municipalities

In FY2016, the total revenues of the 227 municipalities designated as specified disaster-struck municipalities amounted to ¥7,956.6 billion, decreasing by ¥33.9 billion year on year, or 4.1% (0.6% national decrease). Total expenditures of the entities amounted to ¥7,521.2 billion, decreasing by ¥223.3 billion year on year, or 2.9% (0.1% national decrease).

 Specified disaster-struck municipalities: Municipalities designated in Appendix Table 1 and those designated in Appendices Tables 2 and 3 that are other than specified disaster-struck local public bodies of the Japanese government ordinance (No. 127, 2011) concerning Article 2, Paragraphs 2 and 3 of the Act on Special Public Finance Support and Assistance to Deal with the Great East Japan Earthquake. (A total of 227 organizations in 11 prefectures, including, 33 organizations within Iwate Prefecture, 35 organizations within Miyagi prefecture, and 59 organizations within Fukushima prefecture.)

Financial Status of Businesses of Local Public Enterprises of Disaster-Struck Organizations

Total revenues and expenditures of local enterprises of disaster-struck organizations amounted to a surplus of ¥83.1 billion, a decrease of ¥20 billion year on year, or 19.4%. There were 823 businesses with surpluses, or 89.7% of all businesses, while 94 businesses had deficits, or 10.3%.

* Local enterprises of disaster-struck organizations: Nine prefectures stipulated in Article 2, Paragraph 2 of the Act on Special Public Finance Support and Assistance to Deal with the Great East Japan Earthquake, and 178 municipalities stipulated in Appended Table 1 of the Japanese government ordinance concerning Article 2, Paragraphs 2 and 3 of the Act on Special Public Finance Support and Assistance to Deal with the Great East Japan Earthquake (including some labor unions joined by the above bodies).
Overview of the Act on Assurance of Sound Financial Status of Local Governments

A number of drawbacks were pointed out with the conventional system of financial reconstruction of local governments, including the lack of a legal obligation to disclose comprehensible financial information and of rules for early warning. In response, the Act on Assurance of Sound Financial Status of Local Governments was enacted and has been in force since April 2009. The act establishes new indexes and requires local governments to disclose them thoroughly, aiming to quickly achieve financial soundness or rebuild.

### Sound stage

- Establishment of indexes and thorough disclosure
  - Flow indexes: Real deficit ratio, Consolidated real deficit ratio, Real debt service ratio
  - Stock indexes: Future burden ratio, indexes by real liabilities, including public enterprises, third-sector enterprises, etc.
  - Subject to auditor inspection, reported to the council and publicly announced

### Early financial soundness restoring stage

- Restoring financial soundness through their own efforts
  - Formulation of financial soundness plan (approval by the council), mandatory requests for external auditing
  - Report on progress of implementation to the council and public announcement every fiscal year
  - If the early achievement of financial soundness is deemed to be significantly difficult, the Minister for Internal Affairs and Communications or the prefectural governor makes necessary recommendations

### Financial rebuilding stage

- Solid rebuilding through involvement of the central government, etc.
  - Formulation of financial rebuilding plan (approval by the council), mandatory requests for external auditing
  - Agreement on the financial rebuilding plan can be sought through consultation with the Minister for Internal Affairs and Communications
  - If financial management is deemed not to conform with the plan, the Minister for Internal Affairs and Communications makes necessary recommendations, such as budget changes

### Financial soundness of public enterprise

**Real deficit ratio**
- Prefectures: 3.75%
- Municipalities: 11.25% ~ 15%

**Consolidated real deficit ratio**
- Prefectures: 8.75%
- Municipalities: 16.25% ~ 20%

**Real debt service ratio**
- 25%

**Future burden ratio**
- Prefectures, Government-ordinance-designated city: 400%
- Municipalities: 350%

**Finance shortfall ratio**
- (for each public enterprise) 20%
- Management soundness standard

### Public announcement of indexes

Public announcement of indexes began with FY2007 settlement of accounts. Obligatory formulation of financial soundness plan was applied as of FY2008 settlement of accounts.
2 Status of the Ratios for Measuring Financial Soundness and Financial Shortfall Ratio

Real Deficit Ratio

The following graph shows the trend in the number of local governments with a real deficit. Based on FY2016 account settlements, there were no local governments with a real deficit (i.e., a Real deficit ratio that exceeds 0%), and none had a Real deficit ratio that equals or exceeds the Early financial soundness restoring standards.

