**PLENARY MEETING**

**Document DT/1-E  
30 November 2012  
English only**

**PROPOSALS RECEIVED FROM ITU MEMBER STATES  
FOR THE WORK OF THE CONFERENCE**

I have the honour to transmit to the Conference proposals received from ITU Member States which have been coordinated by the General Secretariat and published in **Documents WCIT-12/1 to 32\***. Complete texts of proposals and translations are available in the original contributions.

Dr Hamadoun I. TOURÉ  
Secretary-General

**\*Document being processed:**  
WCIT-12/22

**ADD** TUN/25/1

**1.0** 1.0 In implementing the provisions of these Regulations, Member States shall protect the Right to Freedom of Expression as recognized by Articles 19 of the Universal Declaration of Human Rights and the International Covenant on Civil and Political Rights, and by Article 33 of the Constitution; and thereby protect access to all dissemination means through telecommunication/ICTs in the exercise of this right as well as the freedom of online peaceful assembly and of association and all other rights on which States shall impose no limitations other than those permitted by international law, in particular international human rights law (HRC Resolution 21/25).

Member States acknowledge that the same rights that people have offline must also be protected online, in particular freedom of expression, which is applicable regardless of frontiers and through any media of one's choice, in accordance with Article 19 of the Universal Declaration of Human Rights and the International Covenant on Civil and Political Rights; (HRC Resolution 20/8).

In this regard, Member States shall ensure that any restrictions placed on the exercise of the Right to Freedom of Expression through the means of telecommunication/ICTs should be in accordance with the criteria set forth in Article 34 of the Constitution and of Article 19 of the International Covenant on Civil and Political Rights

**MOD** ACP/3A3/4

**2** 1.1 a) These Regulations establish general principles which relate to the provision and operation of international telecommunication services offered to the public as well as to the underlying international telecommunication transport means used to provide such services. They also set rules applicable to administrations\* operating agencies<sup>1</sup>, as the case may be. Article 6, No. 38 of the Constitution also applies.

**MOD** ARB/7/5

**2** 1.1 a) These Regulations establish general principles which relate to the provision and operation of international telecommunication/ICT services offered to the public as well as to the underlying international telecommunication transport means used to provide such services. **ADD** RCC/14A1/42

**27I** 2.19 *Operating agency*: Any individual, company, corporation or governmental agency which operates a telecommunication installation intended for an international telecommunication service or capable of causing harmful interference with such a service.

**ADD** CME/15/42

**27I** 2.20 *Emergency/distress telecommunications*: A special category of telecommunications with absolute priority for the transmission and reception of information relating to safety of life at sea, on land, in the air or in space, and of information of exceptional urgency concerning an epidemiological or epizootic situation issued by the World Health Organization.

**ADD** RCC/14A1/43

**27J** 2.20 *Calling party (number) identification*: Identification, on the basis of profile and registration records in the technical facilities of operating agencies, of a set of symbols uniquely identifying the calling party.

**ADD** CME/15/43

**27J** 2.21 *Personal data*: Any information relating to a physical person (the subject of the personal data) identified or identifiable on the basis of such information.

**ADD** RCC/14A1/44

**27K** 2.21 *Global telecommunication service (GTS)*: An international telecommunication service characterized by the existence of a single infrastructure complex, the location of whose components is distributed among two or more countries such that this complex as a whole cannot, in terms of its ownership or location, be attributed to any one country.

**ADD** CME/15/44

**27K** 2.22 *Integrity of the international telecommunication network*: The capability of the international telecommunication network to carry international traffic.

**ADD** RCC/14A1/45

**27L** 2.22 *Traffic*: The load constituted by all of the communications and signals transmitted via telecommunication networks over a given period of time.

**ADD** CME/15/45

**27L** 2.23 *Stability of the international telecommunication network*: The capability

of the international telecommunication network to carry international traffic in the event of failure of telecommunication nodes or links and also in the face of internal and external destructive actions and to return to its original state.

**ADD** IND/21/12

**27L** 2.25 *Stability of the international telecommunication network*: The capability of the international telecommunication network to carry international traffic in the event of failure of telecommunication nodes or links and also in the face of internal and external destructive actions and to return to its original state.

**ADD** KAZ/32/1

**27L** 2.22 *Traffic*: The volume of information constituted by all of the communications and signals transmitted via telecommunication networks over a given period of time.

**ADD** RCC/14A1/46

**27M** 2.23 *Tariff*: The price conditions proposed by an administration/operating agency for the use of telecommunication services.

**ADD** CME/15/46

**27M** 2.24 *Security of the international telecommunication network*: The capability of the international telecommunication network to withstand internal and external destabilizing actions liable to compromise its functioning.

**ADD** IND/21/13

**27M** 2.26 *Security of the international telecommunication network*: The capability of the international telecommunication network to withstand internal and external destabilizing actions liable to compromise its functioning.

**ADD** KAZ/32/2

**27M** 2.23 *Tariff*: The monetary expression of the value and size of the charging unit for telecommunication services.

**ADD** RCC/14A1/47

**27N** 2.24 *International telecommunication services user*: A party requesting and/or obtaining international telecommunication services.

**ADD** CME/15/47

**27N** 2.25 *International roaming*: Provision to the subscriber of the opportunity to use telecommunication services offered by other operating agencies, with which the subscriber has not concluded an agreement.

**ADD** IND/21/14

**27N** 2.27 *International Roaming*: Provision to the subscriber of the opportunity to use telecommunication services offered by other operating agencies of other member

states, with which the subscriber has not concluded an agreement.

**ADD** RCC/14A1/48

**27O** 2.25 *Subscriber*: An international telecommunication services user with whom a contract for the provision of such services has been concluded.

**ADD** CME/15/48

**27O** 2.26 *IP interconnection*: IP interconnection refers to technical and business solutions and rules to ensure the delivery of IP traffic through different networks.

**ADD** IND/21/15

**27O** 2.28 *IP interconnection*: IP interconnection refers to means and rules employed to ensure the delivery of IP traffic through different networks.

**ADD** CME/15/49

**27P** 2.27 *End-to-end quality of service delivery and best effort delivery*: End-to-end quality of service delivery refers to the delivery of PDU (Packet Data Unit) with predefined end-to-end performance objectives; Best-effort delivery refers to delivery of a PDU without predefined performance targets.

**ADD** IND/21/16

**27P** 2.29 *End to end quality of service delivery and best effort delivery*: End to End quality of service delivery refers to the delivery of PDU (Packet Data Unit) with predefined end-to-end performance objectives; Best-effort delivery refers delivery to of a PDU without predefined performance targets.

**31** 3.4 Subject to national law, any user, by having access to the international network established by an ~~administration\*~~operating agency, has the right to send traffic. ~~A satisfactory quality of service should be maintained to the greatest extent practicable, corresponding to relevant CCITT Recommendations.~~

**MOD** AFCP/19/40

**31** 3.4 Subject to national law, any user, by having access to the international network established by an ~~administration\*~~Operating Agency, has the right to send traffic. A satisfactory quality of service [and above a minimum level] should be maintained to the greatest extent practicable and as much as possible, corresponding to relevant ~~CCITT-ITU-T~~ Recommendations.

**MOD** MEX/20/32

**31** 3.4 Subject to national law, any user, by having access to the international network ~~established by an administration\*~~, has the right to send traffic. Member States shall encourage operating agencies recognized by them to maintain a satisfactory quality of service ~~should be maintained to the greatest extent practicable~~ for users, corresponding to relevant ~~CCITT-ITU-T~~ Recommendations.

**ADD** ACP/3A3/15

**31A** 3.4A Member States recognize that numbering resources are to be used only by the assignees and only for the purposes for which they were assigned, in accordance with the relevant ITU-T Recommendations. Member States shall endeavour to ensure that unassigned resources are not used. See also number 38 of Article 6 of the Constitution.

**ADD** ARB/7/34

**31A** 3.5 a) Member States shall ensure that international naming, numbering, addressing and identification resources specified in the Recommendations of ITU are used only by the assignees and only for the purposes for which they were assigned; and that unassigned resources are not used.

b) Member states shall, if they so elect, be able to control all naming, numbering, addressing and identification resources used within their territories for international telecommunications/ICT services.

**ADD** INS/8/2

**31A** 3.4A Recognizing the sovereign right of each Member, inter alia in regulating the degree of acceptability of information within their countries, administrations and service providers engaged with international network shall take due considerations in their cooperation in solving their diverse interests and their implications to the degree of

cybercrime.

**ADD** RCC/14A1/53

**31A** 3.3 Member States and administrations/operating agencies shall have the right to know which international routes are used for carrying traffic.

**ADD** CME/15/55

**31A** 3.5 Member States shall ensure that international naming, numbering, addressing and identification resources are used only by the assignees and only for the purposes for which they were assigned; and that unassigned resources are not used. The provisions of the relevant ITU-T Recommendations shall be applied.

**ADD** EUR/16A1/38

**31A** 3.5.A Member States should encourage recognized operating agencies to take measures to further robustness of their networks used for international telecommunication services.

3.5.B Member States are encouraged to cooperate in that sense.

**ADD** B/18/33

**31A** 3.5 Member States shall ensure that international naming, numbering, addressing and identification resources are used only by the assignees and only for the purposes for which they were assigned and that unassigned resources shall not be used. Member States shall also endeavour to prevent misuse and misappropriation of these resources.

**ADD** AFCP/19/41

**31A** 3.4A Member States shall ensure that the legal and regulatory frameworks and instruments applicable in their territories shall mandate Operating Agencies which operate in their territory and provide international telecommunications services offered to the public to apply the ITU-T Resolutions and Recommendations relating to naming, numbering, addressing and identification. Member States shall ensure that these resources are used only by the assignees and only for the purposes for which they were assigned; and that unassigned resources are not used.

**ADD** IND/21/17

**31A** 3.5 Member States shall ensure that international naming, numbering, addressing and identification resources are used only by the assignees and only for the purposes for which they were assigned; and that unassigned resources are not used. The provisions of the relevant ITU-T Recommendations shall be applied.

**ADD** CUB/26/1

**31A** 3.5 *International Internet connection conditions*

**MOD** RCC/14A1/54

**31AA** 3.45 ~~Subject to national law, any user~~The public, by having access to the

international telecommunication network ~~established by an administration\*~~, has the right to receive international telecommunication services ~~send traffic. A satisfactory quality of service should be maintained to the greatest extent practicable, corresponding to relevant CCITT Recommendations.~~

**ADD** ACP/3A3/16

**31B** 3.4B Member States shall endeavour to ensure that operating agencies\* provide international calling party number delivery taking in to account the relevant ITU-T Recommendations.

