# 2024 White Paper on Information and Communications in Japan

## **Table of Contents**

### Part 1

Special Feature 1 The Status of Information and Communications related to the 2024 Noto Peninsula Earthquake

#### Chapter 1

The Status of I	nformation and Communications related to the 2024 Noto Peninsula Earthquake	2
Section 1	Summary of the 2024 Noto Peninsula Earthquake	2
Section 2	Status of communication, broadcasting and postal services etc.	4
1. Da	mages to communication infrastructure	4
(1)	Fixed communications	4
(2)	Mobile communications (mobile phone etc.)	5
(3)	Others	7
2. Da	mages to broadcasting network ·····	8
(1)	Terrestrial broadcasting	8
(2)	Radio broadcasting	8
(3)	Cable broadcasting	8
3. Da	mages to postal offices etc.	9
4. Init	tiatives to ensure communication tools	9
(1)	Operation of mobile and portable base stations, mobile power supply vehicles, and generators	9
(2)	Utilization of mobile base stations	0
(3)	Utilization of satellite communication services 1	0
(4)	Lending of communication devices 1	1
(5)	Public Safety Mobile System (Formerly: Public Safety LTE) 1	1
(6)	Other initiatives by telecommunication operators 1	2
(7)	Dispatch of liaison personnel to the affected areas 1	2
5. Su	poprts etc. for necessary initiatives for recovery activities 1	2

The Roles which the Information and Communications Took and Challenges	13
Section 1 Information gathering and dissemination related to the disaster	13
1. How the information was gathered and collected related to the disaster	13
(1) Information gathering related to evacuation center	13
(2) Utilization of Suica for evacuee information management	14
(3) Establishment of a database for disaster victims	14
(4) Visualization of damage using various data	15
2. How the information was disseminated related to the disaster	18
(1) Information dissemination during disasters	18
(2) Information gathering and dissemination after disasters	19
3. How the citizens gathered the information related to the disaster	20
(1) Actions for confirming safety	20
(2) Information gathering actions immediately after the earthquake	21
(3) Encountering unverified information	22

4. Otł	her examples to utilize information and communications	24
(1)	Utilization of drones and robots ·····	24
(2)	Online provision of public services	25
Section 2	Highlighted issues and responses in the future	26
1. Co	mmunication ·····	26
(1)	Strengthening mobile base stations and optical fiber	26
(2)	Achieving intercarrier roaming in emergencies	26
(3)	Expanding the use of satellite communications	26
2. Bro	padcasting	27
3. Pos	stal services ·····	27
4. Res	sponse to dis-/mis-information	27
Column	Response to dis-/mis-information related to the disaster	28

# Special Feature 2 Living in Harmony with Evolving Digital Technologies

### Chapter 3

History of Digital Technologies	33
Section 1 History of development of AI and impacts of generative AI	33
1. History of development of AI ·····	33
(1) The first to third AI booms and the AI winters	34
2. Impacts of generative AI ·····	35
(1) Rapid progress and dissemination of generative AI	35
(2) Economic effects by generative AI	37
Section 2 Evolving technologies along with the progress of Al	38
(1) Virtual spaces (the metaverse and digital twin)	38
(2) Robotics	39
(3) Autonomous driving technology	41

ssues and Current Responses to Digital Technologies	······ 42
Section 1 Issues and current initiatives along with the advancement of Al	······ 42
1. Issues of generative AI ·····	······ 42
(1) Summary of major LLMs	43
(2) Domestically developed LLMs	44
2. Issues caused by generative AI	45
(1) Challenges and countermeasures for the circulation and spread of dis-/mis-information	······ 45
(2) Discussion on intellectual property rights including copyright	48
Section 2 Responses to Al by country	50
1. Trends in international discussion	50
(1) Hiroshima AI Process ·····	50
(2) Movements of the OECD/GPAI/UNESCO	······ 50
(3) AI Safety Summit ·····	51
(4) Developments in the United Nations	51
2. Trends in creation of legal rules and guidelines by country	52
(1) European Union (EU) ······	52
(2) The U.S	52
(3) The UK	53
(4) Japan ·····	54
Section 3 Trends in discussion on other digital technologies	55
1. Trends in discussion on the metaverse, robotics and automated driving	55