Real deficit ratio = $\frac{\text{Real deficit amount of real account, etc.}}{\text{Standard financial scale}}$

The Real deficit ratio is an index of the deficit level of the general account, etc. of local governments offering welfare, education, community-building, and other services, and represents the extent to which financial administration has worsened.

**Promotion of the Soundness of Local Public Finance**

**Consolidated Real Deficit Ratio**

The following graph shows the trend in the number of local governments with a consolidated real deficit. Based on FY2016 account settlements, there were no local municipal governments with a consolidated real deficit (i.e., with a consolidated Real deficit ratio that exceeds 0%), and no local municipal governments had a Consolidated real deficit ratio that equals or exceeds the Early financial soundness restoring standard.

![Graph showing the trend in the number of local governments with a consolidated real deficit from FY2007 to FY2016.](image)

The consolidated real deficit ratio is an index of the deficit level for a local government as a whole by taking the sum of the deficits and surpluses of all accounts, and represents the extent to which financial administration has worsened for a local government as a whole.

\[
\text{Consolidated real deficit ratio} = \frac{\text{Consolidated real deficit}}{\text{Standard financial scale}}
\]

**Real Debt Service Ratio**

The following graph shows the trend in the number of local governments with a Real debt service ratio equal to or exceeding 18%. Based on FY2016 account settlements, there was one local municipal government with a Real debt service ratio equal to or exceeding the financial rebuilding standard.

![Graph showing the trend in the number of local governments with a Real debt service ratio from FY2007 to FY2016.](image)

The real debt service ratio is an index of the size of the redemption amount of debts (local bonds) and similar expenditure, and represents the cash-flow level.

\[
\text{Real debt service ratio (3-year average)} = \frac{(\text{Redemption of principal and interest of local bonds} + \text{quasi-redemption of principal and interest})}{\text{Standard financial scale} - (\text{amount included in standard financial requirements pertaining to redemption and quasi-redemption of principal and payments})}
\]

* Local governments with a Real debt service ratio equal to or exceeding 18% require the approval of the Minister of Internal Affairs and Communications, etc., to issue local government bonds.
Future Burden Ratio

The following graph shows the trend in the number of local governments with a Future burden ratio equal to or exceeding the Early financial soundness restoring standard. Based on FY2016 account settlements, there was one local municipal government with a Future burden ratio equal to or exceeding the Early financial soundness restoring standard.

Financial Shortfall Ratio

The following graph shows the trend in the number of local public enterprises with a financial shortfall. Based on FY2016 account settlements, there were 55 local public enterprises with a financial shortfall (i.e., with a Financial shortfall ratio that exceeds 0%). Of these, 9 local public enterprises had a Financial shortfall ratio that equals or exceeds the Management soundness standard.

\[
\text{Future burden ratio} = \frac{\text{Future burden amount} - (\text{amount of appropriable funds} + \text{estimated amount of special revenue source} + \text{amount expected to be included in standard financial requirements pertaining to outstanding local government bonds, etc.})}{\text{Standard financial scale} - (\text{amount included in standard financial requirements pertaining to redemption of principal and interest and quasi-redemption of principal and interest})}
\]

\[
\text{Financial shortfall ratio} = \frac{\text{Deficit of funds}}{\text{Size of business}}
\]

Future burden amount = (amount of appropriable funds + estimated amount of special revenue source + amount expected to be included in standard financial requirements pertaining to outstanding local government bonds, etc.)

Standard financial scale = (amount included in standard financial requirements pertaining to redemption of principal and interest and quasi-redemption of principal and interest)

The Future burden ratio is an index of the current outstanding balance of burden, including that of debts (local bonds) of the general account, etc. as well as other likely future payments, and represents the extent to which finances may be squeezed in the future. No Financial rebuilding standard is established for the Future burden ratio.

The Financial shortfall ratio is an index of the deficit of funds of public enterprises compared to the size of their income, which shows the size of business of local public enterprises, and represents the extent to which financial health has worsened.