**ADD** ARB/7/35

**31B** 3.6 Member States shall, through various channels open to them, ensure that operating agencies:

- implement CLI features, where technically possible; including at least presentation of country code, national destination code or equivalent origination identifiers in accordance with the relevant Recommendations of ITU
- use appropriate standards when implementing CLI features,
- ensure that integrity and correctness of CLI is maintained end to end
- ensure that the requirements associated with data protection and data privacy are met; but any masked information shall be made available to duly authorized law enforcement agencies.

**ADD** RCC/14A1/55

**31B** 3.5 Member States shall ensure correct transmission of the calling party number/address/name/identity.

**ADD** CME/15/56

**31B** 3.6 Member States or operating agencies involved in a communication route – and in particular in transit nodes – shall ensure, to the greatest extent practicable, the provision, transport and forward of international calling party number delivery, calling line identification or origination identification, and its integrity end-to-end, in accordance with the relevant ITU-T Recommendations. Member States may provide for data privacy and data protection by authorizing the masking of information other than the country and operating agency identification codes or equivalent originating identifiers, but that masked information shall be made available to duly authorized law enforcement agencies.

**ADD** B/18/34

**31B** 3.6 Member States should encourage network operators and service providers to:

- implement calling party identification features in the international telecommunication services using naming, numbering and other resources, where technically possible;
- use appropriate standards when implementing calling party identification features;
- ensure the requirements associated with data protection, data privacy, consumer

protection, and emergency provisions are met, when implementing calling party identification features.

**ADD** AFCP/19/42

**31B** 3.4B Member states shall, through various channels open to them, ensure that Operating Agencies implement Calling Line Identification (CLI) features, where technically possible, including at least presentation of country code, national destination code or equivalent origination identifiers in accordance with the relevant ITU-T Recommendations; ensure that integrity of the CLI is maintained end-to-end; ensure that the requirements associated with data protection and data privacy are met, but such masked information shall be made available to duly authorized law enforcement agencies. Member States may impose additional obligations.

**ADD** MEX/20/33

**31B** 3.6 Members shall ensure, consistent with technical capabilities and national legal and regulatory frameworks, that operating agencies cooperate in the implementation and application of the following measures:

- Operating agencies originating calls must provide the prefix designating the calling country code, in conformity with the relevant ITU-T Recommendations.
- Transit operating agencies must cooperate in identifying and transmitting to termination operating agencies the code identifying the calling line corresponding to the traffic they receive.

**ADD** IND/21/18

**31B** 3.6 International calling party number delivery shall be provided in accordance with relevant ITU-T Recommendations.

**ADD** CUB/26/2

**31B** 3.6 Operating agencies involved in the provision of international Internet connections shall negotiate mutual agreements with the parties concerned, taking into account the possible need for fair compensation for the value of the corresponding constituent elements.

**ADD** ARB/7/36

**31C** 3.7 Member states shall take appropriate measures nationally to ensure that all parties (including operating agencies) involved in the provision of international telecommunication connections negotiate and agree to bilateral commercial arrangements, or an alternative type of arrangements, enabling direct international telecommunication connections that take into account the possible need for compensation between them for the value of elements such as traffic flow, number of routes, and cost of international transmission.

**ADD** CME/15/57

**31C** 3.7 Administrations shall take appropriate measures nationally to ensure that all parties (including operating agencies authorized by Member States) involved in the

provision of international Internet connections negotiate and agree to bilateral commercial arrangements, or an alternative type of arrangement between administrations, enabling direct international Internet-connections that take into account the possible need for compensation between them for the value of elements such as traffic flow, number of routes, geographical coverage and cost of international transmission, and the possible application of network externalities, amongst others.

**ADD** B/18/35

**31C** 3.7 Member States should foster the implementation of regional traffic exchange points with a view to improve quality, increase the connectivity and resilience of networks, and reduce the costs of international telecommunication connections.

**ADD** CUB/26/3

**31C** 3.7 *Non-discriminatory Internet access and use*

**ADD** RCC/14A1/56

**31D** 3.6 Member States shall endeavour to provide, in a timely manner, sufficient numbering, naming, identification and addressing resources on telecommunication networks and provide competing (including at global level) mechanisms for their allocation in order to meet the requirements of and demand for international telecommunication services.

**ADD** CUB/26/4

**31D** 3.8 Member States shall refrain from taking unilateral and/or discriminatory actions that could impede another Member State's access to public Internet sites.

**ADD** RUS/27/11

**31E** 3A.5 Member States should ensure that administrations and operating agencies cooperate in ensuring the integrity, reliable operation and security of the national Internet segment, direct relations for the carrying of Internet traffic and the basic Internet infrastructure.

**ADD** RUS/27/6

## ARTICLE 3A

### Internet

**ADD** RUS/27/7

**31A** 3A.1 Internet governance shall be effected through the development and application by governments, the private sector and civil society of shared principles, norms, rules, decision-making procedures and programmes that shape the evolution and use of the Internet.

**ADD** RUS/27/8

**31B** 3A.2 Member States shall have equal rights to manage the Internet, including in regard to the allotment, assignment and reclamation of Internet numbering, naming, addressing and identification resources and to support for the operation and development of basic Internet infrastructure.

**ADD** RUS/27/9

**31C** 3A.3 Member States shall have the sovereign right to establish and implement public policy, including international policy, on matters of Internet governance, and to regulate the national Internet segment, as well as the activities within their territory of operating agencies providing Internet access or carrying Internet traffic.

**ADD** RUS/27/10

**31D** 3A.4 Member States should endeavour to establish policies aimed at meeting public requirements with respect to Internet access and use, and at assisting, including through international cooperation, administrations and operating agencies in supporting the operation and development of the Internet.

**ADD** ACP/3A3/17

**38A** 4.4 Member States, shall ensure that operators providing international roaming normally provide to the user(s), no later than when that user enters into a visited country, free of charge, transparent and up-to-date information on retail rates except when that user has notified his/her home operator that the user does not require this service.

**ADD** ARB/7/45

**38A** 4.4 Member States shall ensure that operating agencies providing international telecommunication/ICT services at least provide, promptly and free of charge, transparent and up-to-date information on total retail charges (inclusive of all applicable taxes) to the end users, including international roaming charges.

**ADD** USA/9A2/13

**38A** 4.4 Member States shall foster measures to improve transparency in end user prices and terms and conditions of access to mobile services in international roaming as well as their effective and timely communication to the user.

**ADD** IAP/10/20

**38A** The Member States shall promote measures to ensure that telecommunication services are provided taking account of the special accessibility needs of persons with disabilities, including persons with age-related disabilities.

**ADD** RCC/14A1/65

**38A** 4.4 Member States shall ensure that operating agencies providing international telecommunication services, including roaming, make available to subscribers information on tariffs, including duties and fiscal taxes. Each subscriber should be able to have access to such information and receive it in a timely manner and free of charge when roaming (entering into roaming), except where the subscriber has previously declined to receive such information.

**ADD** CME/15/66

**38A** 4.4 Member States shall ensure that operating agencies providing international telecommunication services, including roaming, make available to subscribers information on tariffs, including duties and fiscal taxes. Each subscriber should be able to have access to such information and receive it in a timely manner and free of charge when roaming (entering into roaming), except where the subscriber has previously declined to receive such information.

**ADD** EUR/16A1/47

**38A** 4.4 Tariff transparency

Member States shall ensure that recognized operating agencies providing international telecommunication services, at least provide free of charge, transparent and up-to-date information on retail charges to the end users, including international roaming charges.

**ADD** AFCP/19/51

**38A** 4.4 Members States shall ensure transparency of end-user prices and the provision of clear information on how to access the services and the prices thereof, in particular to avoid unreasonable or surprising bills for international services (e.g. mobile roaming and data roaming), and shall ensure that Operating Agencies take the necessary measures to fulfill these requirements.

**ADD** IND/21/24

**38A** 4.4 Member States shall ensure that operating agencies providing international telecommunication services, including roaming, make available to subscribers information on tariffs and taxes. Each subscriber should be able to have access to such information and receive it in a timely manner and free of charge when roaming (entering into roaming), except where the subscriber has previously declined to receive such information.

**ADD** IAP/10/8

**38B** The Member States shall promote measures to improve the transparency of prices and conditions for end users of international roaming services and the effective and timely communication thereof to said users.

**ADD** RCC/14A1/66

**38B** 4.5 Member States shall ensure that operating agencies providing international telecommunication services, including roaming, make available to subscribers information on the cost of additional paid services, including calls to short numbers, provided by the operating agency, through to their completion.

**ADD** CME/15/67

**38B** 4.5 Given the particular characteristics of GTSs, which display both the features of international telecommunication services as well as their own specific features in the form of ubiquitous access in accordance with local legislations and of their own specially

assigned country codes allowing subscribers to have a single worldwide number, national legislation may insert and implement GTSs into national law to the effect that GTS are considered local services in the applicable jurisdiction.

**ADD** B/18/41

**38B** 4.5 Given the particular characteristics of GTSs, which display both the features of international telecommunication services as well as their own specific features in the form of ubiquitous access in accordance with local legislations and of their own specially assigned country codes, allowing subscribers to have a single worldwide number, Member States may insert and implement GTSs into national law.

**ADD** IND/21/25

**38B** 4.5 Given the particular characteristics of GTS, which allows subscribers to have a worldwide number, implement GTSs in accordance with the National regulations.

**ADD** IAP/10/9

**38C** Member States shall implement measures to ensure that telecommunications services in international roaming of satisfactory levels of quality, comparable to that provided to their own local users, are provided to visiting users.

**ADD** RCC/14A1/67

**38C** 4.6 Member States shall ensure that operating agencies providing international telecommunication services, including roaming, make available to subscribers the option of declining any additional paid international telecommunication services.

**ADD** CME/15/68

**38C** 4.6 Member States shall implement measures to ensure that telecommunication services in international roaming of satisfactory levels of quality, comparable to that provided to their own local users, are provided to visiting users.

**ADD** IAP/10/18

**38D** Member States shall, as appropriate, foster the establishment of mutual agreements on mobile services accessed within a predetermined border zone in order to prevent or mitigate inadvertent roaming charges.

