## Chapter 1

### Building a Ubiquitous Network Society That Spreads Throughout the World

Introduction .....	5
Section 1: Advances in Network Infrastructure	
1. Advances in Network Infrastructure.....	6
2. Technology Development and Standardization for Enhancing International Competitiveness .....	10
3. Evolving Towards Ubiquitous Networks .....	11
Section 2: Changes in Lifestyles Resulting from Network Use	
1. Status of Internet Usage.....	12
2. Prospects for Network Use in the Future.....	15
Section 3: Use of Networks in Business	
1. Current Status of Network Use in Business .....	20
2. Future Prospects for Network Use by Businesses...25	
3. The Impact of Ubiquitous Networks on the Japanese Economy .....	28
Section 4: Realization of a Ubiquitous Network Society and Issues	
1. Structure of a Ubiquitous Network Society.....	30
2. Issues Concerning the Realization of a Ubiquitous Network Society .....	31

## Chapter 2

### Current Status of Information and Communications

Section 1: Trends in the Information and Communications Industry, etc.	
1. Market Size .....	41
2. Amount of Added Value.....	41
3. Employment.....	41
4. Productivity .....	41
5. Trends in IT Investment and Contribution of Information and Communications to Macro-Economy .....	42
6. Capital Investment.....	42
7. Information & Communications Ventures .....	42
8. International Trade and Investment .....	42
Section 2: Telecommunications Business	
1. Telecommunications Carriers.....	43
2. Telecommunications Services .....	43
3. Telecommunications Rates.....	43
4. Status of Use of Telecommunications Media.....	44
5. Telecommunications Networks .....	44
6. Complaints and Inquiries on Telecommunications Services .....	44

<b>Section 3: Broadcasting Business</b>	
1. Broadcasters.....	45
2. Broadcasting Services.....	45
3. Status of Broadcasting Media Usage.....	45

<b>Section 4: Postal Service</b>	
1. Finances of Postal Service.....	46
2. Volume of Postal Items .....	46
3. Post Office Network .....	46
4. Correspondence Delivery .....	46

<b>Section 5: Contents</b>	
1. Status of Contents Usage.....	46
2. Contents Volume .....	46
3. Information Flow .....	46

<b>Section 6: Human Resources Development</b>	
1. IT Education in Public Schools .....	48
2. Development of IT Experts .....	48

<b>Section 7: Digitization of Homes and Companies</b>	
1. Digitization of Homes .....	49
2. Digitization of Companies.....	50

<b>Section 8: R&amp;D</b>	
1. R&D in the Information and Communications Field ..	51
2. Patents.....	51

<b>Section 9: Trends Abroad</b>	
1. Overseas IT National Strategies .....	51
2. Usage Status and Market Size of Telecommunications Worldwide .....	51
3. Trends in Overseas Communications Carriers and Broadcasters .....	51
4. Trends in IT Policies in the United States .....	52
5. Trends in IT Policies in the EU .....	52
6. Trends in IT Policies in Asia .....	52
7. Status of International Digital Divide.....	52

## Chapter 3

### Trends of Information and Communications Policies

<b>Section 1: Realizing a Society of Advanced Information and Communications Networks</b>	
1. Building a New, Japan-Inspired IT Society.....	55
2. Promoting the IT National Strategy.....	55
3. Budget Related to e-Japan .....	55

<b>Section 2: Development of Information and Communications Policies</b>	
1. Development of Telecommunications Policies .....	55

2. Development of Broadcasting Policies.....	56
3. Promotion of Policies Concerning Effective Radio Spectrum Use .....	58

<b>Section 3: Upgrading Information and Communications Networks</b>	
1. Promoting Improvement of the Network Infrastructure .....	59
2. Promoting Advances in Broadcasting .....	59
3. Convergence of Communications and Broadcasting .....	60

<b>Section 4: Promoting IT in Private Companies</b>	
1. Establishment of Environment for Promoting the Creation and Growth of IT Venture Companies .....	60
2. Diffusing and Promoting Electronic Signatures and Certification Services .....	60

<b>Section 5: Promoting IT in Administration and Public Services</b>	
1. Promoting IT in Local Areas .....	61
2. Revitalizing Local Economies Through Utilization of IT .....	61
3. Accomplishing e-Government.....	61
4. Achieving e-Local Government .....	62

<b>Section 6: Promoting Network Contents Distribution and Developing Human Resources</b>	
1. Promoting the Production, Distribution, and Preservation of Network Contents .....	62
2. Developing Human Resources .....	62

<b>Section 7: Protecting Information and Communications Users</b>	
1. Consumer Administration in Telecommunications Services .....	63
2. Promoting Measures for Information Security and Privacy Protection .....	63
3. Overcoming the Digital Divide .....	64
4. Improving the Environment for Radio Spectrum Use...64	

<b>Section 8: Promoting R&amp;D</b>	
1. Developing R&D Policies in the Information and Communications Field .....	64
2. Implementing Selective R&D .....	65

<b>Section 9: Promoting International Strategies</b>	
1. Promoting International Policies .....	66
2. Promoting International Cooperation .....	67
3. Promoting International Standardization Activities .....	67

<b>Section 10: Development of Postal Administration</b>	
1. Efforts of Japan Post.....	68
2. Entry into the Correspondence Delivery Service .....	68
3. Promoting the Utilization of the Post Office Network as a Community Base.....	68