	(1) Metaverse ······	55
	(2) Robotics	55
	(3) Autonomous driving technology	56
2.	Trends in discussion to ensure cybersecurity	56

	Chapter 5	
enetration of	f Digital Technologies	57
Section 1	Status of use by the citizens and corporations	57
1. Ge	nerative AI ·····	• 57
(1)	Questionnaire to the general public	• 57
(2)	Questionnaire to corporates	• 59
2. Me	taverse	• 61
(1)	Questionnaire to the general public	• 61
(2)	Questionnaire to corporates	• 61
3. Rol	botics	• 62
4. Au	tomated driving	• 63
Section 2	Current situation and new trends of utilization	64
1. Ge	nerative AI driving business transformation	• 64
(1)	Trends in the introduction of generative AI in companies and public organizations	• 64
(2)	Trends in Utilization Across Various Fields and Industries	• 64
(3)	Utilization in public sector	• 67
2. Exp	pectations for solving social issues through advanced technology utilization	• 69
(1)	Metaverse ·····	• 69
(2)	Robotics	• 71
(3)	Autonomous Driving	• 73

Toward Living Further in Harmony with Digital Technologies	75
Section 1 Issues and necessary initiatives to live further in harmony with digital technologies	75
1. Promotion of use of digital technologies to strengthen industrial competitiveness and solve	
social issues ·····	75
(1) Initiatives to strengthen AI development capabilities	75
(2) Initiatives for utilizing digital technologies to solve social issues	76
(3) Efforts for improving market environment and user protection through enhanced transparency	76
2. Ensuring the healthiness of information circulation in digital space, improving the literacy and	
developing human resource	77
(1) Efforts to ensure the healthiness of information circulation in the digital space	77
(2) Efforts to improve literacy	78
(3) Human resource development in the era of generative AI	79
3. Realization of communication network which is a foundation of digital technologies	79
(1) Efforts toward the realization of Beyond 5G	79
(2) Realization of communication networks for autonomous driving	80
4. Creation and application of rules and international cooperation to ensure safe, secure and	
reliable use ·····	81
Column Towards a future of collaboration and coexistence with AI and robots (convivial relationships)	83

# Part 2 Current Status and Issues in the Information and Communications

Chapter 1	
Trends in the ICT Market	88
	00
Section 1 Trends in the ICT industry	88
1. Size of the ICT market ·····	• 88
2. Gross Domestic Product (GDP) of the ICT industry	• 89
3. IT investment ······	• 90
4. Exports and imports in the ICT field	• 91
5. Trend of R&D in the ICT field ·····	• 93
(1) Situation of research and development expenditure	• 93
(2) Situation of persons employed in research and development	• 94
(3) Patent situation	• 95
(4) Trends in research and development of major domestic and international companies in the	
ICT field ·····	• 95
(5) Example of research and development of new technologies in the ICT field: IOWN Optical	
and Wireless Network fusion device	• 96
Section 2 Trends in the telecommunication field	98
1. Trends in the domestic and overseas telecommunications market	• 98
2. Current status of the telecommunications field in Japan	• 99
(1) Market size ·····	. 99
(2) Number of carriers	• 99
(3) Infrastructure development status	• 99
(4) The status of traffic	101
(5) The status of use of broadband	101
(6) Satellite communications	102
(7) Status of voice communication service subscription contracts	102
(8) International comparison of communication charges	104
(9) Status of occurrence of telecommunications service accidents	104
(10) Complaints and consultations regarding telecommunications services and consultations	
on illegal and harmful information	104
3. New trends in the communications field	107
(1) Web3	107
(2) NTN (Non-Terrestrial Network)	107
Section 3 Trends in the broadcasting and content field	109
1. Broadcasting ·····	109
(1) Size of the broadcasting market	109
(2) Number of operators	110
(3) Status of the provision of broadcasting service	111
(4) Status of NHK ·····	112
(5) Utilization of broadcasting services	113
(6) Ensuring the safety and reliability of broadcasting equipment	114
2. Content market ·····	115
(1) Size of Japan's content market	115
(2) Advertising ·····	116
(3) Trends in overseas exports of Japan's broadcast content	118
Section 4 Trends in radio wave usage in Japan	119
1. Major use by frequency band	119
2. Trends in the number of radio stations ······	120
	-