**ADD** CME/15/69

**38D** 4.7 Operating agencies shall cooperate in the development of international IP interconnections providing both, best effort delivery and end to end quality of service delivery. Best effort delivery should continue to form the basis of international IP traffic exchange.

**ADD** CME/15/70

**38E** 4.8 Member States shall foster the establishment of mutual agreements on mobile services accessed within a predetermined border zone in order to prevent or mitigate inadvertent roaming charges.

**ADD** IND/21/26

**38E** 4.8 Member States, subject to national security requirements, may foster the establishment of mutual agreements on mobile services accessed within a predetermined border zone in order to prevent or mitigate inadvertent roaming charges.

RESOLUTION NO. 1

**Dissemination of Information Concerning  
International Telecommunication Services  
Available to the Public**

The World ~~Administrative Telegraph and Telephone Conference (Melbourne, 1988)~~Conference on International Telecommunications (Dubai, 2012),

*considering*

- a) that ~~the Conference~~WATTC-88 (Melbourne, 1988) has adopted provisions regarding international telecommunication services offered to the public and a Resolution on Dissemination of Operational and Service Information;
- b) that these provisions apply to current and new telecommunication environments in which technology, facilities, operators, services, service providers, customer needs and operational practices are rapidly changing;
- c) that the ~~CCITT~~ITU-T is responsible for developing Recommendations on these matters, especially with respect to efficient global interconnection and interoperability;

d) that the International Telecommunication Regulations provide a general framework ~~as a supplement to the International Telecommunication Convention~~ with respect to international telecommunication facilities and services available to the public,

*noting*

that the ~~CCITT~~ITU-T, in establishing Recommendations, has characterized a number of services which may be made available to the public,

*resolves*

that, with a view to promoting the global interconnection and interoperability of telecommunication facilities as well as the availability to the public of international telecommunication services, all Members ~~and~~ States should arrange for the Secretary-General to be notified, as part of the provisions concerning the dissemination of information, of those international telecommunication services which administrations <sup>\*</sup>/operating agencies make available to the public in their respective countries,

*instructs the Secretary-General*

to disseminate that information by the most suitable and economical means.

**Cooperation of the Members of the Union in Implementing  
the International Telecommunication Regulations**

The World ~~Administrative Telegraph and Telephone Conference (Melbourne, 1988)~~  
Conference on International Telecommunications (Dubai, 2012),

*recalling*

the principle of the sovereign right of each country to regulate its telecommunication as embodied in the Preamble to the Constitution of the International Telecommunication Convention (Nairobi, 1982) Union, and in the Preamble to the International Telecommunication Regulations as well as the purposes of the Union contained in Article 41 of ~~that Convention~~ the Constitution,

*realizing*

that, in the case of difficulties in the applicable national law in the implementation of the International Telecommunication Regulations, appropriate cooperation amongst the Members concerned is desirable,

*resolves*

that, upon request by a Member concerned about the limited effectiveness of its national law in relation to international telecommunication services offered to the public in its territory, the Members concerned shall, where appropriate, consult on a reciprocal basis, with a view to maintaining and extending international cooperation between Members of the Union, in the spirit of Article 41 of the above-mentioned ~~Convention~~ Constitution for the improvement and rational use of telecommunications, including the orderly use of the international telecommunication network.

RESOLUTION NO. 4

**The Changing Telecommunication Environment**

The ~~World Administrative Telegraph and Telephone Conference (Melbourne, 1988)~~, World

Conference on International Telecommunications (Dubai, 2012),

*recalling*

- a) Resolution 71 (Rev. Guadalajara, 2010), The Strategic Plan for the Union,
- b) Resolution 139 (Rev. Guadalajara, 2010), Telecommunications/information and communication technologies to bridge the digital divide and build an inclusive information society,
- c) The 2005 World Summit on the Information Society (WSIS) outcome documents;

that Resolution No. 10 of the Plenipotentiary Conference (Nairobi, 1982) provided for the convening of a World Administrative Telegraph and Telephone Conference (WATTC) in 1988 to develop a new regulatory framework for all existing and foreseen telecommunication services,

*in view of*

the Report of the fifth World Telecommunications Development Conference (Hyderabad, 2010) highlighting the importance of telecommunications infrastructure and technology development, particularly in developing countries, and adopting regional initiatives and the Hyderabad Action Plan to assist developing countries achieve more universal access to telecommunications,

a) the adoption by the Conference of the new International Telecommunication Regulations (Melbourne, 1988) which recognize the diverse service and policy elements in the changing telecommunication environment,

*considering*

1. that the Geneva Declaration of Principles adopted by WSIS recognized that policies creating a favorable climate for stability, predictability, and fair competition at all levels should be developed and implemented in a manner that attracts more private investment in telecommunications infrastructure;

b) the potential benefits of the rapid introduction of new and diverse telecommunication services, including those recognized in the Resolution 66/184 of the United Nations General Assembly, to provide new solutions to development challenges and foster sustained, inclusive and equitable economic growth, development, competitiveness, access to information and knowledge, poverty eradication and social inclusion that will help to integrate all countries, especially developing countries, in particular the least developed countries, into the global economy;

c) that the introduction of new technologies and telecommunication services will continue to raise new issues;

d) that, as a result of the diverse service and policy elements, many Members have expressed concern about the possible adverse implications of certain provisions in the new Regulations,

*considering further*

the importance of ensuring appropriate and harmonious introduction and world-wide

application of the wide range of services evolving with the new technologies,

recognizing

a) that, as stated in § 22 of the Geneva Declaration of Principles adopted by WSIS, a well-developed information and communication network infrastructure and applications, adapted to regional, national, and local conditions, easily accessible and affordable, and making greater use of broadband and other innovative technologies where possible, can accelerate the social and economic progress of countries, and the well-being of all individuals, communities, and peoples;

b) the importance of competition in promoting investment, as recognized by the ITU/UNESCO Broadband Commission for Digital Development (“Broadband: A Platform for Progress.” September 2010);

c) the policy recommendations for encouraging broadband infrastructure development of the ITU/UNESCO Broadband Commission for Digital Development (“The State of Broadband 2012: Achieving Digital Inclusion for All”) to create a favorable environment for investment in telecommunications infrastructure by:

i) providing policy leadership for investment, including open consultations on necessary policy and legal frameworks;

ii) opening telecommunications markets to competition through licensing and

taxation reforms, including transparent licensing regimes;

iii) enabling government services that will stimulate demand for and investment in

telecommunications, especially in developing countries;

iv) establishing a universal service program to support telecommunications infrastructure investment; and

v) encouraging efficient and innovative mobile broadband practices for new market entrants and consumers,

instructs the Secretary General

to transmit this Resolution to the Administrative Council for subsequent consideration by the Plenipotentiary Conference (Nice, 1989),

invites the Plenipotentiary Conference

1 to consider the implications and opportunities which the integration of the new technologies, the development of new types of services and the diversity of arrangements may entail for the harmonious and efficient development, operation, and use of telecommunications world-wide;

2 to consider the impact that the various issues may have on the work of the International Telecommunication Union and the cooperation between the Members in assuring effective world-wide implementation of telecommunication development.

resolves to invite Member States

1. to take into account, further to recognizing (c)(i)-(v), increasing access to new and existing telecommunications infrastructure;

2. to create and promote widespread affordable access to telecommunications infrastructure by enabling legal and regulatory environments that are fair, transparent, stable, predictable and non-discriminatory; and that promote competition, foster continued technological and service innovation, and encourage private sector investment incentives;
- c) to continue to work within relevant ITU sectors and study groups to share best practices regarding the implementation of progressive regulatory regimes designed to liberalize markets, promote competition and stimulate investments.

RESOLUTION NO. 6

**Continued Availability of Traditional Services**

The World ~~Administrative Telegraph and Telephone Conference (Melbourne, 1988)~~  
Conference on International Telecommunications (Dubai, 2012),

*considering*

- a) that provisions regarding telecommunication services available to the public have been made in the International Telecommunication Regulations;
- b) that those Regulations do not, however, provide a detailed list of the international telecommunication services required to be made available to the public;
- c) that under those Regulations, Members shall endeavour to ensure that users are provided with a capability for interworking between different services, as appropriate, to facilitate international communications;
- d) that keeping in mind the universality of communications, it would be desirable to ensure to the greatest extent possible, in the absence of establishment of new services in many Member countries, that the public in those countries should have continuing effective use of traditional services to communicate on a world-wide basis;
- e) that certain rural areas and developing countries, in particular, may need to rely on existing widely available services for international communications for a relatively long period of time,

*resolves*

that all Members should cooperate to ensure that, pending the establishment of new telecommunication services, in particular in the areas and countries referred to in e) above, provisions should be made to allow, through available communication infrastructures, continued availability of traditional services so as to enable effective communications on a world-wide basis.

### Dissemination of Operational and Service Information Through the General Secretariat

The World ~~Administrative Telegraph and Telephone Conference (Melbourne, 1988)~~  
Conference on International Telecommunications (Dubai, 2012),

*in view of*

a) Nos. ~~291, 293 and 294~~98 of the Convention of the International  
Telecommunication ~~Convention (Nairobi, 1982)~~Union concerning the ~~general~~ information  
dissemination functions of the Secretary-General;

b) Article 8 of the International Telecommunication Regulations (~~Melbourne,~~  
1988Dubai, 2012),

*considering*

a) the importance of exchanging administrative, operational, tariff and statistical  
information in a cost-effective manner in order to facilitate the efficient and smooth  
operation of international telecommunication routes and services;

b) the need for timely dissemination of such information to  
administrations <sup>\*</sup>/operating agencies;

c) that such information is available at present in the following examples of  
operational and service publications:

- List of telegraph offices
- Gentex table
- TA Table (transferred account)
- Codes and abbreviations for the use of the international telecommunication  
services
- Table of international telex relations and traffic
- List of destination indicators for the telegram retransmission system and of telex  
network identification codes
- Bureaufax table
- Yearbook of common carrier telecommunication statistics

- List of international telephone routes
- Table of rates for telegrams
- Directory of information on programme booking centres, international sound programme centres, international television programme centres and centres for maintaining sound and television programme circuits
- Message handling/physical delivery service profile tables
- Information for the operation of the international telegraph, data transmission and Telematic services
- TA Booklet (transferred account)
- List of telecommunication channels used for the transmission of telegrams
- List of cables forming the world submarine network
- Notification
- Operation Bulletin,

*resolves*

that operational and service information helpful to the smooth and efficient functioning of international telecommunications shall be disseminated by the General Secretariat in an appropriate form,

*invites ~~Administrations~~ Member States*

to encourage the provision of appropriate information, to the extent practicable, in a timely fashion and in accordance with national arrangements,

*instructs the Secretary-General*

1 to disseminate the above-mentioned information by the most suitable and economical means;

2 to revise, update, cancel, or create such publications as necessary, taking account of:

- i) the directives of a competent conference or of the ~~Administrative-ITU Council-of the Union~~;
- ii) the ~~r~~Recommendations of the ~~Plenary Assembly of the CCITT World Telecommunication Standardization Assembly~~; and, exceptionally;
- iii) the results of consultation by correspondence with ~~Administrations~~ Member States.

