

**Project Proposal to increase Inter Asia  
Broadband and Internet  
Usage:  
360 Cave for  
Distance Learning and Building Friendship**

By  
Dr. Sureswaran Ramadass  
Program Chairman &  
Head of Network Research Group, USM  
Jun 2002

## The Aim

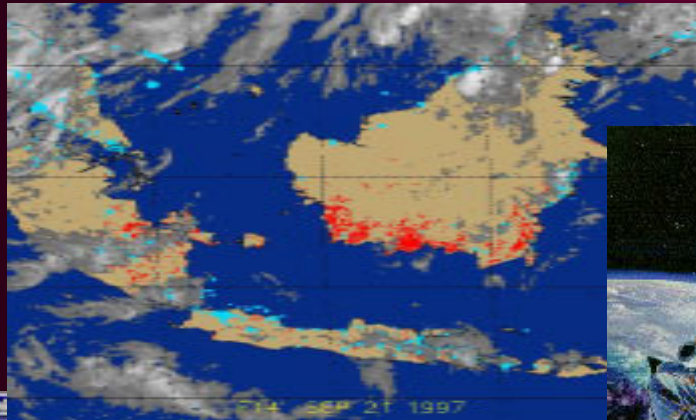

- Create links and communications centers throughout Asia
- The centers will be created using Surround and Cave style 360 Degree Environments
- This 360 Caves will be used to promote cultures and tourism (like Orchestras etc)
- This 360 Caves will also be used to promote Education and Internet knowledge

## The Method and Tools

- Universities and Research Institutes can be the places to host the 360 Caves.
- Broadband (Satellite and Terrestrial) will be used to create the network
- Asian Expertise and knowledge will be used to build the 360 Caves.

## Funding

- Possible to share cost
- Governments can provide shared link costs
- Universities and Research Institutes can provide the location

### Features of IPv6 : Business & Technical Aspect