3. Radio wave monitoring to eliminate obstruction of important radio communication etc.	121
Section 5 Trends related to ICT equipment and devices in Japan and overseas	123
1. Trends in the ICT equipment market in Japan and overseas	····· 123
(1) Market size ·····	····· 123
(2) Market trends by equipment type	124
2. Trends in the ICT device market in Japan and overseas	126
(1) Market size ·····	····· 126
(2) Market trends by device ·····	127
3. Trends in the import and export of ICT equipment and devices by country	129
4. Trends in the semiconductor market	130
Section 6 Trends in platforms	131
1. Market trends	131
2. Trends in major platform providers	133
Section 7 Trends in the market of ICT services and contents and application services	134
1 Social media service	134
2. E-commerce	134
3. Searching services	135
4. Video streaming, music streaming and e-book	135
5. New trends in the market of ICT services and contents and application services	136
(1) Alternative data	136
(2) Metaverse	137
(3) Digital twin	138
Section 8 Trends in the data center market and cloud services market	140
1 Data centers	140
1. Data centers	140
3 Edge computing	142
Section 9 Trends in Al	172
	144
1. Market overview	144
2. Trends in Al by country	145
Section 10 Trends of cybersecurity	146
1. Market overview ·····	146
2. Current status of cybersecurity ·····	147
(1) The increasing threat of cybersecurity	147
(2) Economic losses caused by cybersecurity issues	148
(3) Trends in wireless LAN security	148
(4) Adoption status of sender domain authentication technologies	148
Section 11 Trends in digital usage	149
1. Trends in digital usage in the daily life of the citizens	149
(1) Information and communication devices and terminals	149
(2) Internet ·····	150
(3) Utilization of digital services	153
2. Trends in utilization in corporate activities	160
(1) The Status of digitalization in each country's companies	160
(2) Telework and online meetings	163
3. Trends in digital usage in administration	166
(1) Usage of electronic administrative services (electronic applications, electronic tax filing,	
electronic notifications)	166
(2) Promotion of digital government in Japan	166
Section 12 Trends in postal service and correspondence delivery business	171
1. Postal service ·····	171
(1) Japan Post Group	171

(2) Japan Post Co., Ltd.	171
(3) Japan Post Bank Co., Ltd	173
(4) Japan Post Insurance Co., Ltd.	174
2. Correspondence delivery service	175
(1) Sales of correspondence delivery business	175
(2) Number of correspondence delivery service providers	175
(3) Correspondence delivery handling performance	175

ICT policy initiatives in the MIC	· 176
Section 1 Promotion of comprehensive ICT policies	- 176
1. Current status and issues	·· 176
(1) Progress of declining birthrate, aging population, and population decrease	- 176
(2) Frequent and severe disasters, aging social infrastructure	- 176
(3) Increasing complexity of international situations	·· 176
2. Initiatives to promote comprehensive ICT policies	·· 177
(1) Promoting efforts to realize the Vision of Digital Garden City Nation	• 177
Section 2 Trends in telecommunications business policies	· 178
1. Summary	• 178
(1) Initiatives so far	•• 178
(2) Future challenges and directions	·• 178
2. Examination of telecommunications policy in response to changes in the market environment	<b>-</b> 178
3. Creation of a fair competitive environment	· 179
(1) Analysis and verification of the telecommunications market	<b>•</b> 179
(2) Establishment of interconnection rules and other regulations	<b>••</b> 179
4. Development and maintenance of digital infrastructure	• 180
(1) Promotion of optical fiber development	· 180
(2) Decentralization of data centers and submarine cables	· 181
(3) Ensuring the provision of broadband services	•• 181
5. Ensuring the safety and reliability of telecommunications infrastructure	• 182
(1) Establishment of technical standards for telecommunications infrastructure development	<b>-</b> 182
(2) Ensuring communication services during emergencies	• 182
(3) Analysis and verification of telecommunications accidents	<b>-</b> 183
6. Creation of a safe and secure usage environments in telecommunication services	• 183
(1) Ensuring governance in the telecommunications sector	· 183
(2) Establishing consumer protection rules in the telecommunications sector	<b>•</b> 184
(3) Protection of secrecy of communication and user information	·· 185
(4) Measures against illegal and harmful information	·• 185
7. Mediation and arbitration by the Telecommunications Dispute Settlement Commission	· 186
(1) Functions of the Telecommunications Dispute Settlement Commission	· 186
(2) Commission Activities	• 187
Section 3 Trends in radio policy	• 188
1. Summary	• 188
(1) Initiatives so far	<b>··</b> 188
(2) Future challenges and directions	·• 188
2. Radio policy toward expansion of digital businesses	·· 188
(1) Examination of promoting effective use of radio waves for expanding digital business	· 188
3. Spread and development of 5G and B5G	· 189
(1) Promotion and deployment of 5G based on the Infrastructure Development Plan for a	. 190
(2) Revend 5C	- 109
(2) Deyond 3G	· 191