**Instructions for International Telecommunication Services**

The World ~~Administrative Telegraph and Telephone Conference (Melbourne, 1988)~~  
Conference on International Telecommunications (Dubai, 2012),

*recalling*

- a) the reasons for which the WATTC (Geneva, 1973) introduced the concept of Instructions for a collection of provisions drawn from one or more CCITT Recommendations dealing with practical procedure for operation and tariff arrangements which have to be brought into force on a specific date in order to ensure their observance at the world level;
- b) the special importance attached by WATTC (Geneva, 1973) to Instructions as a means of ensuring the orderly and efficient operation of certain telecommunication services available world-wide,

*considering*

~~a) that the International Telecommunication Convention (Nairobi, 1982), in No. 288, refers to "operating instructions";~~

~~b) that Articles 1 and 2 of the International Telecommunication Regulations (Melbourne, 1988Dubai, 2012) also make reference to "Instructions";~~

~~b) that the IXth CCITT Plenary Assembly (Melbourne, 1988) approved a new Recommendation C.3 concerning "Instructions for International Telecommunication Services";~~

*instructs the ~~CCITT~~ITU-T*

to devote particular attention to any new Recommendations which by their content should be the subject of Instructions, and to revise and supplement Table I of Recommendation C.3 as required,

*invites the administrations\*/operating agencies*

to take all necessary steps to ensure that their operational units are informed, as soon as possible, of any amendments to existing Instructions and any new Instructions approved by ~~CCITT Plenary Assemblies~~ITU-T,

*instructs the Secretary-General*

1 to publish all operational provisions which the ~~CCITT~~ITU-T considers as "Instructions";

2 to gather and publish the decisions taken by ~~administrations\*~~Member States regarding certain optional provisions contained in Instructions which require mutual exchange of information regarding their application.

#### DRAFT NEW RESOLUTION [ACP-1]

##### **Special measures for landlocked developing countries and small island**

## **developing states for access the international optical fibre network**

The World Conference on International Telecommunications (Dubai, 2012),

### *considering*

- a) Resolution 65/172 of 20 December 2010 of the United Nations General Assembly on specific actions related to the particular needs and problems of landlocked developing countries;
- b) Resolution 30 (Rev. Guadalajara, 2010) of the Plenipotentiary Conference on special measures for the least developed countries, small island developing states, landlocked developing countries and countries with economies in transition;
- c) the Millennium Declaration and the 2005 World Summit Outcome;
- d) the outcome of the Geneva (2003) and Tunis (2005) phases of the World Summit on the Information Society (WSIS);
- e) the Almaty Declaration and Almaty Programme of Action Addressing the Special Needs of Landlocked Developing Countries within a New Global Framework for Transit Transport Cooperation for Landlocked and Transit Developing Countries,

### *recalling*

the New Partnership for Africa's Development (NEPAD), which is an initiative intended to boost economic cooperation and development at regional level, given that many landlocked and transit developing countries are in Africa,

### *reaffirming*

- a) the right of access of landlocked countries to the sea and freedom of transit through the territory of traffic transiting countries by all means of transport, in accordance with applicable rules of international law;
- b) that traffic transiting countries, in the exercise of their full sovereignty over their territory, have the right to take all measures necessary to ensure that the rights and facilities provided for landlocked countries in no way infringe upon their legitimate interests,

### *recognizing*

- a) the importance of telecommunications and new information and communication technologies (ICT) to the development of LLDCs and SID;
- b) current difficulties of the countries mentioned above continue to adversely affect their development,

### *noting*

that access to the international optical fibre network for LLDCs and SIDS and the laying of optical fibre across traffic transiting countries are not indicated in the infrastructure development and maintenance priorities in the Almaty Programme of Action,

### *conscious*

- a) that fiber optic cable is a profitable telecommunications transport medium;
- b) that access within landlocked countries to the international fiber optic network will promote their integral development and the potential for them to create their own Information Society;

- c) that the planning and laying of international optical fibre calls for close cooperation between landlocked and traffic transiting countries;
- d) that in making the basic investment in laying fiber optic cable, capital investments by the private sector are required,

*resolves to instruct the Director of the Telecommunication Development Bureau*

1 to study the special situation of telecommunication/ICT services in the LLDCs and SIDS, taking into account the importance of access to the international fiber optic network at reasonable costs;

2 to report to the ITU Council of measures taken with respect to the assistance provided to LLDCs and SIDS as referred to instructs 1;

3 to assist countries mentioned above to develop their required plan that contains practical guidelines and criteria to govern and promote sustainable regional, subregional, multilateral, and bilateral projects affording LLDCs and SIDS greater access to the international fiber optic network,

*invites Member States*

1 to cooperate with landlocked countries by promoting regional, subregional, multilateral, and bilateral projects for telecommunication infrastructure integration that afford LLDCs and SIDS greater access to the international fiber optic network;

2 to take appropriate measures to ensure that the Member States to collaborate actively in the development of telecommunication/ICT services in LLDCs and SIDS;

3 to assist landlocked developing countries, traffic transiting countries and SIDS in executing telecommunication infrastructure integration projects,

*encourages landlocked developing countries and SIDS*

to continue to accord high priority to telecommunication/ICT activities and projects that promote integral socioeconomic development, adopting technical cooperation activities financed from bilateral or multilateral sources that will benefit the general public,

*invites Member States, Sector Members, Associates and Academia*

to continue support the work of ITU-D in studies of the situation of telecommunication/ICT services in the least developed countries, LLDCs and SIDS, small island developing states, and countries with economies in transition so identified by the United Nations and requiring special measures for telecommunication/ICT development,

*instructs the Secretary-General*

to bring this resolution to the attention of the Secretary-General of the United Nations, with a view of bringing it to the attention of the United Nations High Representative for the Least Developed Countries (LDCs), Landlocked Developing Countries (LLDCs) and Small Island Developing States (SIDSs) their special needs.

**ADD** ACP/3A3/44

DRAFT NEW RESOLUTION [ACP-2]

**Countering and combating spam**

The World Conference on International Telecommunication, Dubai 2012

*recognizing*

- a) objectives enshrined in the Basic Instruments of ITU;
- b) that the "Declaration of Principles" of the World Summit on the Information Society (WSIS) states in § 37 that:  
"Spam is a significant and growing problem for users, networks and the Internet as a whole. Spam and cybersecurity should be dealt with at appropriate national and international levels";
- c) that the WSIS "Plan of Action" states in § 12 that:  
"Confidence and security are among the main pillars of the information society" and calls for "appropriate action on spam at national and international levels",

*recognizing further*

- a) that the instruction given in Resolution 52 (WTSA-08 Johannesburg) to ITU-T study groups with respect to countering and combating spam;
- b) the instruction given to the Director of Telecommunication Standardization Bureau in Resolution 52(WTSA-08 Johannesburg) to ITU-T study groups with respect to countering and combating spam;
- c) that one of the strategic goals of the ITU Telecommunication Standardization Sector (ITU-T) of the strategic plan for the Union for 2012-2015 ( section 5.4 ) set out in Resolution 71 (Rev. Guadalajara, 2010) of the Plenipotentiary Conference;
- d) the report of the chairman of the two ITU WSIS the meetings on countering and combating spam, which advocated a comprehensive approach to combating spam, namely:
  - i) strong legislation
  - ii) the development of technical measures
  - iii) the establishment of industry partnerships to accelerate the studies
  - iv) education
  - v) international cooperation,

*aware*

that the resolution 130 of the Plenipotentiary Conference (Rev. Guadalajara, 2010) resolves that "ITU shall focus resources and programmes on those areas of cybersecurity within its core mandate and expertise, notably the technical and development spheres, and not including areas related to Member States' application of legal or policy principles related to national defence, national security, content, and cybercrime, which are within their sovereign rights, although, this does not however exclude ITU from carrying out its mandate to develop technical recommendations designed to reduce vulnerabilities in the ICT infrastructure",

*considering*

- a) that spam has become a widespread problem causing potential loss of revenue

to Internet service providers, telecommunication operators, mobile telecommunication operators and business users;

- b) that spam creates problems of information and telecommunication network security, and is increasingly being used as a vehicle for phishing and spreading viruses, worms, spyware and other forms of malware, etc.;
- c) that spamming is used for criminal, fraudulent or deceptive activities;
- d) that spam is a global problem that requires international cooperation in order to find solutions;
- e) that addressing the issue of spam is a matter of urgency;
- f) that many countries, in particular developing countries, including the least developed countries, small island developing states and countries with economies in transition, need help when it comes to countering spam;
- g) that relevant Recommendations of the Telecommunication Standardization Sector (ITU-T) and relevant information from other international bodies are available which could provide guidance for future development in this area, particularly with regard to lessons learned;
- h) that technical measures to counter spam represent one of those approaches mentioned in recognizing further b) above,

*noting*

the important technical work carried out to date in ITU-T Study Group 17 and in particular Recommendations ITU-T X.1231 (Technical strategies for countering spam), X.1240 (Technologies involved in countering e-mail spam) and X.1241 (Technological framework for countering e-mail spam),

*resolves to urge Member States*

- 1 to take appropriate steps within their national legal frameworks to ensure that appropriate and effective measures are taken to counter and combat spam;
- 2 to continue developing technical and self-regulatory measures including best practices to counter spam,

*Instructs the Secretary General*

to report to the annual session of the Council and the future Plenipotentiary Conferences of the actions being taken and progress made on the matter,

*invites Member States, Sector Members, Associates and Academia*

to contribute to this work.

