

## **Major group 45 – Water transport**

### **Overview of the Major group**

This Major group comprises establishments engaged in the transportation of passengers or freight on the sea, coastal area, ports and harbors, rivers and lakes using vessels or ships and boats.

However, establishments engaged in freight transportation using barges in the harbor area are classified in the Major group 48 – Services incidental to transport [4811].

A vessel or ship is integrated in the establishment engaged in managing the operation of the vessel or ship.

In the absence of an establishment ashore, however, the vessel or ship itself is deemed an establishment.