	4. Promotion of advanced radio use system	191
	(1) Advancement of wireless LAN	191
	(2) Non-Terrestrial Networks ·····	192
	(3) Advanced road traffic systems ·····	192
	(4) Public Safety Mobile System (Formerly: Public Safety LTE)	193
	(5) Spatial transmission wireless power transfer system	194
	5. Promotion of expansion of radio systems overseas	194
	6. Development of radio wave usage environment	195
	(1) Promotion of measures for electromagnetic environment protection for human health	195
	(2) Promotion of measures against electromagnetic interference	195
	(3) Prevention of radio wave interference and disruption	196
Se	ction 4 Trends in broadcasting policy	197
	1. Summary ·····	197
	(1) Initiatives so far	197
	(2) Future challenges and directions	197
	2. Examination of future vision of broadcasting institution in the digital age	198
	3. Future vision of public broadcasting	198
	4. Strengthening of the foundation of broadcasting businesses	199
	(1) Efforts related to AM radio broadcasting	199
	(2) Addressing issues in satellite broadcasting	199
	5. Promotion of the production and distribution of broadcasting contents	199
	(1) Promotion of production and distribution of broadcasting content	199
	(2) Overseas expansion of broadcasting content	200
	6. Promotion of broadcasts for people with the audiovisual disabilities	201
	7. Improvement to the resilience of broadcasting networks and enhancement of disaster	
	resistance	202
	(1) Optical fiber installation for cable networks	202
	(2) Support for initiatives by broadcasters	202
Se	ction 5 Trends in cybersecurity policy	204
	1. Summary	204
	(1) Initiatives so far	204
	(2) Future challenges and directions	204
	2. Ensuring safety and reliability of information and communications networks	205
	(1) Promotion of comprehensive IoT botnet countermeasures	205
	(2) Promotion of proactive cybersecurity measures by telecommunications operators	205
	(3) Initiatives for supply chain risk measures	206
	(4) Initiatives to ensure the safety of cloud services	206
	(5) Initiatives related to trust services	207
	3. Improvement of ability to handle cyberattacks autonomously	208
	(1) Initiatives for developing security personnel	208
	(2) Building an integrated cybersecurity intelligence and human resource development	
	platform (CYNEX)	209
	4. Promotion of international collaboration	210
	5. Promotion of awareness raising	210
	(1) Initiatives for telework security	210
	(2) Formation and promotion of locally rooted security communities (Regional SECUNITY)	210
	(3) Appropriate promotion of sharing and disclosure of information related to cyberattack	011
	damages	211
	(4) Initiatives related to wireless LAIN security	211
Se	ction 6 Promotion of ICT usage	212
	1. Summary ·····	212
	(1) Initiatives so far ·····	212
	(2) Future challenges and directions	212