**ADD** ACP/3A3/45

DRAFT NEW RESOLUTION [ACP-3]

**Non-discriminatory access to Internet**

The World Conference on International Telecommunication, Dubai, 2012

*considering*

that one of the purposes of ITU laid down in Article 1 of the ITU Constitution is "to maintain and extend international cooperation among all its Member States for the improvement and rational use of telecommunications of all kinds",

*considering further*

approved documents of the World Summit on the Information Society (WSIS), Geneva 2003 and Tunis 2005, in its Declaration of Principles, especially §§ 11, 19, 20, 21 and 49 thereof,

*noting*

that § 48 of the WSIS Declaration of Principles recognized that: "The Internet has evolved into a global facility available to the public and its governance should constitute a core issue of the Information Society agenda. The international management of the Internet should be multilateral, transparent and democratic, with the full involvement of governments, the private sector, civil society and international organizations. It should ensure an equitable distribution of resources, facilitate access for all and ensure a stable and secure functioning of the Internet, taking into account multilingualism",

*recognizing*

a) that the second phase of WSIS (Tunis, November 2005) identified ITU as the possible moderator/facilitator for the following WSIS Action Lines from the Plan of Action: C2 (Information and communication infrastructure) and C5 (Building confidence and security in use of the ICTs);

b) that the Plenipotentiary Conference (Guadalajara, 2010) entrusted the ITU Telecommunication Standardization Sector (ITU-T) with a range of activities aimed at implementing the WSIS (Tunis, 2005) outcomes, a number of those activities having to do with Internet-related issues;

c) that management of the registration and allocation of Internet domain names and addresses must fully reflect the geographical nature of the Internet, taking into account an equitable balance of interests of all stakeholders,

*taking into account*

Resolutions 101, 102, 130 and 133 of Plenipotentiary Conference (Guadalajara, 2010),

*conscious of*

WSIS outcome on internet governance as mentioned in paragraph 78 of Tunis Agenda,

*recognizing further*

a) that developing Recommendations to combat spam falls within the strategic plan for the Union for 2012-2015 (Part 5§) set out in Resolution 71 (Rev. Guadalajara, 2010) of the Plenipotentiary Conference;

b) Mission and goals of the Union including Strategic goal of the Telecommunication Standardization Sector (ITU-T) as contained in Resolution 71 (Rev.

Guadalajara,2010).

c) that the World Telecommunication Standardization Assembly ,Johannesburg in its Resolution 69 (WTSA-08, Johanesburg,2008) addressed the issue of non-discriminatory access and use of Internet resources,

*taking into account*

a) that ITU-T is dealing with technical and policy issues related to IP-based networks, including the Internet and next-generation networks;

b) that a number of the resolutions of adopted by the World Telecommunication Standardization Assembly 2008, Johannesburg, deal with Internet-related issues,

*resolves*

1 that Member States and/or Operating Agencies, as the case may be, relevant organization operating and functioning in their countries and under their jurisdiction, refrain from taking any unilateral and/or discriminatory actions that could impede another Member State from accessing Internet , within the spirit of Article 1 of the Constitution and the WSIS principles;

2 to invite Member States to inform the ITU on any incident referred to in resolves 1) above,

*instructs the Director of the Telecommunication Standardization Bureau*

1 to integrate and analyze the information on incidents reported from Member States;

2 to report this information to Member States, through an appropriate mechanism,

*invites Member States and Sector Members*

to submit contributions to the ITU-T study groups that contribute to the prevention and avoidance of such practices.

**ADD** ACP/3A3/46

## DRAFT NEW RESOLUTION [ACP-4]

### **Misappropriation of international telecommunication services and resources**

The World Conference on International Telecommunication, Dubai 2010

*recognizing*

the purposes of the Union to foster collaboration among the membership for the harmonious development of telecommunications and to enable the offering of services at lowest cost,

*recognizing further*

a) that the fraudulent misappropriation of national telephone numbers and

country codes is inappropriate and harmful;

b) that the blocking of calls by barring the country code to a country in order to avoid fraud is also inappropriate and harmful;

c) relevant provisions of the ITU Constitution and Convention and Resolutions adopted by ITU Plenipotentiary Conferences,

*recalling*

a) Resolution 29 of World Telecommunication Standardization Assembly, Johannesburg, 2008 concerning alternative calling procedures on international telecommunication networks, which (citing ITU Council Resolution 1099) urged the ITU Telecommunication Standardization Sector (ITU-T) to develop, as soon as possible, the appropriate Recommendations concerning alternative calling procedures;

b) Recommendation ITU-T E.156, which sets out guidelines for ITU-T action on reported misuse of E.164 numbering resources, and Recommendation ITU-T E.156 Supplement 1, which provides a best practice guide on countering misuse of E.164 numbering resources,

*resolves*

1 that Member States shall endeavor to provide mechanism (s) to allow their respective Operating Agencies, National Regulator(s), and any other recognized entities dealing with the telecommunication services/networks under their jurisdiction to release routing information in cases of fraud, within the constraints of national laws and applicable regulatory frameworks;

2 that Member States collaborate and endeavor to share information on fraudulent activities related to misuse of international numbering resources and to consider sharing information about these activities;

3 that Member States, taking into account the relevant ITU-T Recommendations, promote a more effective basis for dealing with fraudulent activities due to number misappropriation and other sort of fraudulent activities, which would help limit the negative effects of these fraudulent activities and the blocking of international calls to developing countries<sup>3</sup>;

4 that Member States take all necessary measures in order to mitigate the adverse effects of fraudulent number misappropriation and blocking of calls to certain developing countries and any other fraudulent activities,

*resolves further*

that Member States endeavor to ensure that Operating Agencies authorized by them or functioning in the territories under their jurisdiction to take all necessary measures, within the constraints of their national laws and regulatory frameworks, to obtain information necessary to address issues related to number misappropriation and other fraudulent activities,

---

<sup>3</sup> These include the least developed countries, small island developing states and countries with economies in transition.

*Instruct the Director, Telecommunication Standardization Bureau*

to request Study Groups 2 and 3 to accelerate studies on all aspects and forms of misappropriation of international country codes, with a view to amending Recommendation ITU-T E.156 and its Supplement 1 so as the matter be resolved in a satisfactory manner and to study the economic effects of call blocking on developing countries, respectively.

## DRAFT NEW RESOLUTION [CME-1]

### **Special measures for landlocked developing countries (LLDCs) for access the international optical fibre network**

The World Conference on International Telecommunications (Dubai, 2012),

*considering*

- a) resolution 65/172 of 20 December 2010 of the United Nations General Assembly on specific actions related to the particular needs and problems of landlocked developing countries;
- b) Resolution 30 (Rev. Guadalajara, 2010) of the Plenipotentiary Conference on special measures for the least developed countries, small island developing states, landlocked developing countries and countries with economies in transition,

*considering further*

- a) the Millennium Declaration and the 2005 World Summit Outcome;
- b) the outcome of the Geneva (2003) and Tunis (2005) phases of the World Summit on the Information Society (WSIS);
- c) the Almaty Declaration and Almaty Programme of Action Addressing the Special Needs of Landlocked Developing Countries within a New Global Framework for Transit Transport Cooperation for Landlocked and Transit Developing Countries,

*recalling*

the New Partnership for Africa's Development (NEPAD), which is an initiative intended to boost economic cooperation and development at regional level, given that many landlocked and transit developing countries are in Africa,

*reaffirming*

the right of access of landlocked countries to the sea and freedom of transit through the territory of transit countries by all means of transport, in accordance with applicable rules of international law,

*reaffirming further*

that transit countries, in the exercise of their full sovereignty over their territory, have the right to take all measures necessary to ensure that the rights and facilities provided for landlocked countries in no way infringe upon their legitimate interests,

*recognizing*

the importance of telecommunications and new information and communication technologies (ICT) to the development of LLDCs,

*noting*

that access to the international optical fibre network for LLDCs and the laying of optical fibre across transit countries are not indicated in the infrastructure development and maintenance priorities in the Almaty Programme of Action,

*concerned*

since this difficulty affecting LLDCs continues to jeopardize their development agendas,

*conscious*

- a) that fiber optic cable is a profitable telecommunications transport medium;
- b) that access within landlocked countries to the international fiber optic network will promote their integral development and the potential for them to create their own Information Society,

*conscious also*

- a) that the planning and laying of international optical fibre calls for close cooperation between landlocked and transit countries;
- b) that in making the basic investment in laying fiber optic cable, capital investments by the private sector are required,

*instructs the Secretary-General and the Director of the Telecommunication Development Bureau*

- 1 to ensure that studies of the situation of telecommunication/ICT services in the LLDCs should emphasize the importance of access to the international fiber optic network;
- 2 to propose to the ITU Council specific measures designed to ensure genuine progress and provide LLDCs with effective assistance in connection with *instructs 1*;
- 3 to provide the administrative and operational structure necessary to develop a strategic plan that contains practical guidelines and criteria to govern and promote regional, subregional, multilateral, and bilateral projects affording LLDCs greater access to the international fiber optic network,

*requests the Secretary-General*

to transmit the text of this resolution to the Secretary-General of the United Nations, with a view to bringing it to the attention of the United Nations High Representative for the Least Developed Countries (LDCs), Landlocked Developing Countries (LLDCs) and Small Island Developing States (SIDSs),

*instructs the Council*

to take appropriate measures to ensure that the Union continues to collaborate actively in the development of telecommunication/ICT services in LLDCs,

*encourages landlocked developing countries*

to continue to accord high priority to telecommunication/ICT activities and projects that promote integral socioeconomic development, adopting technical cooperation activities financed from bilateral or multilateral sources that will benefit the general public,

*urges Member States*

1 to cooperate with landlocked countries by promoting regional, subregional, multilateral, and bilateral projects for telecommunication infrastructure integration that afford LLDCs greater access to the international fiber optic network,

2 to include and/or maintain in South-South and triangular cooperation programs with donor participation, and in cooperation among subregional and regional organizations, actions complementing the Almaty Programme of Action to assist landlocked developing and transit countries in executing these telecommunication infrastructure integration projects,

*invites Member States, Sector Members and Associates*

to continue support the work of ITU-D in studies of the situation of telecommunication/ICT services in the least developed countries, LLDCs, small island developing states, and countries with economies in transition so identified by the United Nations and requiring special measures for telecommunication/ICT development.

