

## Overview of support for the project to develop data centers in the U.S.

- Fund Corporation for the Overseas Development of Japan's ICT and Postal Services Inc. (JICT), together with Mitsubishi Corporation and Digital Realty Trust Inc., will participate in the project to build and operate two data centers in the United States, and invest up to US\$192 million.
- This is Mitsubishi Corporation's first overseas data center project, and requires substantial capital investment and a long payback period. The amount provided by JICT will support the business expansion of Japanese business operators having know-how in digital infrastructure in the United States, leading to further global rollout in the future, thereby contributing to strengthening the international competitiveness of Japanese business operators and related businesses.

### [Investment Scheme]

\* The support scheme has been partially simplified.