2. Promotion of DX to contribute to stimulate local areas and economy	· 212
(1) Examination for the realization of vibrant local communities	· 212
(2) Discovery and development of ICT startups	· 214
(3) Promotion of telework	· 214
3. Responses to address the new issues along with the advancement of digital space	· 215
(1) Promoting the spread of AI and addressing risks	· 215
(2) Organizing issues related to the utilization of the metaverse and other technologies	· 215
(3) Comprehensive measures to address dis-/mis-information on the Internet	· 216
4. Realization of data distribution society toward the stimulation of Japan	· 217
(1) Development of disaster information systems	· 217
(2) Promotion of ICT utilization in the medical field	· 218
(3) Promotion of ICT utilization in the education field	· 218
(4) Promotion of cashless payments	· 218
(5) Promotion of safe and reliable cloud services	· 218
5. Creation of the safe and secure environment of ICT usage	· 219
(1) Improvement of support for digital utilization by the elderly and others	· 219
(2) Promotion of ICT literacy for a wide range of generations	· 219
(3) Establishment of a safe internet environment for the youth	· 210
(d) Support for research and development towards information barrier free	. 210
(4) Support for research and development towards mormation barrier nee	. 220
(6) Provision of telephone relevices as public infrastructure	. 220
(b) I forsion of telephone relay services as public initiasti ucture	. 220
Section 7 Trends in ICT technology policy	221
1. Summary ·····	· 221
(1) Initiatives so far ·····	· 221
(2) Future challenges and directions	· 221
2. Beyond 5G ·····	· 221
(1) Implementation of the Innovative Information and Communication Technology (Beyond	
5G (6G)) Fund Program ·····	· 221
(2) Promotion of intellectual property and standardization activities for Beyond 5G	· 222
(3) Trends in Japan and overseas surrounding Beyond 5G	· 223
(4) Formulation of a new information and communication technology strategy	· 224
3. AI technologies ·····	· 224
(1) Strengthening the development capability and risk response capability of LLMs	· 225
(2) Research and development for advanced multilingual translation technology	· 225
4. Quantum technologies ·····	· 226
(1) Trends in quantum security and network policy	· 226
(2) Research and development of quantum cryptographic communication technology	· 226
5. Remote sensing technologies ·····	· 227
6. Space ICT ·····	· 227
7. Supports for ICT startups	· 228
Section 8 Promotion of international strategies for ICT	229
1 Summary	. 220
1. Summary	. 229
(1) Initiatives so ha	. 220
2 Expansion of digital infrastructures overseas	. 229
(1) Oversees promotion support tools by the MIC	- <u>2</u> 29
(1) Overseas promotion for the Oversee Development of Jener's ICT and Development (ICT)	- <u>4</u> 29
(2) Efforts for everyons even seas Development of Japan's ICT and Postal Services (JICT)	· 230
(5) Enorts for overseas expansion in each field	231
5. Contribution to formulation of international rules on the digital economy	232
(1) Data Free Flow with Trust (DFFT)	232
(2) Response to discussions on international rules in cyberspace	232
(3) Promotion of trade liberalization in the ICT sector	- 232
(4) Promotion of strategic international standardization	, 233

4. Economic security in the digital field	233
5. International cooperation in multilateral frameworks ·····	233
(1) G7/G20 ·····	233
(2) Hiroshima AI Process ·····	234
(3) Asia-Pacific Economic Cooperation (APEC)	235
(4) Asia-Pacific Telecommunity (APT)	235
(5) Association of South-East Asian Nations (ASEAN)	235
(6) International Telecommunication Union (ITU)	236
(7) United Nations ·····	237
(8) World Trade Organization (WTO)	237
(9) Organisation for Economic Co-operation and Development (OECD)	237
(10) GPAI	238
(11) ICANN	238
6. International cooperation in bilateral relationships	238
(1) Policy cooperation with the U.S.	238
(2) Cooperation with Europe	239
(3) Cooperation with Asian-Pacific countries	240
(4) Cooperation with countries in Central and South America	241
(5) Cooperation with other regions	241
Section 9 Promotion of postal administration	242
1. Summary ·····	242
(1) Initiatives so far	242
(2) Future challenges and directions	242
2. Promotion of postal administration	242
(1) Ensuring universal service in postal business	242
(2) Contribution of post offices to local communities	243
(3) Utilization of data acquired and held by post offices	245
(4) Response to new initiatives by Japan Post Insurance and Japan Post Bank	245
(5) Review of operations at the Organization for Postal Savings, Postal Life Insurance and Post	
Office Network for the refund of fixed-term postal savings deposited before postal	
privatization ·····	246
3. Promotion of postal administration in the international field	247
(1) Response to the Universal Postal Union (UPU)	247
(2) Support for overseas deployment of Japanese postal infrastructure	247
(3) Global Postal Strategy Task Force	248
4. Trends in correspondence delivery ·····	248