**ADD** GHA/30/1

## DRAFT NEW RESOLUTION [GHA-1]

### **To review the ITRs more regularly**

The World Conference on International Telecommunications (Dubai, 2012),

*recognizing*

1. that the International Telecommunication Regulations (ITRs) is one of the pillars supporting the ITU's mission;
2. that 24 years passed between the approval of the ITRs and its review at this conference;
3. that the ITRs consists of high level guiding principles that should not require frequent amendment but in the fast moving sector of telecommunications/ICTs need to be more regularly reviewed,

*further recognising*

1. that the Radio Regulations (RRs) define:
  1. the allocation of different radio services
  2. the mandatory technical parameters to be observed by radio station especially transmitters

3. procedure for coordination and notification of frequency assignments among other
  4. the use of the satellite orbits
2. that Administrations may decide to implement the RRs and the ITRs, through national legislation or regulations,

*considering*

1. That the Council Working Group to prepare the 2012 World Conference on International Telecommunication has held extensive discussions on the ITRs;
2. That there have been wide consultations in all ITU regions, involving private-sector members, associates, academic members and civil society groups, showing great interest in the revision of the ITRs;
3. That many input documents have been submitted by the ITU membership,

*noting*

1. That technological development and demand for services that require high bandwidth continue to increase;
2. That the ITRs:
  1. Establish general principles on the provision and operation of international telecoms
  2. Facilitate global interconnection and interoperability
  3. Promote efficiency, usefulness, and availability of international telecommunication services

*resolves*

1. That the ITRs should be reviewed at the occasion of every other WTSA (approximately every eight years) due to the fact that:
  1. There are rapid changes in technologies and services; thus policies and regulations on ICTs should reflect these changes.
  2. There is increased use of IP-enabled infrastructure and applications that comes with opportunities and challenges for the ICT sector and these need to be recognised in time.
2. When reviewing the ITRs particular attention should be paid to issues relating to:
  1. Roaming
  2. Misuse and fraud
  3. Numbering and identification related issues
  4. Transparency in traffic management and routing
  5. General telecommunication and economic related issues
  6. Cyber security and cyber threat

7. Energy efficiency
8. Climate Change, Environment and E-waste
9. Accessibility

3. To invite the Plenipotentiary Conference to consider this Resolution and to take action as appropriate,

*instructs the Secretary-General*

to bring this Resolution to the attention of the Plenipotentiary Conference,

*instructs the Secretary-General and the Directors of the Bureaux*

to identify and collate the relevant and pressing telecommunication issues which should be discussed with a view towards incorporation in the ITRs,

*Invites Member States*

to contribute to the work outlined in this Resolution.

**ADD** IAP/10/4

#### DRAFT NEW RESOLUTION [IAP-1]

### **Special measures for landlocked developing countries (LLDCs) for access to the international fiber optic network**

The World Conference on International Telecommunications (Dubai, 2012),

*considering*

- a) Resolution A/RES/65/172 of 20 December 2010 of the United Nations General Assembly on specific actions related to the particular needs and problems of landlocked developing countries;
- b) Resolution 30 (Rev. Guadalajara, 2010) of the Plenipotentiary Conference (PP) on special measures for the least developed countries, small island developing states, landlocked developing countries and countries with economies in transition;
- c) The Declarations of the Ministers of Communications of the Union of South American Nations (UNASUR) and the roadmap for South American connectivity for integration of the Telecommunications Working Group of the South American Infrastructure and Planning Council (COSIPLAN) of UNASUR;
- d) In Mandate No. 7 arising from the Sixth Summit of the Americas, held in Cartagena, Colombia, on April 14 and 15, 2012, the Heads of State and Government of the Americas resolved *“To foster increased connection of telecommunication networks in general, including fiber optic and broadband, among the region’s countries, as well as international connections, to improve connectivity, increase the dynamism of communications between the nations of the Americas, as well as reduce international data transmission costs, and, thus, promote access, connectivity, and convergent services to all social sectors in the Americas.”*,

*considering also*

- a) the Millennium Declaration and the 2005 World Summit Outcome;
- b) the outcomes of the Geneva (2003) and Tunis (2005) phases of the World Summit on the Information Society (WSIS);
- c) the Almaty Declaration and Programme of Action: Addressing the Special Needs of Landlocked Developing Countries within a New Global Framework for Transit Transport Cooperation for Landlocked and Transit Developing Countries,

*recalling*

the New Partnership for Africa's Development, an initiative to intensify economic cooperation and development at the regional level, since many landlocked developing and transit countries are found in Africa,

*reaffirming*

the right of access of landlocked countries to and from the sea and freedom of transit through the territory of transit countries by all means of transport, in accordance with the applicable rules of international law,

*reaffirming also*

that transit countries, in the exercise of their full sovereignty over their territory, have the right to adopt all measures necessary to ensure that the rights and facilities provided for landlocked countries in no way infringe upon their legitimate interests,

*recognizing*

the importance to the development of LLDCs of telecommunications and the new information and communication technologies (ICT),

*observing*

that access by LLDCs to the international fiber optic network and the laying of fiber optic cable through transit countries is not one of the infrastructure development and maintenance priorities set forth in the Almaty Programme of Action,

*concerned*

since this difficulty affecting LLDCs continues to jeopardize their development agendas,

*conscious*

- a) that fiber optic cable is a profitable telecommunications transport medium;
- b) that access within landlocked countries to the international fiber optic network will promote their integral development and the potential for them to create their own Information Society,

*conscious also*

- a) that the planning and laying of the international fiber optic network calls for close cooperation between landlocked and transit countries;
- b) that in making the basic investment in laying fiber optic cable, capital

investments by the private sector are required,

*instructs the Secretary-General and the Director of the Telecommunication Development Bureau*

1 that studies of the situation of telecommunication/ICT services in the LLDCs should emphasize the importance of access to the international fiber optic network;

2 that they propose to the ITU Council specific measures designed to ensure genuine progress and provide LLDCs with effective assistance in connection with *instructs 1*;

3 to provide the administrative and operational structure necessary to develop a strategic plan that contains practical guidelines and criteria to govern and promote regional, subregional, multilateral, and bilateral projects affording LLDCs greater access to the international fiber optic network,

*requests the Secretary-General*

to transmit the text of this resolution to the Secretary-General of the United Nations with a view to bringing it to the attention of the United Nations High Representative for the Least Developed Countries, Landlocked Developing Countries and Small Island Developing States,

*instructs the Council*

to take appropriate measures to ensure that the Union continues to collaborate actively in developing telecommunication/ICT services in LLDCs,

*encourages landlocked developing countries*

to continue to accord high priority to telecommunication/ICT activities and projects that promote integral socioeconomic development, adopting technical cooperation activities financed from bilateral or multilateral sources that will benefit the general public,

*urges the Member States*

1 to cooperate with landlocked countries by promoting regional, subregional, multilateral, and bilateral projects for telecommunication infrastructure integration that afford LLDCs greater access to the international fiber optic network;

2 to include and/or maintain in South-South and triangular cooperation programs with donor participation, and in cooperation among subregional and regional organizations, actions complementing the Almaty Programme of Action to assist landlocked developing and transit countries in executing these telecommunication infrastructure integration projects,

*invites the Member States and Sector Members and Associates*

to continue support the work of ITU-D in studies of the situation of telecommunication/ICT services in the least developed countries, LLDCs, small island developing states, and countries with economies in transition so identified by the United Nations and requiring special measures for telecommunication/ICT development.

Opinion

MOD CME/15/177

OPINION NO. 1

**Special Telecommunication Arrangements**

The World ~~Administrative Telegraph and Telephone Conference (Melbourne, 1988)~~  
Conference on International Telecommunications (Dubai, 2012),

~~in view of~~

~~Article 31 of the International Telecommunication Convention (Nairobi, 1982),  
taking into account~~

~~Resolution No. 10 of the Plenipotentiary Conference (Nairobi, 1982),  
considering~~

- a) that the whole of the telecommunications sector is currently evolving towards more efficient services requiring new technical facilities;
- b) that the development of business and other communications, including communications among and within organizations with offices in different countries, will continue at an increasingly rapid pace and is necessary to economic development;
- c) that not all Member countries may be capable of adequately meeting all the requirements in this respect;
- d) that each Member may exercise full sovereign control, through its national laws, over any decision concerning special arrangements made pursuant to ~~Article 31 of the Nairobi Convention~~ 42 of the Constitution of the International Telecommunication Union,

~~considering further~~

- a) that, for many Members, revenues from international telecommunications are vital for their administrations ~~\*~~ /operating agencies;
- b) that the majority of such revenues are derived from the provision of international telecommunication services to businesses and other organizations,

~~noting~~

that the provisions of Article 9 of the International Telecommunication Regulations (~~Melbourne, 1988~~ Dubai, 2012) apply to special telecommunication arrangements, and in particular that such arrangements should avoid technical harm to the operation of the telecommunication facilities of third countries,

~~is of the opinion~~

~~1 — that special telecommunication arrangements pursuant to Article 31 of the International Telecommunication Convention (Nairobi, 1982) should be made only where existing arrangements are unable to satisfactorily meet the relevant telecommunication need;~~

21 that in allowing such special arrangements, Members should consider their effects on third countries, and in particular, to the extent possible within national law, should endeavour to ensure that any adverse effects on the orderly development, operation or usage of the international telecommunication network by other Members are minimized;

32 that any such special arrangements should be consistent with the maintenance and extension of international cooperation for the improvement and rational use of telecommunications, as well as with the promotion of the development of technical facilities and their most efficient operation, with a view to improving the efficiency of telecommunication services, especially those available to the public.

OPINION NO. 1

**Special Telecommunication Arrangements**

SUP MEX/20/76

OPINION NO. 1

**Special Telecommunication Arrangements**

General Matters

**Interaction between Administrative Regulations**

ACP/3A1/6

**6.1 The terms:**

- **Telecommunication (CS 1012)**
- **International telecommunication Service (CS 1011)**
- **Government telecommunications (CS 1014)**
- **Service telecommunication (CV 1006)**

***are already contained in ITU CS or CV, therefore there seems to be no need to repeat them in the ITRs unless it is absolutely necessary.***

*In* accordance with No. 32 of Article 4 of the ITU CS, terms contained in CS/CV shall prevail when there is inconsistency.

**6.2 *Regarding the proposed new definitions such as “Hub”, “Fraud” and “Spam” it was considered that since some of these issues may be outside the scope of ITRs it would therefore be difficult to include these definitions in the ITRs. Therefore one possible alternative is to adopt relevant Resolutions to address these issues.***

ACP/3A1/4

This is a fundamental question which needs a proper reply. It is to be noted that there may be no need to repeat certain provisions as contained in the Constitution and the Convention in the ITRs unless such repetition is absolutely necessary. For example, very limited provisions of the Constitution and perhaps of the Convention have been included in the Radio Regulations only where such inclusion was absolutely necessary.

Consequently, every effort should be made to avoid such repetition and thus inclusion of certain terms from the Constitution and the Convention in the ITRs must be kept to the minimum absolutely necessary.

IAP/10/2

The CITEL Administrations support avoiding overlaps between the revised ITRs and the Radio Regulations. As a general matter, CITEL Administrations consider that all ITU's administrative regulations specific to radiocommunications should be contained within the Radio Regulations where they may be addressed by a competent World Radiocommunication Conference (WRC), as needed.

### **International Mobile Roaming Rates**

IAP/10/13

Like many countries in other regions, the CITEL Member States are keenly interested in issues related to high international roaming rates. Furthermore, we are aware that many factors impact international roaming rates. These factors include: the complex nature of wholesale and retail markets, differing needs and travel patterns of roamers, emerging alternative technologies to international roaming, developments in the wholesale roaming market, and ambiguous results of market interventions by regulatory authorities in other regions on international roaming.

CITEL Member States believe that:

1. A global solution to high international mobile roaming rates is likely to be neither efficient nor effective;
2. National regulatory authorities would be best served by having the opportunity to consider a wide array of regulatory tools, technological solutions, and policies that promote consumer awareness and empowerment coupled with transparency in international mobile retail roaming rates to address high international mobile roaming rates;
3. Any proposed regulatory and market interventions must be evaluated in terms of their effectiveness with respect to the future market and technological innovations in international roaming in our region;
4. National regulatory discretion should be preserved to address any market failures;
5. Market based solutions can be effective and efficient means of addressing concerns about roaming charges;
6. Bilateral and regional cooperation between Member States to address high international roaming rates may be more effective than a global solution.

ACP/3A3/1

## Principles

**Principle 1** CS 31 and 32 of Article 4 of the Constitution, "Instrument of the Union" stipulate that:

**31** 3 *The provisions of both this Constitution and the Convention are further  
PP-98 complemented by those of the Administrative Regulations, enumerated below, which regulate the use of telecommunications and shall be binding on all Member States:*

- *International Telecommunication Regulations,*
- *Radio Regulations.*

**32** 4 *In the case of inconsistency between a provision of this Constitution and a provision of the Convention or of the Administrative Regulations, the Constitution shall prevail. In the case of inconsistency between a provision of the Convention and a provision of the Administrative Regulations, the Convention shall prevail"*

**Principle 2** CS 37 and 38 of Article 6 of the Constitution, "Execution of the Instruments of the Union" stipulate that:

**37** 1 *The Member States are bound to abide by the provisions of this Constitution,  
PP-98 the Convention and the Administrative Regulations in all telecommunication offices and stations established or operated by them which engage in international services or which are capable of causing harmful interference to radio services of other countries, except in regard to services exempted from these obligations in accordance with the provisions of Article 48 of this Constitution.*

**38** 2 *The Member States are also bound to take the necessary steps to impose the  
PP-98 observance of the provisions of this Constitution, the Convention and the Administrative Regulations upon operating agencies authorized by them to establish and operate telecommunications and which engage in international services or which operate stations capable of causing harmful interference to the radio services of other countries."*

## Principle 3

1. *The degree/scope by which a provision in a treaty is binding depends on the language and terms that are used in the text. For instance, text (s) in which the language (s) used is accompanied/proceeded by the word 'shall' or a word similar to that, e.g. 'must' or the terms 'is required' or 'are required' would have a mandatory nature/status.*

2. *In contrast text (s) in which the language (s) used is accompanied /preceded by the word 'should' or a similar word, e.g. 'may' or by the terms 'encouraged' or 'invited' or 'endeavor' or even 'shall cooperate' would have a non-mandatory nature/status.*

## Criteria

### Criterion 1; Incorporation of the Provisions/Articles contained in the ITU Constitution and the Convention in the Draft revised ITR

- 1.1 Duplication or incorporation of Provisions/Articles of the Basic Instruments of the Union in the Administrative Regulations should be avoided unless absolutely necessary. An example of a necessary duplication is the verbatim inclusion of Article 44 of the ITU Constitution in the Radio Regulations.
- 1.2 Any duplication or incorporation of Provisions or Articles of the Basic Instruments of the Union within the revised ITRs must be verbatim to those contained in the CS/CV, unless,
- 1.3 The entire Provision or Articles to be referenced includes issues beyond the scope of the ITRs. In such circumstances the relevant section of that text can be included in the revised ITRs together with any necessary explanatory text.

### Criterion 2; Proposals relating to terms and definitions

- 2.1 Duplication of definitions already contained in the Annexes of the CS/CV within the ITRs should be limited to those definitions present in the current ITRs.
- 2.2 Any repetition of definitions must be verbatim to those contained in the CS/CV
- 2.3 To avoid inconsistency between the CS/CV and the ITRs, text deemed necessary for duplication within the ITRs should be preceded by the following: "*pursuant to No. x of CS or CV*" followed by the selected text in its entirety without any change other than those required for cross referencing. An example is paragraph 9.1 of Article 9 of the current ITR in which No. 31 of the Nairobi Convention is incorporated.
- 2.4 Proposals which seek to modify existing terms and definitions contained within the CS/CV are not appropriate to be included in the ITRs.
- 2.5 Any incorporation into the revised ITRs of modified terms and definitions currently found in the Annexes to the CS/CV should be avoided, in particular, any modifications submitted to past Plenipotentiary conferences and not agreed.
- 2.6 Expansion or modification of the terms and definitions contained in the current ITRs should be avoided.
- 2.7 Definitions of a technical and/or operational nature may be more appropriately contained in WCIT -12 Resolution(s). Consideration could also be given to an appropriate mechanism for their revision. If a term is not used in an Article or Provision, it is not necessary to define that term in the revised ITRs.

### Criterion 3; Reference to "ITU Recommendations"

- 3.1 ITU Recommendations shall remain non-binding/voluntary. Proposals which directly or indirectly alter the non-binding/voluntary nature of ITU-T and ITU-R Recommendations are not appropriate to be included in the ITRs.
- 3.2 Any incorporation by reference to specific ITU-T Recommendations appears inappropriate given the dynamic nature of ITU-T Study Groups and the need to avoid frequent revision of the ITRs. Where absolutely necessary, reference

should only be made to specific ITU-T Recommendations using the terms “taking into account/based on the latest version of the ITU-T Recommendation.

- 3.3 Where a reference to an ITU-T Recommendations absolutely necessary, the language used must make clear that there is no implication that the Recommendations are binding for example, “Member States are encouraged to implement the ITU-T Recommendations.”
- 3.4 Any references to “ITU Recommendations” should address the specific field of application (ITU-T or ITU-R). General references to “ITU Recommendations” are not appropriate and could cause unnecessary confusion.

#### **Criterion 4; Modification to the current structure of the ITR (reshuffling of Articles and/or Provision)**

- 4.1 Modification to the current structure of the ITRs including Chapters and Articles should be avoided unless absolutely necessary.

#### **Criterion 5; Use of the term “Member State”, “Administration”, “Operating Agency”, “Private Operating Agency, Recognized Operating Agency” and Private Recognized Operating Agency”**

- 5.1 As an integral part of the Administrative Regulations annexed to the ITU Constitution, the revised ITRs are a treaty, to be agreed, signed, ratified and implemented by Member States. Due to the different structures responsibilities and frameworks in place among Member States, any proposal to systematically replace the term “Administration” with “Member State” is not appropriate. The term “Administration” should be deleted throughout the revised ITU texts because the treaty obligations of the ITRs are observed by Member States and the operational obligations are observed by “Operating Agencies” as described in paragraph 5.2 below.
- 5.2 In view of the arguments mentioned in paragraph 5.1 above, the term “Administrations” should be replaced by the term “Operating Agencies” or “Recognized Operating Agencies” or “Private Operating Agency” or “Private Recognized Operating Agency.” This is because in the vast majority of ITU Member States the tasks that were undertaken or associated with “Administration” in 1988 are currently being performed by one of the four entities listed above, according to the context in which these terms are used in a given country.
- 5.3 Since the use of any of these four terms in lieu of “Administration” could create very different legal rights and obligations for ITU Member States and entities within Member States, each of these terms will be assessed on a case by case basis according to the prevailing circumstances and situations in each country
- 5.4 To resolve this matter and allow the flexibility to address the situation and circumstances which could exist in each country, a possible way forward would be to introduce an asterisk above the term “Operating Agency” with the following footnote to describe the situation:

“Whenever, in these Regulations, reference is made to “Operating Agency”, it is understood that the term also covers “Recognized Operating Agency” and/or “Private Operating agency “and /or “Private Recognized Operating Agency, “or other entities” that provide international telecommunication services to the public, according to the context in which these terms are used in a given country.

---

## Proposed Conference Structure

IAP/10/39

### 1 DESCRIPTION

In accordance with the ITU General Rules of Conferences, Assemblies and Meetings, the Member States of CITELE propose the following structure for the upcoming World Conference on International Telecommunications (WCIT-12).

#### Plenary

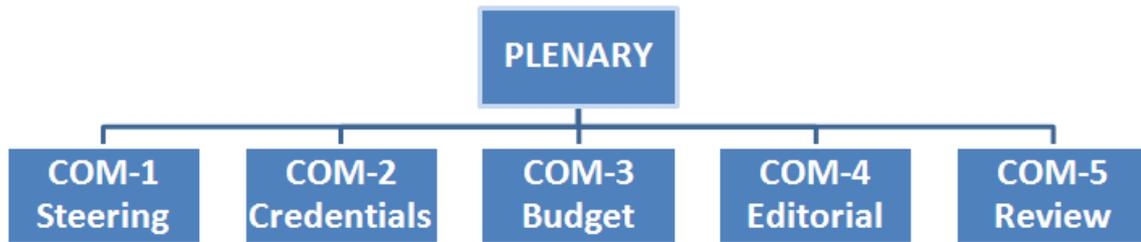

#### Committee 1 - Steering Committee

#### Committee 2 - Credentials Committee

#### Committee 3 - Budget Control Committee

#### Committee 4 - Editorial Committee

#### Committee 5 - Review Committee

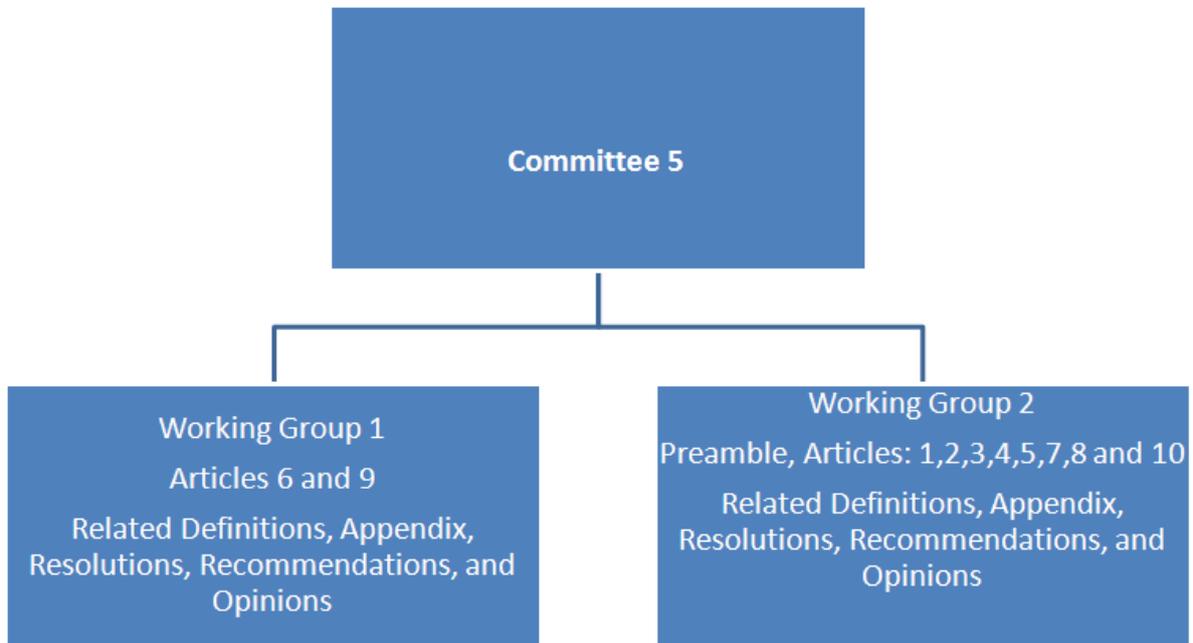

### TERMS OF REFERENCE FOR COMMITTEE 5

#### Committee 5 – Review of the International Telecommunication Regulations (ITRs) Framework

Committee 5, on the basis of proposals from administrations and taking into account the existing ITRs, should consider and take appropriate action with regard to the ITRs. Committee 5 should have two Working Groups (WGs) that should not meet in parallel, due to translation and resource constraints. It is proposed that new Articles, if any, must be agreed in principle during the Committee 5 Plenary before being sent to one of the two WGs for consideration. CITELE Member States propose that Committee 5 be organized so that each WG has responsibility for specific provisions of the ITRs. We believe this will help to avoid overlapping of issues. Additionally, resolutions, recommendations and opinions associated with the articles as described in the attached chart should be considered within the relevant working group, as we believe this will allow for conference efficiency. The specific coverage of each WG is as follows:

1. Working Group 1: Articles 6 and 9 and Appendices, and related definitions and Resolutions, Recommendations and Opinions
2. Working Group 2: Articles, 1, 2, 3, 4, 5, 7, 8, 10 and related definitions and Resolutions Recommendations and Opinions

There shall not be more than 3 meetings in parallel at any time during the conference, including Plenary Sessions, Committees 1 through 5 meetings and Ad-Hoc Group meetings.

World Conference on International Telecommunications (WCIT) Structure (Text in parentheses identify links relevant to the Article, Appendix, Resolution, Recommendation, or Opinion)	
Working Group 1	Working Group 2
Article	Article
Article 6 Charging and Accounting (Appendix 1 (Lines 47 and 52); Appendix 2 (Line 52); Appendix 3 (Line 54))	Preamble
Article 9 Special Arrangements	Article 1 Purpose and Scope of the Regulations
	Article 2 Definitions (Resolution 8 – <i>considering</i> b; Recommendation 2 – <i>considering and recommends that the Administrative Council</i> )
	Article 3 International Network
	Article 4 International Telecommunication Services
	Article 5 Safety of Life and Priority of Telecommunications
	Article 7 Suspension of Services

### **Resolution 171 (Guadalajara, 2010) - scope**

IAP/10/1

CITEL Member States welcome the opportunity to discuss all proposals for revisions to the ITRs, pursuant to the guidelines adopted in Resolution 171 (Guadalajara, 2010). To that end, the CWG-WCIT-12 should discuss all issues, including new and emerging issues, provided any provisions proposed for inclusion in the ITRs are consistent with the scope of review outlined in Resolution 171 (Guadalajara, 2010).

In addition, CITEL Member States are of the view that any proposed revisions to the ITRs should be evaluated in the context of the enormous changes that have occurred in the international telecommunications market since the ITRs were last revised in 1988. The current provisions of the ITRs reflect an environment where predominately monopoly international carriers exchanged traffic with each other and where the only services were fixed voice telephone and telegraph. In today's competitive environment multiple carriers compete with each other to exchange international telephone traffic using services other than the fixed telephone. Considering this competitive environment, CITEL Member States believe that detailed regulatory provisions governing the exchange of international traffic are not necessary and, indeed, could impede further innovation.

CITEL Member States propose that all revisions to the ITRs reflect points i) through iv) in the Background section of this document.

IAP/10/21

NOC No change to the International Telecommunication Regulations to address security.

IAP/10/19

CITEL Member States support retaining the current scope and application of the International Telecommunication Regulations (ITRs) and updating the term "recognized private operating agency" to Recognized Operating Agencies (ROAs), in accordance with the updated definition in the ITU Constitution CS1008. CITEL Member States oppose all proposals to expand the scope of the ITRs by replacing ROAs with "operating agencies" (OAs), which is defined in ITU Constitution CS1007.

IAP/10/36

Consistent with Resolution 130 (Rev. Guadalajara, 2010) of the Plenipotentiary Conference, the CITELE Administrations support excluding content, national defense and security, and cybercrime aspects. Any other aspects of cybersecurity must meet the criteria established in Resolution 171 (Guadalajara, 2010) in order to be considered for inclusion in any revised International Telecommunication Regulations.

**Revision of ITRs – General views**

IAP/10/10

The Member States of CITELE present their views and understandings regarding the principles to be observed in revising the International Telecommunication Regulations (ITRs):

1. The ITRs should contain provisions concerning obligations to the signatory Member States. Member States should adopt the necessary measures to implement the ITRs at the national and international levels, whenever the provisions apply, consistent to national legislation;
2. The ITRs should mostly address high-level matters regarding international telecommunications, considering the technical aspects inherent to telecommunications;
3. The ITRs should be viewed as provisions that complement the ITU Constitution (CS) and Convention (CV), so any proposal that is “unconstitutional” or contravenes what is defined in the CS and CV should not be approved;
4. The ITRs should, to the greatest extent possible, avoid duplicating provisions that already exist in the ITU CS and CV;
5. The term “Member” should be systematically replaced by “Member States”;
6. The term “CCITT” should be systematically replaced by “ITU-T”;

IAP/10/12

The CITELE Administrations support achieving a set of revised ITRs that is a stable treaty instrument containing a high level set of general principles that support the introduction of innovative new technologies and services over a long timeframe. Toward that end, the CITELE Administrations seek to avoid associating future WCITs with any particular ITU sector or establishing it as a conference that is held periodically.

**Terminology**

ACP/3A1/1

APT Members are of the view that for the replacement of “CCITT” by “ITU-T” needs to be done systematically.

ACP/3A1/2

2.1 Agreement was reached for the replacement of the term “Member” with “Member State”.

2.2 For the replacement of the term “Administration” with “Member State” or “Operating Agencies”, to be considered on a case by case basis, since some provisions are dealing with responsibilities of Member States; while other provisions are dealing with the responsibilities of Operating Agencies.

2.3 In the ITRs reference is made to *Recognized Private Operating Agency*. In order to cover all three terms, *Operating Agency*, *Recognized Operating Agency* and *Recognized Private Operating Agency*, a possible option would be to refer to “Operating Agency” as an umbrella term while the two other terms, “Recognized Operating Agency” and “Recognized Private Operating Agency”, should be considered as subset of “Operating Agency”, to cover all possible cases in different countries as the situation may be.

#### ACP/3A1/3

Such a course of action seems to be incorrect, due to the fact that in the ITRs reference may be made to ITU-T Recommendations in general and, where it is absolutely necessary, reference may be made to ITU-R Recommendations. Moreover, the term “ITU Recommendations” is broad and misleading as it does not clearly indicate the field of application of the Recommendation.

Consequently, to make a general reference to ITU Recommendations seems to be inappropriate and thus APT does not support such a course of action.

#### ACP/3A1/5

Provision 1.4 of Article 1 of the ITRs stipulates:

*“1.4 References to CCITT Recommendations and Instructions in these Regulations are not to be taken as giving to those Recommendations and Instructions the same legal status as the Regulations.”*

It should be noted that as a general rule, the application of ITU-T Recommendations are non mandatory and optional/voluntary. There is neither a technical nor a regulatory basis for giving any of the ITU-T Recommendations the same legal status as the very general, high level provisions contained in the ITRs.

APT Members are therefore of the opinion that there seems to be no need to modify the existing provision 1.4 of Article 1 of the ITRs, except appropriate editorial revision to change “CCITT” to “ITU-T”, which establishes that the ITU-T Recommendations are voluntary for ITU Member States.

It is worth mentioning that the term “Instructions” referred to in the provision 1.4 of Article 1 currently does not exist in the ITRs. The above term may therefore be deleted.

#### CAN/USA/31/1

WCIT-12 should agree in Plenary, before specific proposals to revise the ITRs are considered in the Working Groups of Committee 5, on the scope of the ITRs; specifically, any revisions to the Preamble and Article 1 and whether they apply to “Recognized Operating Agencies,” “Operating Agencies,” or other entities, and whether the definition of “Telecommunications” remains the same or is revised, before it considers specific proposals to revise the ITRs.
